
UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

Form 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 28, 2011

Commission File Number: 0-31285

TTM TECHNOLOGIES, INC.

(Exact name of registrant as specified in its charter)

DELAWARE
*(State or other jurisdiction of
incorporation or organization)*

91-1033443
*(I.R.S. Employer
Identification No.)*

2630 South Harbor Boulevard, Santa Ana, California 92704
(Address of principal executive offices)

(714) 327-3000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Number of shares of common stock, \$0.001 par value, of registrant outstanding at May 3, 2011: 81,318,061

At March 28, 2011 and March 29, 2010 accrued purchases of equipment totaled \$92,155 and \$1,180, respectively.

See accompanying notes to consolidated condensed financial statements.

TTM TECHNOLOGIES, INC.

**Notes to Consolidated Condensed Financial Statements
(Unaudited)
(Dollars and shares in thousands, except per share data)**

(1) Nature of Operations and Basis of Presentation

TTM Technologies, Inc. (the Company or TTM) is a leading global provider of time-critical and technologically complex printed circuit board (PCB) products and backplane assemblies (PCBs populated with electronic components), which serve as the foundation of sophisticated electronic products. The Company provides advanced technology products and offers a one-stop manufacturing solution to customers from engineering support to prototype development through final volume production. The Company serves a diversified customer base in various markets throughout the world, including manufacturers of networking/communications infrastructure products, personal computers, touch screen tablets and mobile media devices (cellular phones and smart phones). The Company also serves high-end computing, commercial aerospace/defense, and industrial/medical industries. The Company's customers include both original equipment manufacturers (OEMs) and electronic manufacturing services (EMS) providers.

The accompanying consolidated condensed financial statements have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. These consolidated condensed financial statements reflect all adjustments (consisting only of normal recurring adjustments) which, in the opinion of management, are necessary to present fairly the financial position, the results of operations and cash flows of the Company for the periods presented. It is suggested that these consolidated condensed financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the Company's most recent Annual Report on Form 10-K. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year. The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the Company's consolidated condensed financial statements and accompanying notes. Actual results could differ materially from those estimates. The Company uses a 13-week fiscal quarter accounting period with the first quarter ending on the last Monday in March and the fourth quarter always ending on December 31. The first quarters ended March 28, 2011 and March 29, 2010 each contained 87 and 88 days, respectively.

(2) Acquisition of PCB Subsidiaries

On the evening of April 8, 2010 (in the morning of April 9, 2010, Hong Kong time), the Company acquired from Meadville Holdings Limited (Meadville), an exempted company incorporated under the laws of the Cayman Islands, and MTG Investment (BVI) Limited (MTG), a company incorporated under the laws of the British Virgin Islands and a wholly owned subsidiary of Meadville, all of the issued and outstanding capital stock of four wholly owned subsidiaries of MTG. These four companies, through their respective subsidiaries, engage in the business of manufacturing and distributing printed circuit boards, including circuit design, quick-turn-around services, and drilling and routing services. Subsequent to the acquisition, these four companies and their subsidiaries (together, the PCB Subsidiaries) are subsidiaries of the Company and represent the Asia Pacific operating segment of the Company.

The Company purchased the PCB Subsidiaries for a total consideration of \$114,034 in cash and 36,334 shares of TTM common stock, of which approximately 26,225 are subject to restrictions. After taking into account the 36,334 shares of TTM common stock issued in the acquisition and based on the number of shares outstanding on April 8, 2010, the date the Company acquired the PCB Subsidiaries, approximately 45% of TTM common stock outstanding was held by Meadville, its shareholders, or their transferees.

The purchase price of the PCB Subsidiaries was allocated to tangible and intangible assets acquired, liabilities assumed and noncontrolling interests based on their estimated fair value at the date of the acquisition (April 8, 2010). Noncontrolling interests consist of a 29.8% equity interest in one PCB manufacturing subsidiary and a 20.0% equity interest in one other PCB manufacturing subsidiary held by third parties. The fair value was determined by utilizing a combination of income and market comparable approaches. The income approach was used to estimate the total enterprise value of each noncontrolling interest by estimating discounted future cash flows. The market comparable approach indicates the fair value of the noncontrolling interest based on a comparison to comparable enterprises in similar lines of business that are publicly traded or are part of a public or private transaction.

[Table of Contents](#)

Bank fees and legal and accounting costs associated with the acquisition of the PCB Subsidiaries of \$1,798 for the quarter ended March 29, 2010 have been expensed and recorded as general and administrative expense in the consolidated condensed statement of operations in accordance with ASC Topic 805, *Business Combinations*. There were no bank fees or legal and accounting costs associated with the acquisition of the PCB Subsidiaries for the quarter ended March 28, 2011.

Unaudited pro forma operating results for the Company, assuming the acquisition of the PCB Subsidiaries occurred on January 1, 2010 are as follows:

	For the Quarter Ended March 29, 2010
	(In thousands, except per share data)
Net sales	\$ 296,535
Net income	\$ 6,171
Basic earnings per share	\$ 0.08
Dilutive earnings per share	\$ 0.08

The pro forma information is not necessarily indicative of the actual results that would have been achieved had the PCB Subsidiaries acquisition occurred as of January 1, 2010, or the results that may be achieved in future periods.

(3) Accounts and Notes Receivable Factoring and Sales Arrangements

In the normal course of business, the Company's foreign subsidiaries utilize accounts receivable factoring arrangements. Under these arrangements, the Company may sell certain of its accounts receivable to financial institutions, which are accounted for as a sale, at a discount ranging from 1% to 2% of the accounts receivable. In all arrangements there is no recourse against the Company for its customers' failure to pay. The Company sold \$14,261 of accounts receivable for the quarter ended March 28, 2011.

Additionally, the Company's foreign subsidiaries may also sell certain of their notes receivable at a discount ranging from 1% to 2% of the notes receivable. The Company sold \$26,289 of notes receivable for the quarter ended March 28, 2011.

The Company did not sell any accounts or notes receivable for the quarter ended March 29, 2010.

(4) Inventories

Inventories as of March 28, 2011 and December 31, 2010 consist of the following:

	March 28, 2011	December 31, 2010
	(In thousands)	
Inventories:		
Raw materials	\$ 52,043	\$ 50,465
Work-in-process	53,233	47,178
Finished goods	39,324	37,742
	<u>\$ 144,600</u>	<u>\$ 135,385</u>

[Table of Contents](#)

(5) Goodwill and Definite-lived Intangibles

As of March 28, 2011 and December 31, 2010 goodwill by operating segment and the components of definite-lived intangibles were as follows:

Goodwill

	<u>North America</u>	<u>Asia Pacific</u> (In thousands)	<u>Total</u>
Balance as of December 31, 2010			
Goodwill	\$ 131,650	\$ 183,176	\$ 314,826
Accumulated impairment losses	<u>(117,018)</u>	<u>—</u>	<u>(117,018)</u>
	<u>14,632</u>	<u>183,176</u>	<u>197,808</u>
Foreign currency translation adjustment during the quarter	<u>77</u>	<u>(566)</u>	<u>(489)</u>
Balance as of March 28, 2011			
Goodwill	131,727	\$ 182,610	314,337
Accumulated impairment losses	<u>(117,018)</u>	<u>—</u>	<u>(117,018)</u>
	<u>\$ 14,709</u>	<u>\$ 182,610</u>	<u>\$ 197,319</u>

The December 31, 2010 goodwill balance includes foreign currency translation adjustments related to foreign subsidiaries which operate in currencies other than the U.S. Dollar.

Definite-lived Intangibles

	<u>Gross Amount</u>	<u>Accumulated Amortization</u> (In thousands)	<u>Foreign Currency Rate Change</u>	<u>Net Carrying Amount</u>	<u>Weighted Average Amortization Period</u> (years)
March 28, 2011:					
Strategic customer relationships	\$ 120,427	\$ (35,663)	\$ (2)	\$ 84,762	9.2
Trade name	10,302	(1,741)	(33)	8,528	6.0
Licensing agreements	350	(215)	—	135	3.0
Order backlog	1,288	(1,286)	(2)	—	0.2
	<u>\$ 132,367</u>	<u>\$ (38,905)</u>	<u>\$ (37)</u>	<u>\$ 93,425</u>	

All of the definite-lived intangibles are amortized using the straight line method of amortization over the useful life, with the exception of the strategic customer relationship intangibles, which are amortized using an accelerated method of amortization based on estimated cash flows. Amortization expense was \$4,188 and \$820 for the quarters ended March 28, 2011 and March 29, 2010, respectively. Amortization expense related to acquired licensing agreements is classified as cost of goods sold.

Estimated aggregate amortization for definite-lived intangible assets for the next five years is as follows:

	<u>(In thousands)</u>
Remaining 2011	\$ 13,300
2012	16,516
2013	15,521
2014	13,945
2015	12,470
	<u>\$ 71,752</u>

[Table of Contents](#)

(6) Long-term Debt and Letters of Credit

The following table summarizes the long-term debt of the Company as of March 28, 2011 and December 31, 2010.

	Average Effective Interest Rate as of March 28, 2011	March 28, 2011 (In thousands)	Average Effective Interest Rate as of December 31, 2010	December 31, 2010 (In thousands)
Bank loans, due various dates through May 2012	2.12%	\$ 15,813	3.39%	\$ 30,412
Term loan due November 2013	2.25%	332,500	2.26%	350,000
Other	6.00%	19	6.00%	20
		348,332		380,432
Less: Unamortized discount		(256)		(314)
		348,076		380,118
Less: Current maturities		(87,504)		(67,123)
Long-term debt, less current maturities		<u>\$ 260,572</u>		<u>\$ 312,995</u>

The maturities of long-term debt through 2013 and thereafter are as follows:

	(In thousands)
Remaining 2011	\$ 35,003
2012	120,561
2013	192,504
Thereafter	8
	<u>\$ 348,076</u>

Bank loans are made up of bank lines of credit in mainland China and are used for working capital and capital investment for the Company's mainland China facilities acquired in conjunction with the acquisition of the PCB Subsidiaries. These facilities are denominated in either U.S. Dollars or Chinese Renminbi (RMB), with interest rates tied to either LIBOR or People's Bank of China rates. These bank loans expire in May 2012.

On April 9, 2010, in conjunction with the acquisition of the PCB Subsidiaries, the Company became a party to a credit agreement (Credit Agreement) entered into on November 16, 2009 by certain PCB Subsidiaries. The Credit Agreement consists of a \$350,000 senior secured term loan (Term Loan), a \$87,500 senior secured revolving loan (Revolving Loan), a \$65,000 factoring facility (Factoring Facility), and a \$80,000 letters of credit facility (Letters of Credit Facility), all of which mature on November 16, 2013. The Credit Agreement is secured by substantially all of the assets of the PCB Subsidiaries and is senior to all other Company debt including the Convertible Senior Notes, (Note 7). The Company has fully and unconditionally guaranteed the full and punctual payment of all obligations of the PCB Subsidiaries under the Credit Agreement.

