

TTM Technologies Appoints Vice President of Technology

December 22, 1999

REDMOND, WA December 22, 1999 --- TTM Technologies, a leading provider of complex printed circuit boards, announced today that Larry Benton has been named to the position of Vice President of Technology. Prior to this, Larry was Director of Technology at the Power Circuits division.

Benton's background includes more than 28 years experience in the printed circuit board industry. "Larry's vast experience and leadership in the printed circuit industry will be invaluable to the adoption and implementation of new process and technology at TTM Technologies." states Kent Alder, CEO of TTM Technologies.

Prior to TTM Technologies, Larry has held a variety of management positions and Director level positions at Ambitech, Northern Telecom, Hewlett Packard and Digital Equipment.

For further information, contact Brad Playford at 714-241-0303.

About TTM Technologies

TTM Technologies assists its customers in bringing sophisticated electronic products to market faster by offering integrated (prototype, ramp-to-volume and volume) printed circuit board capabilities and services for the computing, telecom, instrumentation and various other markets. The Santa Ana Division services the time-critical prototype and ramp-to-volume segments of the PCB market. The Redmond division services ramp-to-volume and large-volume segments of the PCB market. On a combined basis, the company services over 400 customers, employs over 950 people and has annual revenue in excess of \$125 million. Thayer Capital Partners, Washington D.C., and Brockway Moran Partners, Boca Raton, Florida, are the majority owners of the newly merged entity.
