
UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
Form 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended January 1, 2018
Commission file number 0-31285

TTM TECHNOLOGIES, INC.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
*(State or Other Jurisdiction of
Incorporation or Organization)*
1665 Scenic Avenue Suite 250,
Costa Mesa, California
(Address of Principal Executive Offices)

91-1033443
*(I.R.S. Employer
Identification No.)*
92626
(Zip Code)

(714) 327-3000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Exchange Act:

<u>Title of Each Class</u>	<u>Name of Each Exchange on Which Registered</u>
Common Stock, \$0.001 par value	Nasdaq Global Select Market

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provide pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of Common Stock held by non-affiliates of the registrant (based on the closing price of the registrant's Common Stock as reported on the Nasdaq Global Select Market on July 3, 2017, the last business day of the most recently completed second fiscal quarter), was \$1,596,846,596. For purposes of this computation, all officers, directors, and 10% beneficial owners of the registrant are deemed to be affiliates of the registrant. Such determination should not be deemed to be an admission that such officers, directors, or 10% beneficial owners are, in fact, affiliates of the registrant.

As of February 19, 2018, there were outstanding 102,343,894 shares of the registrant's Common Stock, \$0.001 par value.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive Proxy Statement for its 2018 Annual Meeting of Stockholders are incorporated by reference into Part III of this report. Such Proxy Statement will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

Statement Regarding Forward-Looking Statements

This report on Form 10-K contains forward-looking statements regarding future events or our future financial and operational performance. Forward-looking statements include statements regarding markets for our products; trends in net sales, gross profits and estimated expense levels; liquidity and anticipated cash needs and availability; and any statement that contains the words “anticipate,” “believe,” “plan,” “forecast,” “foresee,” “estimate,” “project,” “expect,” “seek,” “target,” “intend,” “goal” and other similar expressions. The forward-looking statements included in this report reflect our current expectations and beliefs, and we do not undertake publicly to update or revise these statements, even if experience or future changes make it clear that any projected results expressed in this annual report or future quarterly reports to stockholders, press releases or company statements will not be realized. In addition, the inclusion of any statement in this report does not constitute an admission by us that the events or circumstances described in such statement are material. Furthermore, we wish to caution and advise readers that these statements are based on assumptions that may not materialize and may involve risks and uncertainties, many of which are beyond our control, that could cause actual events or performance to differ materially from those contained or implied in these forward-looking statements. These risks and uncertainties include the business and economic risks described in “Item 1A — Risk Factors”.

Unless otherwise indicated or unless the context requires otherwise, all references to time periods refer to our fiscal year, and all reference to “TTM,” “our company,” “we,” “us,” “our,” and similar names refer to TTM Technologies, Inc. and its subsidiaries.

ITEM 1. BUSINESS

General

We are a leading global printed circuit board (PCB) manufacturer, focusing on quick-turn and volume production of technologically complex PCBs and electro-mechanical solutions (E-M Solutions). We are the largest PCB manufacturer in North America and one of the largest PCB manufacturers in the world, in each case based on revenue, according to the 2016 rankings from N.T. Information LTD (NTI). In 2017 we generated \$2.7 billion in net sales and ended the year with approximately 29,000 employees worldwide. We operate a total of 25 specialized facilities in North America and China. We focus on providing time-to-market and volume production of advanced technology products and offer a one-stop manufacturing solution to our customers from engineering support to prototype development through final mass production. This one-stop manufacturing solution allows us to align technology development with the diverse needs of our customers and to enable them to reduce the time required to develop new products and bring them to market. We serve a diversified customer base consisting of approximately 2,000 customers in various markets throughout the world, including aerospace and defense, automotive components, smartphones and touchscreen tablets, high-end computing, medical, industrial and instrumentation related products as well as networking/communications infrastructure products. Our customers include both original equipment manufacturers (OEMs) and electronic manufacturing services (EMS) providers.

We manage our worldwide operations based on two reportable segments: (1) *PCB*, which consists of 13 domestic PCB fabrication plants, including a facility that provides follow-on value-added services; eight PCB fabrication plants in China and one in Canada, and (2) *E-M Solutions*, which consists of three custom electronic assembly plants in China. Each segment operates predominantly in the same industries with production facilities that produce customized products for our customers and use similar means of product distribution.

Additional information on our reportable segments and product information is contained in Note 18 of the Notes to Consolidated Financial Statements.

Acquisition of Anaren, Inc.