Borrowings under the Credit Agreement bear interest at a floating rate of LIBOR (term election by Company) plus an applicable interest margin. Borrowings under the Term Loan will bear interest at a rate of LIBOR plus 2.0%, LIBOR plus 2.25% under the Revolving Loan, and LIBOR plus 1.25% under the Factoring Facility. There is no provision, other than an event of default, for these interest margins to increase. At March 28, 2011, the weighted average interest rate on the outstanding borrowings under the Credit Agreement was 2.25%.

The Company is required to make scheduled payments of the outstanding Term Loan balance beginning in 2011. All and any other outstanding balances under the Credit Agreement are due at the maturity date of November 16, 2013. Borrowings under the Credit Agreement are subject to certain financial and operating covenants that include, among other provisions, limitations on dividends or other distributions, maintaining maximum total leverage ratios and minimum net worth, current assets, and interest coverage ratios at both the Company and PCB Subsidiaries level. The Company is in compliance with the covenants.

[Table of Contents](#)

The Company is also required to pay a commitment fee of 0.20% per annum on the unused portion of any loan or facility under the Credit Agreement. For the quarter ended March 28, 2011, the Company incurred \$75 in commitment fees related to unused borrowing availability under the Credit Agreement. As of March 28, 2011, all of the remaining Term Loan was outstanding, none of the Revolving Loan or Factoring Facility was outstanding, and \$75,905 of the Letters of Credit Facility was outstanding. Available borrowing capacity under the Revolving Loan and Factoring Facility was \$87,500 and \$65,000, respectively, at March 28, 2011.

On April 9, 2010, the Company entered into an interest rate swap arrangement with an initial notional amount of \$146,500 for the period beginning April 18, 2011 and ending on April 16, 2013. See Note 11.

Other Letters of Credit

In addition to the letters of credit obtained by the PCB Subsidiaries pursuant to the Credit Agreement, the Company maintains several unused letters of credit: a \$1,994 standby letter of credit expiring December 31, 2011 associated with its insured workers compensation program; a \$1,000 standby letter of credit expiring February 29, 2012 related to the lease of one of its production facilities; and various other letters of credit aggregating to approximately \$692 related to purchases of machinery and equipment with various expiration dates through June 2011.

(7) Convertible Senior Notes

In 2008, the Company issued 3.25% Convertible Senior Notes (Convertible Notes) due May 15, 2015, in a public offering for an aggregate principal amount of \$175,000. The Convertible Notes bear interest at a rate of 3.25% per annum. Interest is payable semiannually in arrears on May 15 and November 15 of each year. The Convertible Notes are senior unsecured obligations and rank equally to the Company's future unsecured senior indebtedness and senior in right of payment to any of the Company's future subordinated indebtedness. The liability and equity components of the Convertible Notes are separately accounted for in a manner that reflects the Company's non-convertible debt borrowing rate when interest costs are recognized.

The Company has allocated the Convertible Notes offering costs to the liability and equity components in proportion to the allocation of proceeds and accounted for them as debt issuance costs and equity issuance costs, respectively. At March 28, 2011 and December 31, 2010, the following summarizes the liability and equity components of the Convertible Notes:

	<u>March 28, 2011</u>	<u>December 31, 2010</u>
	(In thousands)	
Liability components:		
Convertible Notes	\$ 175,000	\$ 175,000
Less: Convertible Notes unamortized discount	<u>(28,295)</u>	<u>(29,717)</u>
Convertible Notes, net of discount	<u>\$ 146,705</u>	<u>\$ 145,283</u>
Equity components:		
Additional paid-in capital:		
Embedded conversion option — Convertible Notes	\$ 43,000	\$ 43,000
Embedded conversion option — Convertible Notes issuance costs	<u>(1,413)</u>	<u>(1,413)</u>
	<u>\$ 41,587</u>	<u>\$ 41,587</u>

At March 28, 2011 and December 31, 2010 remaining unamortized debt issuance costs included in other non-current assets were \$2,855 and \$2,998, respectively. The debt issuance costs and debt discount are being amortized to interest expense over the term of the Convertible Notes using the effective interest rate method. At March 28, 2011, the remaining amortization period for the unamortized Convertible Note discount and debt issuance costs was 4.1 years.

The components of interest expense resulting from the Convertible Notes for the quarters ended March 28, 2011 and March 29, 2010 are as follows:

	<u>For the Quarter Ended</u>	
	<u>March 28, 2011</u>	<u>March 29, 2010</u>
	(In thousands)	
Contractual coupon interest	\$ 1,422	\$ 1,422
Amortization of Convertible Notes debt discount	1,422	1,309
Amortization of debt issuance costs	<u>143</u>	<u>131</u>
	<u>\$ 2,987</u>	<u>\$ 2,862</u>

Table of Contents

For the quarters ended March 28, 2011 and March 29, 2010, the amortization of the Convertible Notes debt discount and debt issuance costs is based on an effective interest rate of 8.37%.

Conversion

At any time prior to November 15, 2014, holders may convert their Convertible Notes into cash and, if applicable, into shares of the Company's common stock based on a conversion rate of 62.6449 shares of the Company's common stock per \$1 principal amount of Convertible Notes, subject to adjustment, under the following circumstances: (1) during any calendar quarter beginning after June 30, 2008 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days during the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day of such preceding calendar quarter; (2) during the five business day period after any 10 consecutive trading day period in which the trading price per note for each day of that 10 consecutive trading day period was less than 98% of the product of the last reported sale price of the Company's common stock and the conversion rate on such day; or (3) upon the occurrence of specified corporate transactions described in the prospectus supplement. As of March 28, 2011, none of the conversion criteria had been met.

On or after November 15, 2014 until the close of business on the third scheduled trading day preceding the maturity date, holders may convert their notes at any time, regardless of the foregoing circumstances. Upon conversion, for each \$1 principal amount of notes, the Company will pay cash for the lesser of the conversion value or \$1 and shares of our common stock, if any, based on a daily conversion value calculated on a proportionate basis for each day of the 60 trading day observation period. Additionally, in the event of a fundamental change as defined in the prospectus supplement, or other conversion rate adjustments such as share splits or combinations, other distributions of shares, cash or other assets to stockholders, including self-tender transactions (Other Conversion Rate Adjustments), the conversion rate may be modified to adjust the number of shares per \$1 principal amount of the notes. As of March 28, 2011, none of the criteria for a fundamental change or a conversion rate adjustment had been met.

The maximum number of shares issuable upon conversion, including the effect of a fundamental change and subject to Other Conversion Rate Adjustments, would be 13,978.

Note Repurchase

The Company is not permitted to redeem the Convertible Notes at any time prior to maturity. In the event of a fundamental change or certain default events, as defined in the prospectus supplement, holders may require the Company to repurchase for cash all or a portion of their Convertible Notes at a price equal to 100% of the principal amount, plus any accrued and unpaid interest.

Convertible Note Hedge and Warrant Transaction

In connection with the issuance of the Convertible Notes, the Company entered into a convertible note hedge and warrant transaction (Call Spread Transaction), with respect to the Company's common stock. The convertible note hedge, which cost an aggregate of \$38,257 and was recorded, net of tax, as a reduction of additional paid-in capital, consists of the Company's option to purchase up to 10,963 shares of common stock at a price of \$15.96 per share. This option expires on May 15, 2015 and can only be executed upon the conversion of the above mentioned Convertible Notes. Additionally, the Company sold warrants to purchase 10,963 shares of its common stock at a price of \$18.15 per share. The warrants expire ratably beginning August 2015 through February 2016. Proceeds from the sale of warrants of \$26,197 were recorded as an addition to additional paid-in capital. The Call Spread Transaction has no effect on the terms of the Convertible Notes and reduces potential dilution by effectively increasing the conversion price of the Convertible Notes to \$18.15 per share of the Company's common stock.

[Table of Contents](#)

(8) Comprehensive Income

The following table summarizes the components of comprehensive income for the quarters ended March 28, 2011 and March 29, 2010:

	Quarter Ended	
	March 28, 2011	March 29, 2010
	(In thousands)	
Net income	\$ 29,088	\$ 4,485
Other comprehensive income:		
Foreign currency translation adjustments, net of tax expense of \$64 for the quarter ended March 28, 2011	2,813	—
Net unrealized gains on effective cash flow hedges, net of tax benefit of \$38 for the quarter ended March 28, 2011	617	—
Total other comprehensive income, net of tax	3,430	—
Comprehensive income	32,518	4,485
Comprehensive income attributable to noncontrolling interests	(2,308)	—
Comprehensive income attributable to TTM Technologies, Inc. stockholders	<u>\$ 30,210</u>	<u>\$ 4,485</u>

The following provides a summary of the activity associated with the designated cash flow hedges reflected in accumulated other comprehensive income for the quarter ended March 28, 2011:

	March 28, 2011 (in thousands)
Beginning balance, net of tax	\$ (3,121)
Changes in fair value gain, net of tax	617
Reclassification to earnings, net of tax	—
Ending balance, net of tax	<u>\$ (2,504)</u>

The amounts recorded in accumulated other comprehensive income for the cash flow hedge related to the interest rate swap are reclassified into interest expense during the operative period of the swap, beginning April 18, 2011 and ending on April 16, 2013, and in the same period in which the related interest on the floating-rate debt obligation affects earnings. The Company expects that approximately \$2,075 will be reclassified into the statement of operations, net of tax, in the next 12 months.

(9) Impairment of Long-lived Assets and Goodwill

The Company reduced the carrying value of the Dallas, Oregon facility, which was classified as an asset held for sale, to record the estimated fair value less costs to sell, resulting in an impairment of \$500 for the quarter ended March 29, 2010 due to a depressed real estate market in the surrounding Dallas, Oregon region. The Company sold the Dallas, Oregon facility in July 2010.

(10) Income Taxes

The Company's effective tax rate was 27.9% and 36.6% for the quarters ended March 28, 2011 and March 29, 2010, respectively. The Company's effective tax rate decreased primarily due to the impact of an increase in total earnings earned in lower-tax jurisdictions resulting from the acquisition of the PCB Subsidiaries. The Company's effective tax rate will generally differ from the U.S. federal statutory rate of 35% due to favorable tax rates associated with certain earnings from the Company's operations in lower-tax jurisdictions in China. Certain foreign losses generated are not more than likely to be realizable, and thus, no income tax benefit has been recognized on these losses. The Company's foreign earnings attributable to the Asia Pacific operating segment will be permanently reinvested in such foreign jurisdictions and, therefore, no deferred tax liabilities for U.S. income taxes on undistributed earnings are recorded.

(11) Financial Instruments

Derivatives

Interest Rate Swaps

The Company's business is exposed to interest rate risk resulting from fluctuations in interest rates on certain variable rate LIBOR debt. Increases in interest rates would increase interest expenses relating to the outstanding variable rate borrowings of certain foreign subsidiaries and increase the cost of debt. Fluctuations in interest rates can also lead to significant fluctuations in the fair value of the debt obligations.

On April 9, 2010, the Company entered into a two-year pay-fixed, receive floating (1-month LIBOR), amortizing interest rate swap arrangement with an initial notional amount of \$146,500, for the period beginning April 18, 2011 and ending on April 16, 2013. The interest rate swap will apply a fixed interest rate against the first interest payments of a portion of the \$350,000 Term Loan over the term of the interest rate swap. As part of the Company's risk management strategy, the Company chose not to hedge its initial year interest payment cash flows of its Term Loan because of low LIBOR rates at inception which would have initially resulted in locking in a fixed rate higher than LIBOR spot rate at the onset.

The notional amount of the interest rate swap decreases to zero over its term, consistent with the Company's risk management objectives. The notional value underlying the hedge at March 28, 2011 was \$146,500. Under the terms of the interest rate swap, the Company will pay a fixed rate of 2.50% and will receive floating 1-month LIBOR during the swap period. The Company has designated this interest rate swap as a cash flow hedge.

At inception, the fair value of the interest rate swap was zero. As of March 28, 2011 and December 31, 2010, the fair value of the swap was recorded as a liability of \$3,657 and \$3,421, respectively, in other long-term liabilities. The change in the fair value of the interest rate swap is recorded as a component of accumulated other comprehensive income, net of tax, in the Company's consolidated condensed balance sheet. No ineffectiveness was recognized for the quarter ended March 28, 2011 as the interest rate swap does not hedge interest rate cash flows until the period beginning April 18, 2011.

Additionally, the Company, through its acquisition of the PCB Subsidiaries, assumed a long term pay-fixed, receive floating (1-month LIBOR), amortizing interest rate swap arrangement with an initial notional amount of \$40,000, for the period beginning October 8, 2008 and ending on July 30, 2012. This interest rate swap applied to the PCB Subsidiaries' pre-acquisition, long-term borrowings, which were paid-off on the acquisition date. The notional amount of the interest rate swap decreases to zero over its term. Under the terms of the interest rate swap, the Company will pay a fixed rate of 3.43% and will receive floating 1-month LIBOR during the swap period. As the borrowings attributable to this interest rate swap were paid off upon acquisition, the Company did not designate this interest rate swap as a cash flow hedge. As of March 28, 2011 and December 31, 2010, the fair value of the swap was recorded as a liability of \$1,037 and \$1,206, respectively, in other long-term liabilities. The change in the fair value of this interest rate swap is recorded as Other, net in the consolidated condensed statement of operations.

Foreign Exchange Contracts

The Company enters into foreign currency forward contracts to mitigate the impact of changes in foreign currency exchange rates and to reduce the volatility of purchases and other obligations generated in currencies other than the functional currencies. Our foreign subsidiaries may at times purchase forward exchange contracts to manage their foreign currency risks in relation to particular purchases or obligations, such as the related party financing obligation arising from the put call option to purchase the remaining 20% of a majority owned subsidiary in 2013 and certain purchases of machinery denominated in foreign currencies other than the Company's foreign functional currency. The notional amount of the foreign exchange contracts at March 28, 2011 and December 31, 2010 was approximately \$62,833 and \$36,266, respectively. The Company has designated certain of these foreign exchange contracts as cash flow hedges, with the exception of the foreign exchange contracts in relation to the related party financing obligation. In this instance, the hedged item is a recognized liability subject to foreign currency transaction gains and losses and, therefore, changes in the hedged item due to foreign currency exchange rates are recorded in earnings. Therefore, hedge accounting has not been applied.

[Table of Contents](#)

The fair values of derivative instruments in the consolidated condensed balance sheet are as follows:

	Balance Sheet Location	Asset / (Liability) Fair Value	
		March 28, 2011	December 31, 2010
(In thousands)			
Cash flow derivative instruments designated as hedges:			
Foreign exchange contracts	Prepaid expenses and other current assets	\$ 5	\$ —
Foreign exchange contracts	Deposits and other non-current assets	566	9
Foreign exchange contracts	Other accrued expenses	(2)	(1)
Foreign exchange contracts	Other long-term liabilities	(18)	(272)
Interest rate swap	Other long-term liabilities	(3,657)	(3,421)
Cash flow derivative instruments not designated as hedges:			
Foreign exchange contracts	Prepaid expenses and other current assets	252	482
Foreign exchange contracts	Other accrued expenses	—	(4)
Foreign exchange contracts	Deposits and other non-current assets	1,575	728
Interest rate swap	Other long-term liabilities	(1,037)	(1,206)
		<u>\$ (2,316)</u>	<u>\$ (3,685)</u>

The following tables provide information about the amounts recorded in accumulated other comprehensive income related to derivatives designated as cash flow hedges, as well as the amounts recorded in each caption in the consolidated condensed statement of operations when derivative amounts are reclassified out of accumulated other comprehensive income:

	Financial Statement Caption	For the Quarter Ended March 28, 2011		
		Effective Portion		Ineffective Portion
		Gain/(Loss) Recognized in Other Comprehensive Income	Gain/(Loss) Reclassified into Income	Gain/(Loss) Recognized into Income
(In thousands)				
Cash flow hedge:				
Interest rate swap	Interest expense	\$ (235)	\$ —	\$ —
Foreign currency forward	Other, net	814	—	—
		<u>\$ 579</u>	<u>\$ —</u>	<u>\$ —</u>

The gain recognized in other, net in the consolidated condensed statement of operations on derivative instruments not designated as hedges is as follows:

	Quarter Ended March 28, 2011
	(In thousands)
Derivative instruments not designated as hedges:	
Interest rate swap	\$ 166
Foreign exchange contracts	921
	<u>\$ 1,087</u>

[Table of Contents](#)

Other Financial Instruments

The carrying amount and estimated fair value of the Company's financial instruments at March 28, 2011 and December 31, 2010 were as follows:

	March 28, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In thousands)			
Short-term derivative assets	\$ 257	\$ 257	\$ 482	\$ 482
Short-term derivative liabilities	2	2	5	5
Noncurrent derivative assets	2,141	2,141	737	737
Long-term derivative liabilities	4,711	4,711	4,899	4,899
Long-term equity investment	2,706	2,273	2,714	2,280
Related party financing obligation	21,829	22,412	20,399	20,791
Long-term debt	348,076	346,701	380,118	370,812
Convertible senior notes	146,705	234,570	145,283	207,508

The fair value of the derivative instruments was determined using pricing models developed based on the LIBOR swap rate, foreign currency exchange rates, and other observable market data, including quoted market prices, as appropriate. The values were adjusted to reflect nonperformance risk of both the counterparty and the Company.

The fair value of equity securities accounted for under the cost method (nonmarketable equity securities) was determined using market multiples derived from comparable companies. Under that approach, the identification of comparable companies requires significant judgment. Additionally, multiples might lie in ranges with a different multiple for each comparable company. The selection of where the appropriate multiple falls within that range also requires significant judgment, considering both qualitative and quantitative factors.

The related party financing obligation fair value was estimated based on the minimum price of the obligation plus 2.5% interest discounted at the liability's discount rate based on the Company's adjusted cost of borrowing.

The fair value of the long-term debt was estimated based on discounting the par value of the debt over its life for the difference between the debt stated interest rate and current market rates for similar debt at March 28, 2011 and December 31, 2010.

The fair value of the convertible senior notes was estimated based on quoted market prices.

At March 28, 2011 and December 31, 2010, the Company's financial instruments included cash and cash equivalents, accounts receivable, notes receivable, accounts payable and equipment payables. Due to short-term maturities, the carrying amount of these instruments approximates fair value.

(12) Significant Customers and Concentration of Credit Risk

The Company's customers include both OEMs and EMS companies. The Company's OEM customers often direct a significant portion of their purchases through EMS companies. While the Company's customers include both OEM and EMS providers, the Company measures customer concentration based on OEM companies, as they are the ultimate end customers.

For the quarter ended March 28, 2011 one customer accounted for approximately 13% of the Company's net sales. For the quarter ended March 29, 2010, no one customer accounted for 10% or greater of the Company's net sales. The loss of one or more major customers or a decline in sales to the Company's major customers would have a material adverse effect on the Company's financial condition and results of operation.

The Company also extends credit to its customers, which are concentrated primarily in the computer and networking and communication and aerospace/defense industries, and most of which are located outside the United States. The Company performs ongoing credit evaluations of customers, does not require collateral and considers the credit risk profile of the entity from which the receivable is due in further evaluating collection risk.

[Table of Contents](#)

As of March 28, 2011 and December 31, 2010, the Company's 10 largest customers in the aggregate accounted for 50% and 53%, respectively, of total accounts receivable. If one or more of the Company's significant customers were to become insolvent or were otherwise unable to pay for the manufacturing services provided, it would have a material adverse effect on the Company's financial condition and results of operations.

(13) Fair Value Measures

The Company measures at fair value its financial and non-financial assets by using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, essentially an exit price, based on the highest and best use of the asset or liability.

At March 28, 2011 and December 31, 2010, the following financial assets and liabilities were measured at fair value on a recurring basis using the type of inputs shown:

	<u>March 28, 2011</u>	<u>Fair Value Measurements Using:</u>		
		<u>Level 1 Inputs</u>	<u>Level 2 Inputs</u>	<u>Level 3 Inputs</u>
		<u>(In thousands)</u>		
Money market funds	\$ 85,611	\$ 85,611	—	—
Foreign exchange derivative assets	2,398	—	\$ 2,398	—
Interest rate swap derivative liabilities	4,694	—	4,694	—
Foreign exchange derivative liabilities	20	—	20	—

	<u>December 31, 2010</u>	<u>Fair Value Measurements Using:</u>		
		<u>Level 1 Inputs</u>	<u>Level 2 Inputs</u>	<u>Level 3 Inputs</u>
		<u>(In thousands)</u>		
Money market funds	\$ 66,742	\$ 66,742	—	—
Foreign exchange derivative assets	1,219	—	\$ 1,219	—
Interest rate swap derivative liabilities	4,627	—	4,627	—
Foreign exchange derivative liabilities	277	—	277	—

There were no transfers of financial assets or liabilities between Level 1 and Level 2 inputs for the quarter ended March 28, 2011.

The following is a summary of activity for fair value measurements using Level 3 inputs for the quarter ended March 29, 2010:

	<u>For the Quarter Ended March 29, 2010 (In thousands)</u>
Fair Value Measurement using Significant Unobservable Inputs (Level 3)	
Beginning balance	\$ 1,351
Transfers to level 3	—
Settlement	(1,351)
Changes in fair value included in earnings	—
Ending balance	<u>\$ —</u>

There was no activity for fair value measurement using Level 3 inputs for the quarter ended March 28, 2011.