On December 1, 2017, we entered into a definitive stock purchase agreement with Anaren Holdings, LLC pursuant to which we agreed to purchase all of the issued and outstanding common stock of Anaren Holding

[Table of Contents](#)

Corp., for total consideration of \$775.0 million in cash subject to customary working capital and certain other adjustments. Other than the equity interests of Anaren, Inc (Anaren), Anaren Holding Corp. has no material independent operations. Anaren is a leading provider of mission-critical radio frequency (RF) solutions, microelectronics, and microwave components and assemblies for the wireless infrastructure and space and defense electronics markets. Anaren's microwave products are used in wireless communication systems including wireless infrastructure, wireless consumer and medical applications, as well as advanced radar, beam-forming, jamming, motion control and receiver applications for the space and defense markets, covering a broad range of frequencies and power levels. Its Integrated Radio module product lines provide proprietary low power RF monitoring solutions deployable in a wide variety of end market applications. The acquisition of Anaren will significantly increase our aerospace and defense design capability with particular focus on RF products, deepen our customer engagement in aerospace and defense and networking/communications and complement our focus on high technology PCB products manufacturing. We expect to complete the acquisition in the first half of 2018.

Industry Overview

PCBs are manufactured in panels from sheets of laminated material. Each panel is typically subdivided into multiple PCBs, each consisting of a pattern of electrical circuitry etched from copper to provide an electrical connection between the components mounted to it. PCBs serve as the foundation for virtually all electronic products, including the electronic components integrated into automobiles, consumer electronics products (smartphones and touchscreen tablets), high-end commercial electronic equipment (such as medical equipment, data communications routers, switches and servers) and aerospace and defense electronic systems.

In recent years, the demand for smaller sized electronic devices with more features and functionality has been increasing. Products designed to offer faster data transmission, thinner and more lightweight packaging, and reduced power consumption generally require increasingly complex PCBs to meet these criteria. By using a modified semi-additive process (mSAP) and High Density Interconnect (HDI) technology, circuit densities can be increased, thereby providing for smaller products with higher packaging densities. Furthermore, rigid-flex circuits can be found in small and lightweight end products, such as smartphones and touchscreen tablets and increasingly in other end markets such as automotive, industrial and aerospace and defense. PCB manufacturers also manufacture substrates that serve as the interconnect between integrated circuits (ICs) and the PCB. We collectively refer to all of these technologies as "advanced technologies," and they have growth rates which are higher than conventional technologies. In addition, most of our markets have low volume requirements during the prototype stage that demand a highly flexible manufacturing environment which later transitions to a higher volume requirement during product ramp.

According to estimates in a November 2017 report by Prismark Partners, worldwide demand for PCBs was approximately \$54.2 billion in 2016. Of this worldwide demand for production in 2016, Prismark Partners reports that PCB production in the Americas accounted for approximately 5% (approximately \$2.8 billion), PCB production in China accounted for approximately 50% (approximately \$27.1 billion), and PCB production in the rest of the world accounted for approximately 45% (approximately \$24.3 billion). According to the same report by Prismark Partners, worldwide demand for PCBs is forecast to grow at a 2.8% compound annual growth rate (CAGR) from 2017 to 2022 driven by above average growth expected in the automotive and aerospace and defense end markets. While Prismark Partners expects long-term growth to occur in all PCB technologies, it forecasts more robust growth in the HDI, flexible and rigid-flex areas. This growth expectation stems from the increase in the number of applications that can utilize, and in many cases require, smaller, denser interconnects.

Industry Trends

We believe that several trends impacting the PCB manufacturing industry which will benefit us in the future. These trends include:

Shorter electronic product life cycles, which create opportunities for PCB manufacturers that can offer engineering support in the prototype stage and manufacturing scalability throughout the production life cycle.

Increasing complexity of electronic products, which requires technologically complex PCBs that can accommodate higher speeds and component densities, including HDI, flexible, and substrate PCBs.

[Table of Contents](#)

Growing utilization of PCB technology in automobiles. An increasing trend toward sophisticated safety systems, automated driving, electric/hybrid vehicles and miniaturization of electronic devices in the automotive industry is driving increasing electronic content and higher PCB usage in automobiles, particularly with regard to the increased demand for advanced technologies like HDI, rigid-flex and RF PCBs for radar.

Increasing concentration of global PCB production in Asia. In recent years, China has emerged as a global production center for electronics manufacturers. We believe that the expected continued concentration of consumer electronic production in China should result in additional commercial market share potential for PCB manufacturers with a strong presence and reputation in China.