The changes in fair value included in earnings for the quarter ended March 29, 2010 have been included in other, net in the consolidated condensed statement of operations.

The majority of the Company's non-financial instruments, which include goodwill, intangible assets, inventories, and property, plant and equipment, are not required to be carried at fair value on a recurring basis. However, if certain triggering events occur (or tested at least annually for goodwill) such that a non-financial instrument is required to be evaluated for impairment, based upon a comparison of the non-financial instrument's fair value to its carrying value, an impairment is recorded to reduce the carrying value to the fair value, if the carrying value exceeds the fair value.

[Table of Contents](#)

For the quarter ended March 29, 2010, the following non-financial instruments were measured at fair value on a nonrecurring basis using the type of inputs shown:

	Fair Value Measurements Using:				Total Losses for the Quarter Ended March 29, 2010
	March 29, 2010	Level 1 Inputs	Level 2 Inputs (In thousands)	Level 3 Inputs	
Asset held for sale	\$ 500	—	\$ 500	—	\$ 500

The fair values of long-lived assets held and used and the asset held for sale were primarily determined using appraisals and comparable prices of similar assets, which are considered to be Level 2 inputs.

(14) Commitments and Contingencies

Legal Matters

The Company is subject to various legal matters, which it considers normal for its business activities. While the Company currently believes that the amount of any ultimate potential loss for known matters would not be material to the Company's financial condition, the outcome of these actions is inherently difficult to predict. In the event of an adverse outcome, the ultimate potential loss could have a material adverse effect on the Company's financial condition or results of operations in a particular period. The Company has accrued amounts for its loss contingencies which are probable and estimable at March 28, 2011 and December 31, 2010. However, these amounts are not material to the consolidated condensed financial statements.

Environmental Matters

The process to manufacture PCBs requires adherence to city, county, state, federal and foreign jurisdiction environmental regulations regarding the storage, use, handling and disposal of chemicals, solid wastes and other hazardous materials as well as air quality standards. Management believes that its facilities comply in all material respects with environmental laws and regulations. The Company has in the past received certain notices of violations and has implemented certain required minor corrective activities. There can be no assurance that violations will not occur in the future.

The Company is involved in various stages of investigation and cleanup in Connecticut related to environmental remediation matters for two sites and has investigated a third site. The ultimate cost of site cleanup is difficult to predict given the uncertainties regarding the extent of the required cleanup, the interpretation of applicable laws and regulations, and alternative cleanup methods. The third Connecticut site was investigated under Connecticut's Land Transfer Act and no contamination above applicable standards was found. The Company concluded that it was probable that it would incur remediation and monitoring costs for these sites of approximately \$389 and \$558 as of March 28, 2011 and December 31, 2010, respectively, the liability for which is included in other long-term liabilities. The Company estimates that it will incur the remediation costs over the next 12 to 84 months. This accrual was discounted at 8% per annum to determine the Company's best estimate of the liability, which the Company estimated as ranging from \$839 to \$1,274 on an undiscounted basis.

The liabilities recorded do not take into account any claims for recoveries from insurance or third parties and none are anticipated. These costs are mostly comprised of estimated consulting costs to evaluate potential remediation requirements, completion of the remediation, and monitoring of results achieved. Subject to the imprecision in estimating future environmental remediation costs, the Company does not expect the outcome of the environmental remediation matters, either individually or in the aggregate, to have a material adverse effect on its financial position, results of operations, or cash flows.

(15) Earnings Per Share

The following is a reconciliation of the numerator and denominator used to calculate basic earnings per share and diluted earnings per share for the quarters ended March 28, 2011 and March 29, 2010:

	Quarter Ended	
	March 28, 2011	March 29, 2010
	(In thousands, except per share amounts)	
Net income attributable to TTM Technologies, Inc. stockholders	\$ 27,123	\$ 4,485
Weighted average shares outstanding	80,696	43,310
Dilutive effect of performance-based stock units, restricted stock units and stock options	1,090	669
Dilutive effect of assumed conversion of convertible notes outstanding	518	—
Diluted shares	<u>82,304</u>	<u>43,979</u>
Earnings per share attributable to TTM Technologies, Inc. stockholders:		
Basic	<u>\$ 0.34</u>	<u>\$ 0.10</u>
Diluted	<u>\$ 0.33</u>	<u>\$ 0.10</u>

For the quarters ended March 28, 2011 and March 29, 2010, performance-based stock units, restricted stock units and stock options to purchase 648 and 2,326 shares of common stock, respectively, were not considered in calculating diluted earnings per share because the options' exercise prices or the total expected proceeds under the treasury stock method for performance-based stock units, restricted stock units or stock options was greater than the average market price of common shares during the period and, therefore, the effect would be anti-dilutive.

(16) Stock-Based Compensation

Stock-based compensation expense is recognized in the accompanying consolidated condensed statements of operations as follows:

	Quarter Ended	
	March 28, 2011	March 29, 2010
	(In thousands)	
Cost of goods sold	\$ 216	\$ 328
Selling and marketing	111	108
General and administrative	<u>1,427</u>	<u>976</u>
Stock-based compensation expense recognized	1,754	1,412
Income tax benefit recognized	<u>(534)</u>	<u>(478)</u>
Total stock-based compensation expense after income taxes	<u>\$ 1,220</u>	<u>\$ 934</u>

Performance-based Restricted Stock Units

In 2010 the Company implemented a long-term incentive program for executives that provides for the issuance of performance-based restricted stock units (PRUs), representing hypothetical shares of the Company's common stock that may be issued. Under the PRU program, a target number of PRUs is awarded at the beginning of each three-year performance period. The number of shares of common stock released at the end of the performance period will range from zero to 2.4 times the target number depending on performance during the period. The performance metrics of the PRU program are based on (a) annual financial targets, which for the first one-third of the grant are based on revenue and EBITDA (earnings before interest, tax, depreciation, and amortization expense), each equally weighted, and (b) an overall modifier based on the Company's total stockholder return (TSR) relative to the S&P SmallCap 600 over the three-year performance period.

Table of Contents

The Company records stock-based compensation expense for PRU awards granted based on management's periodic assessment of the probability of the PRU awards vesting. For the quarter ended March 28, 2011, management determined that vesting of the PRU awards was probable. PRUs activity for the quarter ended March 28, 2011 was as follows:

	<u>Shares</u> <u>(In thousands)</u>
Outstanding target shares at December 31, 2010	55
Granted:	
Second tranche of 2010 grant	45
First tranche of 2011 grant	63
Outstanding target shares at March 28, 2011	<u>163</u>

The fair value for PRUs granted is calculated using the Monte Carlo simulation model, as the TSR modifier contains a market condition. For the quarters ended March 28, 2011 and March 29, 2010, the following assumptions were used in determining the fair value:

	<u>March 28,</u> <u>2011</u>	<u>March 29,</u> <u>2010</u>
Weighted-average fair value	\$ 22.74	\$ 10.11
Risk-free interest rate	1.0%	1.3%
Dividend yield	—	—
Expected volatility	59%	65%
Expected term in months	33	33

- (1) Reflects the weighted-averages for the second year of the three-year performance period applicable to PRUs granted in 2010 and for the first year of the three-year performance period applicable to PRUs granted in 2011
- (2) Reflects the first year of the three-year performance period applicable to PRUs granted in 2010.

Restricted Stock Units

The Company granted 335 and 377 restricted stock units during the quarters ended March 28, 2011 and March 29, 2010, respectively. The units granted have a weighted-average fair value per unit of \$17.30 for the quarter ended March 28, 2011 and \$9.14 for the quarter ended March 29, 2010. The fair value for restricted stock units granted is based on the closing share price of the Company's common stock on the date of grant.

Stock Options

The Company did not grant any stock option awards during the quarters ended March 28, 2011 and March 29, 2010.

Foreign Employee Share Awards

Prior to the acquisition of the PCB Subsidiaries by the Company, there existed an employee share award scheme originally set up by the controlling shareholder of the PCB Subsidiaries to incentivize and reward the PCB Subsidiaries' employees. In 2008, administration of this scheme was transferred to a small group of employees in order to carry on the objectives of the program. After the close of the acquisition, the unvested Meadville Holdings shares remaining for vesting and/or granting purposes under that scheme were exchanged for the right to earn fractional shares of TTM common stock plus cash equal to the dividend distributed by Meadville Holdings to the holders of Meadville Holdings shares after the acquisition. These remaining grants vest over five tranches. Two tranches vested in the first quarter of 2011 and the remaining three tranches will vest annually thereafter, through 2014. As per ASC Topic 805, *Business Combinations*, the fair value of the common stock plus cash consideration to be received by the employee, after adjustment for estimated forfeitures, that is attributed to pre-combination service is recognized as purchase consideration. The fair value, after adjustment for estimated forfeitures, that is attributed to post-combination service is recognized as an expense over the remaining vesting period and is included as a component of total stock-based compensation expense. At March 28, 2011 and December 31, 2010, there were approximately 50 and 193 shares in the employee share award grants, respectively.

[Table of Contents](#)

The following is a summary of total unrecognized compensation costs as of March 28, 2011:

	Unrecognized Stock-Based Compensation Cost (In thousands)	Remaining Weighted Average Recognition Period (In years)
PRU awards	\$ 2,751	2.3
RSU awards	10,172	1.7
Stock option awards	722	1.8
Foreign employee share awards	474	1.8
	<u>\$ 14,119</u>	

(17) Segment Information

The operating segments reported below are the Company's segments for which separate financial information is available and upon which operating results are evaluated by the chief operating decision maker to assess performance and to allocate resources. The Company manages its worldwide operations based on two geographic operating segments: 1) North America, which consists of seven domestic PCB fabrication plants, including a facility that provides follow-on value-added services primarily for one of the PCB fabrication plants, and one backplane assembly plant in Shanghai, China, which is managed in conjunction with the Company's U.S. operations and its related European sales support infrastructure; and 2) Asia Pacific, which consists of the PCB Subsidiaries and their seven PCB fabrication plants, which include a substrate facility. Each segment operates predominantly in the same industry with production facilities that produce similar customized products for its customers and use similar means of product distribution in their respective geographic regions.

The Company evaluates segment performance based on operating segment income, which is operating income before amortization of intangibles. Interest expense and interest income are not presented by segment since they are not included in the measure of segment profitability reviewed by the chief operating decision maker. All inter-segment transactions have been eliminated. Reportable segment assets exclude short-term investments, which are managed centrally.

	Quarter Ended	
	March 28, 2011	March 29, 2010
	(In thousands)	
Net Sales:		
North America	\$ 142,250	\$ 138,219
Asia Pacific	202,465	—
Total sales	344,715	138,219
Inter-segment sales	(1,914)	—
Total net sales	<u>\$ 342,801</u>	<u>\$ 138,219</u>
Operating Segment Income:		
North America	\$ 16,765	\$ 10,659
Asia Pacific	33,077	—
Total operating segment income	49,842	10,659
Amortization of definite-lived intangibles	(4,158)	(791)
Total operating income	45,684	9,868
Total other expense	(5,314)	(2,789)
Income before income taxes	<u>\$ 40,370</u>	<u>\$ 7,079</u>

The Company accounts for inter-segment sales and transfers as if the sale or transfer were to third parties: at arms length and in conjunction with the Company's revenue recognition policy. The inter-segment sales for the quarter ended March 28, 2011 are sales from the Asia Pacific operating segment to the North America operating segment.

(18) Related Party Transactions

Long-term Equity Investment

The Company, through its acquisition of the PCB Subsidiaries, acquired a 10% equity interest in a private company, Aspocomp Oulu Oy (Oulu), which is located in Finland. The majority owner of this private company is Aspocomp Group Oyj (Aspocomp), a Helsinki Stock Exchange traded Finnish company, which is therefore a related party. Aspocomp is also the 20% minority shareholder in Meadville Aspocomp (BVI) Holdings Limited, a majority-owned subsidiary of the Company. The Company consolidates the financial results of this majority-owned company.

The Company accounts for this 10% nonmarketable investment in Oulu using the cost method of accounting. Under the cost method of accounting, the investment is measured at cost subsequent to initial measurement, which for the Company was April 8, 2010, the acquisition date of the PCB Subsidiaries. The fair value assigned to this investment at the acquisition date was \$2,718, which was based on a market approach to estimate the enterprise value and recorded as a component of non-current assets.

The equity investment is tested for impairment if there are impairment triggers. There was no impairment of the equity investment for the quarter ended March 28, 2011.

Long-term Related Party Financing Obligation

The related party financing obligation consists of a put and call option agreement which grants the noncontrolling interest a put option to sell, and to one of the PCB Subsidiaries a call option to purchase, the remaining 20% equity interest in one of its majority owned subsidiaries. The exercise price of the put option is the greater of (i) an enterprise value calculation, which uses earnings before interest and taxes, depreciation and amortization projections on the extrapolation of the latest unaudited combined financial results of the majority owned subsidiary to a four-year period and an enterprise value multiplier of 5.5 times, or (ii) the net asset value based on the extrapolation of the latest unaudited combined financial results of the majority owned subsidiary as at end of the fiscal year 2012; or (iii) the minimum price of approximately 15,384 EUR plus interest which will accrue at a rate of 2.5% compounded annually until the option is exercised. Fair value as of the acquisition date of the financial liability was based upon the minimum price as the other two scenarios were determined to be nonsubstantive due to the challenging current and expected future operations of the subsidiary. As the minimum price represents a fixed obligation, the noncontrolling interest was accounted for as a financing obligation rather than a noncontrolling interest and 100% of the subsidiary is consolidated. The fair value of the related party financial liability was estimated based on the minimum price of the obligation plus 2.5% interest discounted at the liability's discount rate based on the Company's adjusted cost of borrowing as of the acquisition date.

Supply and Lease Arrangements

The Company's foreign subsidiaries enter into long-term supply arrangements to purchase laminate and prepreg from a related party in which a significant shareholder of the Company holds an approximate 17% shareholding. These supply arrangements expire on December 31, 2012. The Company's foreign subsidiaries also purchased laminate and prepreg from the laminate companies of the said significant shareholder of the Company. For the quarter ended March 28, 2011, the Company purchased \$24,133 of laminate and prepreg from these related parties. There were no such related party purchases for the quarter ended March 29, 2010.

Additionally, a foreign subsidiary of the Company also leases warehouse space from a related party controlled by a significant shareholder of the Company. Likewise, a related party leases employee housing space from a foreign subsidiary of the Company. For the quarter ended March 28, 2011, the net income for these activities was \$64. There was no such related party activity for the quarter ended March 29, 2010.

At March 28, 2011 and December 31, 2010, the Company's consolidated condensed balance sheet included \$42,238 and \$50,374, respectively, in accounts payable due to and \$113 and \$86, respectively, in accounts receivable due from a related party for the supply and lease arrangements.

(19) Subsequent Event

On May 4, 2011, the Company announced that it had entered into a letter of intent to acquire the remaining 20 percent interest in Meadville Aspocomp (BVI) Holdings Ltd. from Aspocomp, which is accounted for as a related party financing obligation (Note 18), for EUR 14,500 or approximately \$21,100. Additionally, under this letter of intent, the Company has also agreed to exchange its 10 percent stake in Oulu for approximately 12,300 shares of Aspocomp. Both the proposed transactions are subject to the signing and completion of definitive agreements.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with our consolidated condensed financial statements and the related notes and the other financial information included in this Quarterly Report on Form 10-Q. This discussion and analysis contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of specified factors, including those set forth in Item 1A “Risk Factors” of Part II below and elsewhere in this Quarterly Report on Form 10-Q.

This discussion and analysis should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” set forth in our annual report on Form 10-K for the year ended December 31, 2010, filed with the Securities and Exchange Commission.

OVERVIEW

We are a leading global provider of time-critical and technologically complex printed circuit board (PCB) products and backplane assemblies (PCBs populated with electronic components), which serve as the foundation of sophisticated electronic products. We provide our customers advanced technology products and offer a one-stop manufacturing solution to customers from engineering support to prototype development through final volume production. We serve a diversified customer base in various markets throughout the world, including manufacturers of networking/communications infrastructure products, personal computers, touch screen tablets and mobile media devices (cellular phones and smart phones). We also serve high-end computing, commercial aerospace/defense, and industrial/medical industries. Our customers include both original equipment manufacturers (OEMs) and electronic manufacturing services (EMS) providers.

In April 2010, we acquired from Meadville all of the issued and outstanding capital stock of four of its subsidiaries. These four companies and their respective subsidiaries, collectively referred to as the PCB Subsidiaries, comprised Meadville’s PCB manufacturing and distributing business. See Note 2 in our consolidated condensed financial statements.

While our customers include both OEM and EMS providers, we measure customers based on OEM companies as they are the ultimate end customers. We measure customers as those companies that have placed orders of \$2,000 or more in the preceding 12-month period. As of March 28, 2011, we had approximately 1,175 customers and as of March 29, 2010 we had approximately 820 customers. Sales to our 10 largest customers accounted for 46% and 52% of our net sales in the first quarter ended March 28, 2011 and March 29, 2010, respectively. We sell to OEMs both directly and indirectly through EMS companies.

The following table shows the percentage of our net sales attributable to each of the principal end markets we served for the periods indicated.

End Markets(1)	Quarter Ended	
	March 28, 2011	March 29, 2010
Aerospace/Defense	16%	42%
Cellular Phone	9	—
Computing/Storage/Peripherals	27	12
Medical/Industrial/Instrumentation/Other	8	11
Networking/Communications	34	33
Other	6	2
Total	100%	100%

(1) Sales to EMS companies are classified by the end markets of their OEM customers.

For PCBs, we measure the time sensitivity of our products by tracking the quick-turn percentage of our work. We define quick-turn orders as those with delivery times of 10 days or less, which typically captures research and development, prototype, and new product introduction work, in addition to unexpected short-term demand among our customers. Generally, we quote prices after we receive the design specifications and the time and volume requirements from our customers. Our quick-turn services command a premium price as compared to standard lead-time products.

[Table of Contents](#)

We also deliver a significant percentage of compressed lead-time work with lead times of 11 to 20 days. We typically receive a premium price for this work as well. Purchase orders may be cancelled prior to shipment. We charge customers a fee, based on percentage completed, if an order is cancelled once it has entered production. We derive revenues primarily from the sale of PCBs and backplane assemblies using customer-supplied engineering and design plans. We recognize revenues when persuasive evidence of a sales arrangement exists, the sales terms are fixed or determinable, title and risk of loss have transferred, and collectibility is reasonably assured — generally when products are shipped to the customer. Net sales consist of gross sales less an allowance for returns, which typically has been less than 2% of gross sales. We provide our customers a limited right of return for defective PCBs and backplane assemblies. We record an estimated amount for sales returns and allowances at the time of sale based on historical information.

Cost of goods sold consists of materials, labor, outside services, and overhead expenses incurred in the manufacture and testing of our products as well as stock-based compensation expense. Many factors affect our gross margin, including capacity utilization, product mix, production volume, and yield. We generally do not participate in any significant long-term contracts with suppliers, with the exception of the supply arrangement to purchase laminate and prepregs from a related party controlled by a significant shareholder, and we believe there are a number of potential suppliers for the raw materials we use.

Selling and marketing expenses consist primarily of salaries and commissions paid to our internal sales force and independent sales representatives, salaries paid to our sales support staff, stock-based compensation expense as well as costs associated with marketing materials and trade shows. We generally pay higher commissions to our independent sales representatives for quick-turn work, which generally has a higher gross profit component than standard lead-time work.

General and administrative costs primarily include the salaries for executive, finance, accounting, information technology, facilities and human resources personnel, as well as insurance expenses, expenses for accounting and legal assistance, incentive compensation expense, stock-based compensation expense, bad debt expense, gains or losses on the sale or disposal of property, plant and equipment, and acquisition related expenses.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our consolidated condensed financial statements included in this report have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, net sales and expenses, and related disclosure of contingent assets and liabilities.

A critical accounting policy is defined as one that is both material to the presentation of our consolidated condensed financial statements and requires management to make judgments that could have a material effect on our financial condition or results of operations. These policies require us to make assumptions about matters that are highly uncertain at the time of the estimate. Different estimates we could reasonably have used, or changes in the estimates that are reasonably likely to occur, could have a material effect on our financial condition or results of operations.

Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Management has discussed the development, selection and disclosure of these estimates with the audit committee of our board of directors. Actual results may differ from these estimates under different assumptions or conditions.

Our critical accounting policies include asset valuation related to bad debts and inventory; sales returns and allowances; impairment of long-lived assets, including goodwill and intangible assets; derivative instruments and hedging activities; realizability of deferred tax assets; establishing the fair value of individual assets acquired, liabilities assumed, and noncontrolling interest when we acquire other businesses; and determining self-insured reserves.

Allowance for Doubtful Accounts

We provide customary credit terms to our customers and generally do not require collateral. We perform ongoing credit evaluations of the financial condition of our customers and maintain an allowance for doubtful accounts based upon historical collections experience and judgments as to expected collectibility of accounts. Our actual bad debts may differ from our estimates.

Inventories

In assessing the realizability of inventories, we are required to make judgments as to future demand requirements and compare these with current and committed inventory levels. When the market value of inventory is less than the carrying value, the inventory cost is written down to the estimated net realizable value thereby establishing a new cost basis. Our inventory requirements may change based on our projected customer demand, market conditions, technological and product life cycle changes, longer or shorter than expected usage periods, and other factors that could affect the valuation of our inventories. We maintain certain finished goods inventories near certain key customer locations in accordance with agreements with those customers. Although this inventory is typically supported by valid purchase orders, should these customers ultimately not purchase these inventories, our results of operations and financial condition could be adversely affected.