Supply chain consolidation by commercial OEMs. We believe that PCB manufacturers which can offer one-stop manufacturing capabilities — from prototype to volume production — have a competitive advantage in the market.

Our Strategy

Our goal is to be the leading global provider of time-critical, one-stop manufacturing services for highly complex PCBs. Our core strategy includes the following elements:

Maintain our customer-driven culture and provide superior service to our customers in our core markets of aerospace and defense, automotive, cellular phones, computing and storage, medical/industrial/instrumentation, and networking/communications. Our customer-oriented culture is designed to achieve extraordinary service, competitive differentiation, and superior execution. Our customer-oriented strategies include engaging in co-development of new products, capturing new technology products for next generation equipment, and continuing investments to enhance our broad offering of PCB technologies. We believe our ability to anticipate and meet customers' needs is critical to retaining existing customers and attracting leading companies as new customers.

Drive operational efficiency and productivity. We are highly focused on improving our operational execution to increase efficiency, productivity and yields. We strongly believe in the benefits of sharing best practices across our extensive manufacturing footprint and rely on stringent goals for throughput, quality and customer satisfaction to measure our effectiveness. The fast paced nature of our business requires a disciplined approach to manufacturing that is rooted in continuous improvement.

Accelerate customer and end-market diversification through strategic mergers and acquisitions. We have a history of executing successful acquisitions that have been key to our growth and profitability. We continuously look for strategic opportunities that could facilitate our efforts to further diversify into other growing end markets including automotive and aerospace and defense. Our acquisition of Viasystems has increased, and the announced pending acquisition of Anaren will increase, our service and product offering for our broad customer base. Additionally, our acquisition of Viasystems also provided for diversification into the automotive end market, while our pending acquisition of Anaren will deepen our engagement with existing leading customers in the aerospace and defense end market, demonstrating the benefits of this strategy.

Accelerate our expansion into the automotive and other growing markets using our advanced technology as a key point of differentiation. With rising requirements for faster data transmission, shrinking features (i.e., lightweight and thin), and lower power consumption, many PCB designs have migrated to more complex HDI PCBs from conventional multi-layer PCB technologies. This trend began with PCBs used in portable devices such as smartphones and touchscreen tablets but has become an increasing trend in other end markets, such as automotive, networking/communications, medical, and aerospace and defense. We are focused in particular on the automotive opportunity where the combination of our strength in highly reliable conventional and RF PCBs and our advanced technology PCB product capabilities allows us to meet our automotive customers' growing demand in such areas as infotainment, radar systems, cameras for advanced driver assistance systems and electric vehicles. As our customers consolidate their supply chain, our objective is to differentiate ourselves as a strategic supplier with the technology breadth to meet most, if not all, of our automotive customers' PCB requirements.

Address customer needs in all stages of the product life cycle. By providing a one-stop solution, we work to service our customers' needs from the earliest stages of product design and development through volume

[Table of Contents](#)

production. We believe that by servicing our customers early in the development process, we are able to demonstrate our capabilities and establish an incumbent position early in the product development cycle, which translates into additional opportunities as our customers move into volume production. We believe our expertise is enhanced by our ability to deliver highly complex PCBs to customers in significantly compressed lead times. This rapid delivery service enables OEMs to develop sophisticated electronic products more quickly and reduce their time to market. We believe we will be able to increase customer engagement with our pending acquisition of Anaren's proprietary and customizable RF solutions from the concept stage through to volume, which typically results in higher customer engagement.

Delever strong financial performance and delever the balance sheet. We aspire to deliver industry-leading financial performance. We expect to achieve this by servicing our customers' needs in higher-growth end markets in a cost-efficient and effective manner. We believe that this strategy will allow us to generate strong cash flows, which will enable us to reduce financial leverage over time while at the same time providing us with the financial flexibility to continue to invest in our business, including through opportunistic acquisitions.

Products and Services

We offer a wide range of PCB products and electro-mechanical solutions, including conventional PCBs, HDI PCBs, flexible PCBs, rigid-flex PCBs, custom assemblies and system integration, and IC substrates. We also offer certain value-added services to support our customers' needs. These include design-for-manufacturability (DFM), PCB layout design, simulation and testing services, and quick turnaround (QTA) production. By offering this wide range of PCB products and complementary value-added services, we are able to provide our customers with a "one-stop" manufacturing solution for their PCB requirements. This differentiates us from our competition and enhances our relationships with our customers.