Sales Returns and Allowances

We derive revenues primarily from the sale of printed circuit boards and backplane assemblies using customer-supplied engineering and design plans and generally recognize revenue upon delivery. We provide our customers a limited right of return for defective printed circuit boards and backplane assemblies. We accrue an estimated amount for sales returns and allowances at the time of sale using our judgment based on historical information and anticipated returns as a result of current period sales. To the extent actual experience varies from our historical experience, revisions to these allowances may be required.

Long-lived Assets

We have significant long-lived tangible and intangible assets consisting of property, plant and equipment, definite-lived intangibles, and goodwill. We review these assets for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. In addition, we perform an impairment test related to goodwill at least annually. Our goodwill and intangibles are largely attributable to our acquisitions of other businesses. We have two operating segments, North America and Asia Pacific.

During the fourth quarter of each year, and when events and circumstances warrant an evaluation, we perform an impairment assessment of goodwill, which requires the use of a fair value based analysis. We determine the fair value of our reporting units based on discounted cash flows and market approach analyses as considered necessary and consider factors such as a weakened economy, reduced expectations for future cash flows coupled with a decline in the market price of our stock and market capitalization for a sustained period as indicators for potential goodwill impairment. If the reporting unit's carrying amount exceeds its estimated fair value, a second step must be performed to measure the amount of the goodwill impairment loss, if any. The second step compares the implied fair value of the reporting unit's goodwill, determined in the same manner as the amount of goodwill recognized in a business combination, with the carrying amount of such goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess.

We also assess other long-lived assets, specifically definite-lived intangibles and property, plant and equipment, for potential impairment given similar impairment indicators. When indicators of impairment exist related to our long-lived tangible assets and definite-lived intangible assets, we use an estimate of the undiscounted net cash flows in measuring whether the carrying amount of the assets is recoverable. Measurement of the amount of impairment, if any, is based upon the difference between the asset's carrying value and estimated fair value. Fair value is determined through various valuation techniques, including market and income approaches as considered necessary.

If forecasts and assumptions used to support the realizability of our goodwill and other long-lived assets change in the future, significant impairment charges could result that would adversely affect our results of operations and financial condition.

Derivative Instruments and Hedging Activities

As a matter of policy, we use derivatives for risk management purposes, and we do not use derivatives for speculative purposes. Derivatives are typically entered into as hedges of changes in interest rates, currency exchange rates, and other risks.

When we determine to designate a derivative instrument as a cash flow hedge, we formally document the hedging relationship and its risk management objective and strategy for undertaking the hedge, the hedging instrument, the hedged item, the nature of the risk being hedged, how the hedging instrument's effectiveness in offsetting the hedged risk will be assessed, and a description of the

method of measuring ineffectiveness. We also formally assess, both at the hedge's inception and on an ongoing basis, whether the derivative that is used in hedging transactions is highly effective in offsetting changes in cash flows of hedged items.

Derivative financial instruments are recognized as either assets or liabilities on the consolidated condensed balance sheet with measurement at fair value. Fair value of the derivative instruments is determined using pricing models developed based on the underlying swap interest rate, foreign currency exchange rates, and other observable market data as appropriate. The values are also adjusted to reflect nonperformance risk of both the counterparty and the Company. For derivatives that are designated as a cash flow hedge, changes in the fair value of the derivative are recognized in accumulated other comprehensive income, to the extent the derivative is effective at offsetting the changes in cash flow being hedged until the hedged item affects earnings. To the extent there is any hedge ineffectiveness, changes in fair value relating to the ineffective portion are immediately recognized in earnings. Changes in the fair value of derivatives that are not designated as hedges are recorded in earnings each period.

Income Taxes

Deferred income tax assets are reviewed for recoverability, and valuation allowances are provided, when necessary, to reduce deferred income tax assets to the amounts that are more likely than not to be realized based on our estimate of future taxable income. Should our expectations of taxable income change in future periods, it may be necessary to establish a valuation allowance, which could affect our results of operations in the period such a determination is made. We record an income tax provision or benefit during interim periods at a rate that is based on expected results for the full year. If future changes in market conditions cause actual results for the year to be more or less favorable than those expected, adjustments to the effective income tax rate could be required.

In addition, we are subject to income taxes in the United States and foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are many transactions where the ultimate tax determination is uncertain. Additionally, our calculations of income taxes are based on our interpretations of applicable tax laws in the jurisdictions in which we file.

Business Combinations

We allocate the purchase price of acquired companies to the tangible and intangible assets acquired, liabilities assumed and noncontrolling interest, based on their estimated fair values. The excess of the purchase price over these fair values is recorded as goodwill. We engage independent third-party appraisal firms to assist us in determining the fair values of assets acquired, liabilities assumed, and noncontrolling interest. Such valuations require management to make significant estimates and assumptions, especially with respect to intangible assets.

The fair value of the real property was estimated primarily via the cost approach, and where applicable, the sales comparison approach and income approach. The procedures employed included site inspections, analysis of the subject properties, review of the highest and best use of the subject properties, discussions with onsite property management, determinations regarding future use of the facilities, review of real property market data available in the local market, estimation of replacement cost, new and typical expected useful lives, and the calculation of all factors of obsolescence.

For the fair value of the personal property we utilized the cost approach as the primary approach for valuing the majority of the personal property. The market approach was used to estimate the value of certain equipment commonly traded in the second hand marketplace, as well as computers and computer-related assets. The income approach was used to quantify any economic obsolescence that may be present in the subject assets. Our analysis also entailed an estimation of useful lives, which were researched and discussed with property management and market sources. The fair value measurement assumes the highest and best use of personal property assets by market participants.

The significant purchased intangible assets recorded by us include customer relationships, trade name, and order backlog. The fair values assigned to the identified intangible assets are discussed in Note 5 of the notes to the consolidated condensed financial statements.

Critical estimates in valuing certain intangible assets include but are not limited to: future expected cash flows from customer relationships, estimating cash flows from existing backlog, market position of the trade name, as well as assumptions about cash flow savings from the trade name, and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable and, as a result, actual results may differ from estimates.

[Table of Contents](#)

Estimates associated with the accounting for acquisitions may change during the measurement period as additional information becomes available regarding the assets acquired, liabilities assumed, and noncontrolling interest as discussed in Note 3 of the notes to consolidated condensed financial statements.

Self Insurance

We are primarily self-insured in North America for group health insurance and worker's compensation benefits provided to our U.S. employees, and we purchase insurance to protect against annual claims at the individual and aggregate level. We estimate our exposure for claims incurred but not reported at the end of each reporting period. We use our judgment using our historical claim data and information and analysis provided by actuarial and claim advisors, our insurance carriers and brokers on an annual basis to estimate our liability for these claims. This liability is subject to individual insured stop-loss coverage for both programs which is \$250,000 per individual. Our actual claims experience may differ from our estimates.

RESULTS OF OPERATIONS

The quarter ended March 29, 2010 does not include the results of operations from our acquired PCB Subsidiaries, as the acquisition occurred on April 8, 2010. The acquisition has had and will continue to have a significant effect on our operations as discussed in the various comparisons noted below.

There were 87 and 88 days for the quarters ended March 28, 2011 and March 29, 2010, respectively. The following table sets forth the relationship of various items to net sales in our consolidated condensed statement of operations:

	Quarter Ended	
	March 28, 2011	March 29, 2010
Net sales	100.0%	100.0%
Cost of goods sold	76.1	80.5
Gross profit	23.9	19.5
Operating expenses:		
Selling and marketing	2.6	4.9
General and administrative	6.7	6.5
Amortization of definite-lived intangibles	1.3	0.6
Restructuring charges	—	—
Impairment of goodwill and long-lived assets	—	0.4
Total operating expenses	10.6	12.4
Operating income	13.3	7.1
Other income (expense):		
Interest expense	(1.8)	(2.0)
Other, net	0.3	—
Total other expense, net	(1.5)	(2.0)
Income before income taxes	11.8	5.1
Income tax provision	(3.3)	(1.9)
Net income	8.5	3.2
Less: Net income attributable to noncontrolling interest	(0.6)	—
Net income attributable to TTM Technologies, Inc. stockholders	7.9%	3.2%

We manage our worldwide operations based on two geographic operating segments: (1) North America, which consists of seven domestic PCB fabrication plants, including a facility that provides follow-on value-added services primarily for one of the PCB fabrication plants, and one backplane assembly plant in Shanghai, China, which is managed in conjunction with our U.S. operations and its related European sales support infrastructure; and (2) Asia Pacific, which consists of the PCB Subsidiaries and their seven PCB fabrication plants, which include a substrate facility. Each segment operates predominantly in the same industry with production facilities that produce similar customized products for our customers and use similar means of product distribution in their respective geographic regions.

[Table of Contents](#)

The following table compares net sales by reportable segment for the quarters ended March 28, 2011 and March 29, 2010:

	Quarter Ended	
	March 28, 2011	March 29, 2010
	(In thousands)	
Net Sales:		
North America	\$ 142,250	\$ 138,219
Asia Pacific	202,465	—
Total sales	344,715	138,219
Inter-segment sales	(1,914)	—
Total net sales	<u>\$ 342,801</u>	<u>\$ 138,219</u>

Net Sales

Net sales increased \$204.6 million, from \$138.2 million for the quarter ended March 29, 2010 to \$342.8 million for the quarter ended March 28, 2011 primarily due to our acquisition of the PCB Subsidiaries, which comprise our Asia Pacific reporting segment.

Revenue for the North America segment increased \$4.1 million, or 3.0%, from \$138.2 million in the first quarter 2010 to \$142.3 million in the first quarter of 2011. This increase was primarily due to improved performance at a number of our production facilities as well as increased average PCB selling price from the first quarter 2010, partially offset by the closure of our Hayward, California backplane assembly facility.

Cost of Goods Sold

Cost of goods sold increased \$149.7 million from \$111.2 million for the quarter ended March 29, 2010 to \$260.9 million for the quarter ended March 28, 2011 primarily due to our acquisition of the PCB Subsidiaries in April 2010, which comprise our Asia Pacific segment.

Cost of goods sold for the North America segment remained consistent with \$111.2 million for the first quarter ended March 29, 2010 and \$111.1 million for the quarter ended March 28, 2011. As a percentage of net sales, cost of goods sold decreased from 80.5% for the first quarter ended March 29, 2010 to 78.1% for the first quarter ended March 28, 2011, primarily due to the closure of our Hayward and Los Angeles, California production facilities in 2010.

Gross Profit

As a result of the foregoing, gross profit increased \$54.9 million from \$27.0 million for the quarter ended March 29, 2010 to \$81.9 million for the first quarter ended March 28, 2011, primarily due to our acquisition of the PCB Subsidiaries. Overall gross margin increased from 19.5% for the quarter ended March 29, 2010 to 23.9% for the first quarter ended March 28, 2011 due primarily to higher overall profit margins for the Asia Pacific segment, which in turn are primarily attributable to that segment's sale of HDI PCBs and other product mix variations. Additionally, gross margin increased in our North America segment due to the facility closures as discussed above.

Selling and Marketing Expenses

Selling and marketing expenses increased \$2.3 million, or 34.3%, from \$6.7 million for the quarter ended March 29, 2010 to \$9.0 million for the first quarter ended March 28, 2011 due to our acquisition of the PCB Subsidiaries. As a percentage of net sales, selling and marketing expenses were 4.9% for the quarter ended March 29, 2010 as compared to 2.6% for the first quarter ended March 28, 2011. The decline in selling and marketing expense as a percentage of net sales is due to our acquisition of the PCB Subsidiaries, which have lower selling labor and commission expense than our North America segment.

General and Administrative Expense

General and administrative expenses increased \$14.1 million from \$9.0 million, or 6.5% of net sales, for the quarter ended March 29, 2010 to \$23.1 million, or 6.7% of net sales, for the quarter ended March 28, 2011. The increase in expense primarily relates to our acquisition of the PCB Subsidiaries in April 2010, partially offset by a decrease in transaction-related costs of \$1.8 million from the quarter ended March 29, 2010 to the comparable quarter in 2011.

Amortization of Definite-Lived Intangibles

Intangible amortization expense increased \$3.4 million from \$0.8 million, or 0.6% of net sales, for the quarter ended March 29, 2010 to \$4.2 million, or 1.3% of net sales, for the first quarter ended March 28, 2011. The increase was due to our acquisition of the PCB Subsidiaries. Identifiable intangible assets include customer relationships, trade name and order backlog.

Other Income (Expense)

Other expense, net increased \$2.5 million from \$2.8 million for the first quarter ended March 29, 2010 to \$5.3 million for the first quarter ended March 28, 2011. The increase in other expense, net was primarily due to interest expense related to the debt assumed at the date of acquisition of the PCB Subsidiaries, as well as increased amortization of costs related to the issuance of this debt, partially offset by foreign currency transaction gains in the first quarter of 2011.

Income Taxes

The provision for income taxes increased \$8.7 million from \$2.6 million for the first quarter ended March 29, 2010 to \$11.3 million for the first quarter ended March 28, 2011 primarily due to higher pre-tax income. Our effective tax rate was 27.9% for the first quarter ended March 28, 2011 and 36.6% for the first quarter ended March 29, 2010. Our effective tax rate decreased in 2011 primarily due to the acquisition of the PCB Subsidiaries, which have a lower effective tax rate than our North America operations. Our effective tax rate is primarily impacted by the U.S. federal income tax rate, apportioned state income tax rates, tax rates in China and Hong Kong, generation of other credits and deductions available to us, and certain non-deductible items. Certain foreign losses generated are not more than likely to be realizable, and thus no income tax benefit has been recognized on these losses. Additionally, as of March 28, 2011 and December 31, 2010, we had net deferred income tax assets of approximately \$14.0 million and \$18.3 million, respectively. Based on our forecast for future taxable earnings, we believe it is more likely than not that we will utilize the deferred income tax asset in future periods.

Liquidity and Capital Resources

Our principal sources of liquidity have been cash provided by operations, the issuance of Convertible Notes and, more recently, the issuance of term and revolving debt. Our principal uses of cash have been to meet debt service requirements, finance capital expenditures, fund working capital requirements and finance acquisitions. We anticipate that servicing debt, funding working capital requirements, financing capital expenditures, and acquisitions will continue to be the principal demands on our cash in the future.

As of March 28, 2011, we had net working capital of approximately \$229.8 million compared to \$258.3 million as of December 31, 2010.

Our 2011 capital expenditure plan is expected to total approximately \$136.0 million (of which approximately \$115.0 million relates to our Asia Pacific segment), and will fund capital equipment purchases to increase production capacity, expand our technological capabilities and replace aging equipment.

Based on our current level of operations, we believe that cash generated from operations, cash on hand and available borrowings under our existing credit arrangements will be adequate to meet our currently anticipated debt service, capital expenditures, acquisition, and working capital needs for the next 12 months and beyond. The semiannual repayments on our existing term loan increase as the debt nears maturity in 2013. Should we choose to maintain a significant level of annual capital expenditures or to pursue an acquisition in the next few years, refinancing of our existing debt may be necessary. In the event we determine to engage in significant acquisition or debt refinancing transactions, the adequacy of our liquidity will depend on our ability to achieve an appropriate combination of financing from third parties and access to capital markets. We cannot give any assurances that we will be able to obtain additional financing or otherwise access the capital markets in the future on acceptable terms or at all.

Credit Agreement

On April 9, 2010, in conjunction with the acquisition of the PCB Subsidiaries, the Company became a party to a credit agreement (Credit Agreement), entered into on November 16, 2009 by certain PCB Subsidiaries, which are now our wholly owned foreign subsidiaries. The Credit Agreement was put in place in contemplation of the acquisition in order to refinance the then-existing credit facilities of the PCB Subsidiaries.

The Credit Agreement consists of a \$350.0 million senior secured Term Loan, a \$87.5 million senior secured Revolving Loan, a \$65.0 million Factoring Facility, and a \$80.0 million Letters of Credit Facility, all of which mature on November 16, 2013. The Credit Agreement is secured by substantially all of the assets of the PCB Subsidiaries and is senior to all other of our debt including the Convertible Senior Notes. The Company has fully and unconditionally guaranteed the full and punctual payment of all obligations of the PCB Subsidiaries under the Credit Agreement.

Borrowings under the Credit Agreement bear interest at a floating rate of LIBOR (term election by Company) plus an applicable interest margin. Borrowings bear interest at a rate of LIBOR plus 2.0% under the Term Loan, LIBOR plus 2.25% under the Revolving Loan, and LIBOR plus 1.25% under the Factoring Facility. At March 28, 2011, the weighted average interest rate on the outstanding borrowings was 2.25%.

Borrowings under the Credit Agreement are subject to certain financial and operating covenants that include maintaining maximum total leverage ratios and minimum net worth, current assets, and interest coverage ratios at both the Company and PCB Subsidiaries level. At March 28, 2011, we were in compliance with the covenants.

We are required to pay a commitment fee of 0.20% per annum on any unused portion of loan or facility under the Credit Agreement. For the first quarter ended March 28, 2011, we incurred \$0.1 million in commitment fees related to the unused portion of any loan or facility under the Credit Agreement. As of March 28, 2011, all of the remaining Term Loan and \$75.9 million of Letters of Credit were outstanding, and available borrowing capacity under the Revolving Loan and Factoring Facility was \$87.5 million and \$65.0 million, respectively.

Bank Loans

Bank loans are made up of bank lines of credit in mainland China and are used for working capital and capital investment for our mainland China facilities. These facilities are denominated in either U.S. Dollars or Chinese Renminbi (RMB), with interest rates tied to either LIBOR or the People's Bank of China rates with a small margin adjustment. These bank loans expire in May 2012.

Convertible Notes

In 2008 we issued \$175.0 million of Convertible Notes. The Convertible Notes bear interest at a rate of 3.25% per annum. Interest is payable semiannually in arrears on May 15 and November 15 of each year. The Convertible Notes are senior unsecured obligations and rank equally to our future unsecured senior indebtedness and senior in right of payment to any of our future subordinated indebtedness.

At any time prior to November 15, 2014, holders may convert their Convertible Notes into cash and, if applicable, into shares of our common stock based on a conversion rate of 62.6449 shares of our common stock per \$1,000 principal amount of Convertible Notes, subject to adjustment, under the following circumstances: (1) during any calendar quarter beginning after June 30, 2008 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days during the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day of such preceding calendar quarter; (2) during the five business day period after any 10 consecutive trading day period in which the trading price per note for each day of that 10 consecutive trading day period is less than 98% of the product of the last reported sale price of our common stock and the conversion rate on such day; or (3) upon the occurrence of specified corporate transactions described in the prospectus supplement related to the Convertible Notes, which can be found on the SEC's website at www.sec.gov. As of March 28, 2011, none of the conversion criteria had been met.

Table of Contents

On or after November 15, 2014 until the close of business on the third scheduled trading day preceding the May 15, 2015 maturity of the Convertible Notes, holders may convert their notes at any time, regardless of the foregoing circumstances. Upon conversion, for each \$1,000 principal amount of notes, we will pay cash for the lesser of the conversion value or \$1,000 and shares of our common stock, if any, based on a daily conversion value calculated on a proportionate basis for each day of the applicable 60 trading day observation period.

The maximum number of shares issuable upon conversion, subject to certain conversion rate adjustments, would be approximately 14 million shares.

We are not permitted to redeem the notes at any time prior to maturity. In the event of a fundamental change or certain default events, as defined in the prospectus supplement, holders may require us to repurchase for cash all or a portion of their notes at a price equal to 100% of the principal amount, plus any accrued and unpaid interest.

In 2008, in connection with the issuance of the Convertible Notes, we entered into a convertible note hedge and warrant transaction (Call Spread Transaction), with respect to our common stock. The convertible note hedge consists of our option to purchase up to 11.0 million shares of common stock at a price of \$15.96 per share. This option expires on May 15, 2015 and can only be executed upon the conversion of the Convertible Notes. Additionally, we sold warrants for the option to purchase 11.0 million shares of our common stock at a price of \$18.15 per share. The warrants expire ratably beginning August 2015 through February 2016. The Call Spread Transaction has no effect on the terms of the Convertible Notes and reduces potential dilution by effectively increasing the conversion price of the Convertible Notes to \$18.15 per share of our common stock.

Other Letters of Credit

In addition to the letters of credit obtained by the PCB Subsidiaries pursuant to the Credit Agreement, we maintain several letters of credit: a \$2.0 million standby letter of credit expiring December 31, 2011 associated with insured workers compensation program; a \$1.0 million standby letter of credit expiring February 29, 2012 related to the lease for one of our production facilities; and various other letters of credits aggregating to approximately \$0.7 million related to purchases of machinery and equipment with various expiration dates through June 2011.

Contractual Obligations and Commitments

The following table provides information on our contractual obligations as of March 28, 2011:

<u>Contractual Obligations(1)(2)</u>	<u>Total</u>	<u>Less Than 1 Year</u>	<u>1 - 3 Years</u>	<u>4 - 5 Years</u>	<u>After 5 Years</u>
			(In thousands)		
Long-term debt obligations	\$ 348,332	\$ 87,504	\$ 260,820	\$ 8	\$ —
Convertible debt obligations	175,000	—	—	175,000	—
Interest on debt obligations	39,424	13,029	17,864	8,531	—
Interest rate swap liabilities	6,232	3,585	2,647	—	—
Foreign currency forward contract liabilities	20	2	18	—	—
Equipment payables	91,536	77,309	14,227	—	—
Related party financing obligation(3)	21,829	—	21,829	—	—
Purchase obligations	78,764	34,994	43,770	—	—
Operating lease commitments	5,089	2,222	1,474	452	941
Total contractual obligations	<u>\$ 766,226</u>	<u>\$ 218,645</u>	<u>\$ 362,649</u>	<u>\$ 183,991</u>	<u>\$ 941</u>

(1) Unrecognized uncertain tax benefits of \$0.1 million are not included in the table above as we have not determined when the amount will be paid.