Conventional PCBs

A conventional PCB is made from a composite laminate that is metalized with a conductive material such as copper. The PCB is the basic platform used to interconnect components in most electronic products including computers, communications equipment, cellular phones, high-end consumer electronics, automotive controls, commercial aerospace and defense systems and medical and industrial equipment. Conventional PCBs can be classified as single-sided, double-sided and multi-layer boards.

We focus on higher layer count conventional PCBs. A multi-layer PCB can accommodate more complex circuitry than a single-sided or double-sided PCB and as such requires more sophisticated production techniques. The number of layers comprising a PCB often increases with the complexity of the end product. For example, a simple consumer device such as a garage door controller may use a single-sided or double-sided PCB, while a high-end network router or computer server may use a PCB with 30 or more layers.

RF and microwave circuits

We produce and test specialized circuits used in radio-frequency or microwave emission and collection applications. These products are typically used for radar, transmit/receive antennas and similar wireless applications. Markets for these products include automotive, defense, avionics, satellite, and commercial applications. The manufacture of these products requires advanced materials, equipment, and methods that are highly specialized and distinct from conventional printed circuit manufacturing techniques. We also offer specialized radio-frequency assembly and test services.

High density interconnect or HDI PCBs

Our facilities in North America and China also produce high density interconnect (HDI) PCBs, which are PCBs with higher interconnect density per unit area requiring more sophisticated technology and manufacturing processes for their production than conventional PCB products. HDI PCBs are boards with high-density characteristics including micro-sized holes, or microvias (diameter at or less than 0.15 mm), and fine line circuitry (circuit line width and spacing at or less than 0.075 mm) and are fabricated with thin high performance materials, thereby enabling more interconnection functions per unit area. HDI PCBs generally are manufactured

[Table of Contents](#)

using a sequential build-up process in which circuitry is formed in the PCB one layer at a time through successive drilling, plating and lamination cycles. In general, a board's complexity is a function of interconnect and circuit density, layer count, laminate material type and surface finishes. As electronic devices have become smaller and more portable with higher functionality, demand for advanced HDI PCB products has increased dramatically. We define advanced HDI PCBs as those having more than one layer of microvia interconnection structure.

Substrate Like PCBs or SLPs

Substrate like PCBs (SLPs) are the next evolution of high end HDI PCBs. SLPs are PCBs with even higher interconnect density per unit area than the traditional HDI PCBs described above and require an even more sophisticated manufacturing technology called modified semi-additive process or mSAP. The mSAP process uses subtractive techniques commonly used for the manufacture of traditional PCBs combined with additive techniques that are mostly found in the manufacture of substrates. This process enables fine line circuitry (circuit line width and spacing at or less than 0.03 mm). We manufacture SLPs with the mSAP process in our China facilities and the products are generally used in the cellular market which demands higher performance in a smaller footprint.

Flexible PCBs

Flexible PCBs are printed circuits produced on flexible films, allowing them to be folded or bent to fit the available space or allowing for application movement. We manufacture circuits on flexible substrates that can be installed in three-dimensional applications for electronic packaging systems. Use of flexible circuitry can enable improved reliability, improved electrical performance, reduced weight and reduced assembly costs when compared with traditional wire harness or ribbon cable packaging. Flexible PCBs can provide for flexible electronic connectivity of an electrical device's apparatus such as printer heads, cameras, camcorders, TVs, mobile handsets, and tablets. For some of our flexible PCB customers, we also assemble components onto the flexible PCBs we manufacture.

Rigid-flex PCBs

Rigid-flex circuitry provides a simple means to integrate multiple PCB assemblies and other elements such as display, input or storage devices without wires, cables or connectors, replacing them with thin, light composites that integrate wiring in ultra-thin, flexible ribbons between rigid sections. In rigid-flex packaging, a flexible circuit substrate provides a backbone of wiring with rigid multilayer circuit sections built up as modules where needed.

Since the ribbons can be bent or folded, rigid-flex provides a means to compactly package electronics in three dimensions with dynamic or static bending functions as required, enabling miniaturization and thinness of product design. The simplicity of rigid-flex integration also generally reduces the number of parts and interconnections required, which can improve reliability. The increasing popularity of mobile electronics coupled with the design trend of developing increasingly thinner, lighter and more feature-rich products, is expected to further drive growth in the rigid-flex and flex sectors, where these PCBs are the backbone of miniaturization.