(2) Estimated environmental liabilities of \$0.4 million, not included in the table above, are accrued and recorded as liabilities in our consolidated condensed balance sheet as of March 28, 2011.

(3) Related party financing obligation consists of a put and call option agreement in which we granted a put option to a related party to sell and they granted us a call option to purchase the remaining 20% equity interest in a recently acquired PCB subsidiary beginning in 2013.

Off Balance Sheet Arrangements

We do not currently have, nor have we ever had, any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts. As a result, we are not materially exposed to any financing, liquidity, market, or credit risk that could arise if we had engaged in these relationships.

Seasonality

As a result of the product and customer mix of our Asia Pacific operating segment, a portion of our revenue will be subject to seasonal fluctuations going forward. These fluctuations include seasonal patterns in the computer and cellular phone industry, which together have become a significant portion of the end markets that we serve. This seasonality typically results in higher net sales in the third quarter due to end customer demand for fourth quarter sales of consumer electronics products. Seasonal fluctuations also include the Chinese New Year holiday in the first quarter, which typically results in lower net sales.

Impact of Inflation

We believe that our results of operations are not materially impacted by moderate changes in the inflation rate as we expect that we generally will be able to continue to pass along component price increases to our customers. Severe increases in inflation, however, could affect the global and U.S. economies and have an adverse impact on our business, financial condition and results of operations.

Recently Issued Accounting Pronouncements

In October 2009, the FASB issued a new accounting standard related to revenue recognition in multiple-deliverable revenue arrangements. This standard eliminates the residual method of revenue allocation by requiring entities to allocate revenue in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy. Our adoption of this standard is not expected to have a material impact on our consolidated financial position, results of operations or cash flows.

Item 3. *Quantitative and Qualitative Disclosures about Market Risk*

In the normal course of business operations we are exposed to risks associated with fluctuations in interest rates and foreign currency exchange rates. We address these risks through controlled risk management that includes the use of derivative financial instruments to economically hedge or reduce these exposures. We do not enter into derivative financial instruments for trading or speculative purposes.

We have not experienced any losses to date on any derivative financial instruments due to counterparty credit risk.

To ensure the adequacy and effectiveness of our interest rate and foreign exchange hedge positions, we continually monitor our interest rate swap positions and foreign exchange forward positions, both on a stand-alone basis and in conjunction with their underlying interest rate and foreign currency exposures, from an accounting and economic perspective. However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, we cannot assure that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect our consolidated condensed operating results and financial position.

Interest rate risk

Our business is exposed to interest rate risk resulting from fluctuations in interest rates. Our interest expense is more sensitive to fluctuations in the general level of LIBOR and the People's Bank of China interest rates than to changes in rates in other markets. Increases in interest rates would increase interest expenses relating to the outstanding variable rate borrowings of certain foreign subsidiaries and increase the cost of debt. Fluctuations in interest rates can also lead to significant fluctuations in the fair value of the debt obligations.

[Table of Contents](#)

On April 9, 2010, we entered into a two-year pay-fixed, receive floating (1-month LIBOR), amortizing interest rate swap arrangement with an initial notional amount of \$146.5 million, for the period beginning April 18, 2011 and ending on April 16, 2013. The interest rate swap will apply a fixed interest rate against the first interest payments of a portion of the \$350.0 million Term Loan for this period. The notional amount of the interest rate swap decreases to zero over its term, consistent with our risk management objectives. The notional value underlying the hedge at March 28, 2011 was \$146.5 million. Under the terms of the interest rate swap, the Company will pay a fixed rate of 2.50% and will receive floating 1-month LIBOR during the swap period.

To the extent the instruments are considered to be effective, changes in fair value are recorded as a component of accumulated other comprehensive income. To the extent there is any hedge ineffectiveness, changes in fair value relating to the ineffective portion are immediately recognized in earnings as interest expense. No ineffectiveness was recognized for the quarter ended March 28, 2011. At inception, the fair value of the interest rate swap was zero. As of March 28, 2011 and December 31, 2010, the fair value of the swap was recorded as a liability of \$3.7 million and \$3.4 million, respectively, in other long-term liabilities. The change in the fair value of the interest rate swap is recorded as a component of accumulated other comprehensive income, net of tax, in our consolidated condensed balance sheet. There was no impact to interest expense for the quarter ended March 28, 2011 as the interest rate swap does not hedge interest rate cash flows until the period beginning April 18, 2011. We have designated this interest rate swap as a cash flow hedge.

We also, through our acquisition of the PCB Subsidiaries, assumed a long term pay-fixed, receive floating (1-month LIBOR), amortizing interest rate swap arrangement with an initial notional amount of \$40.0 million, for the period beginning October 8, 2008 and ending on July 30, 2012. The notional amount of the interest rate swap amortizes to zero over its term, consistent with our risk management objectives. The notional value underlying the hedge at March 28, 2011 was \$40.0 million. Under the terms of the interest rate swap, we will pay a fixed rate of 3.43% and will receive floating 1-month LIBOR during the swap period. As the borrowings attributable to this interest rate swap were paid off upon acquisition, we did not designate this interest rate swap as a cash flow hedge. As of March 28, 2011 and December 31, 2010, the fair value of the swap was recorded as a liability of \$1.0 million and \$1.2 million, respectively, in other long-term liabilities. The change in fair value of this interest rate swap is recorded as other, net in the consolidated condensed statement of operations.

As of March 28, 2011, approximately 41% of our total debt was based on fixed rates, including notional amounts related to interest rate swaps. Based on our borrowings as of March 28, 2011 an assumed 1% change in variable rates would cause our annual interest cost to change by \$3.1 million.

Foreign currency risks

We are subject to risks associated with transactions that are denominated in currencies other than our functional currencies, as well as the effects of translating amounts denominated in a foreign currency to the U.S. Dollar as a normal part of the reporting process. Our Asia Pacific operations utilize the Chinese Renminbi, or RMB, and the Hong Kong Dollar, or HKD, as the functional currency, which results in the Company recording a translation adjustment that is included as a component of accumulated other comprehensive income. The Company does not generally engage in hedging to manage foreign currency risk related to its revenue and expenses denominated in RMB and HKD.

We enter into foreign currency forward contracts to mitigate the impact of changes in foreign currency exchange rates and to reduce the volatility of purchases and other obligations generated in currencies other than the functional currencies. Our foreign subsidiaries may at times purchase forward exchange contracts to manage their foreign currency risk in relation to particular purchases or obligations, such as the related party financing obligation arising from the put call option to purchase the remaining 20% of a majority owned subsidiary, and certain purchases of machinery denominated in foreign currencies other than our foreign functional currency. The notional amount of the foreign exchange contracts at March 28, 2011 was approximately \$62.8 million. We have designated certain of these foreign exchange contracts as cash flow hedges, with the exception of the foreign exchange contracts in relation to the related party financing obligation. In this instance, the hedged item is a recognized liability subject to foreign currency transaction gains and losses and therefore, changes in the hedged item due to foreign currency exchange rates are already recorded in earnings. Therefore, hedge accounting has not been applied.

Table of Contents

The table below presents information about certain of the foreign currency forward contracts at March 28, 2011 and December 31, 2010:

	As of March 28, 2011		As of December 31, 2010	
	Notional Amount (In thousands in USD)	Average Contract Rate or Strike Amount	Notional Amount (In thousands in USD)	Average Contract Rate or Strike Amount
Receive foreign currency/pay USD

Fair value loss at March 28, 2011				(4,694)

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures.

We maintain a system of disclosure controls and procedures for financial reporting to give reasonable assurance that information required to be disclosed in our reports submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. These controls and procedures also give reasonable assurance that information required to be disclosed in such reports is accumulated and communicated to management to allow timely decisions regarding required disclosures.

Our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), together with management, conducted an evaluation of the effectiveness of our disclosure controls and procedures as of March 28, 2011, pursuant to Rules 13a-15(e) of the Exchange Act. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) were effective such that information relating to the Company, including our consolidated subsidiaries, required to be disclosed in our SEC reports, (i) is recorded, processed, summarized and reported within the time frames specified in SEC rules and forms, and (ii) is accumulated and communicated to company management, including our CEO and CFO, as appropriate to allow timely discussion regarding disclosure.

Changes in Internal Control over Financial Reporting.

There have been no changes in our internal control over financial reporting during the quarter ended March 28, 2011 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our principal executive officer and chief financial officer, does not expect that our disclosure controls or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls also can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we may become a party to various legal proceedings arising in the ordinary course of our business. There can be no assurance that we will prevail in any such litigation. We believe that the amount of any ultimate potential loss for known matters would not be material to our financial condition; however, the outcome of these actions is inherently difficult to predict. In the event of an adverse outcome, the ultimate potential loss could have a material adverse effect on our financial condition or results of operations and cash flows in a particular period.

Item 1A. Risk Factors

An investment in our common stock involves a high degree of risk. You should carefully consider the factors described in Part I "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2010, in analyzing an investment in our common stock. If any of the risks in our Annual Report on Form 10-K occurs, our business, financial condition, and results of operations would likely suffer, the trading price of our common stock could fall, and you could lose all or part of the money you paid for our common stock.

[Table of Contents](#)

In addition, the risk factors and uncertainties could cause our actual results to differ materially from those projected in our forward-looking statements, whether made in this report or the other documents we file with the SEC, or our annual or quarterly reports to stockholders, future press releases, or orally, whether in presentations, responses to questions, or otherwise.

Item 6. Exhibits

Exhibit Number	Exhibits
31.1	CEO Certification Pursuant to Section 302 of the Sarbanes — Oxley Act of 2002.
31.2	CFO Certification Pursuant to Section 302 of the Sarbanes — Oxley Act of 2002.

CERTIFICATION

I, Kenton K. Alder, certify that:

1. I have reviewed this quarterly report on Form 10-Q of TTM Technologies, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in case of an annual report) that has materially affected, or is reasonably likely to materially affect the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, Steven W. Richards, certify that:

1. I have reviewed this quarterly report on Form 10-Q of TTM Technologies, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in case of an annual report) that has materially affected, or is reasonably likely to materially affect the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: May 9, 2011

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report on Form 10-Q of TTM Technologies, Inc. (the "Company") for the quarter ended March 28, 2011, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Kenton K. Alder, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a) or 78o(d)); and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