Rigid-flex technology is essential to a broad range of applications including aerospace and defense, industrial and transportation systems requiring high reliability; hand-held and wearable electronics such as mobile phones, video cameras and music players where thinness and mechanical articulation are essential; and ultra-miniaturized products such as headsets, medical implants and semiconductor packaging where size and reliability are paramount.

Custom assemblies and system integration

Our assembly facilities produce custom electronic assemblies as well as fully integrated electronic systems. Custom electronic assemblies refers to a variety of PCB assemblies such as backplane and midplane assemblies, flexible and rigid-flex assemblies and RF assemblies. Each of these assemblies involves mounting electronic components to a printed circuit board and then testing the assembly for electrical continuity. Our services also go

[Table of Contents](#)

beyond the PCB assembly to fully integrated systems. A fully integrated system often includes installing the PCB assembly into a metal enclosure and adding fans for cooling the system, a power supply and cable assemblies to create a fully assembled and tested system that will be shipped to our customers.

IC substrates

IC substrates provide mechanical support and electrical interconnect for very small ICs (integrated circuits or semiconductors) and up to comparatively larger PCBs for assembly into electronic end products such as memory modules, cellular phones, digital cameras, automotive GPS and engine controls. IC substrates, also known as chip carriers, are highly miniaturized circuits manufactured by a process largely similar to that for PCBs but requiring the use of ultra-thin materials and including micron-scale features, because they must bridge the gap between sub-micron IC features and millimeter scale PCBs. Consequently, IC substrates are generally manufactured in a semiconductor-grade clean room environment to ensure products are free of defects and contamination.

Quick turnaround services

We refer to our rapid delivery services as “quick turnaround” or “QTA”, because we provide custom-fabricated PCBs to our customers within as little as 24 hours to ten days. As a result of our ability to rapidly and reliably respond to the critical time requirements of our customers, we generally receive premium pricing for our QTA services as compared to standard lead time prices.

- *Prototype production.* In the design, testing, and launch phase of a new electronic product’s life cycle, our customers typically require limited quantities of PCBs in a very short period of time. We satisfy this need by manufacturing prototype PCBs in small quantities, with delivery times ranging from as little as 24 hours to ten days.
- *Ramp-to-volume production.* After a product has successfully completed the prototype phase, our customers introduce the product to the market and require larger quantities of PCBs in a short period of time. This transition stage between low-volume prototype production and volume production is known as ramp-to-volume. Our ramp-to-volume services typically include manufacturing up to a few hundred PCBs per order with delivery times ranging from five to 15 days.

Thermal management

Increased component density on circuit boards often requires improved thermal dissipation to reduce operating temperatures. We produce printed circuits with heavy copper cores and both embedded and press-fit coins. In addition, we produce PCBs with electrically passive heat sinks laminated externally on a circuit board or between two circuit boards, as well as PCBs with electrically active thermal cores.

Manufacturing Technologies

The market for our products is characterized by rapidly evolving technology. In recent years, the trend in the electronic products industry has been to increase the speed, complexity, and performance of components while reducing their size. We believe our technological capabilities allow us to address the needs of manufacturers to bring complicated electronic products to market faster.

To manufacture PCBs, we generally receive circuit designs directly from our customers in the form of computer data files, which we review to ensure data accuracy and product manufacturability. Processing these computer files with computer aided manufacturing (CAM) technology, we generate images of the circuit patterns that we then physically develop on individual layers, using advanced photographic processes. Through a variety of plating and etching processes, we selectively add and remove conductive materials to form horizontal layers of thin circuitry, which are separated by electrical insulating material. A multilayer circuit board is produced by laminating together multiple layers of circuitry, using intense heat and pressure under vacuum. Vertical connections between layers are achieved by drilling and plating through small holes, called vias. Vias are made by highly specialized drilling equipment capable of achieving extremely fine tolerances with high accuracy. We

[Table of Contents](#)

specialize in high layer count PCBs with extremely fine geometries and tolerances. Because of the tolerances involved, we employ clean rooms in certain manufacturing processes where tiny particles might otherwise create defects on the circuit patterns. We also use automated optical inspection systems and electrical testing systems to ensure consistent quality of the circuits we produce.

We believe that our highly specialized equipment and advanced manufacturing processes enable us to reliably produce PCBs with the following characteristics:

- *High layer count.* Manufacturing PCBs with a large number of layers is difficult to accomplish due to the accumulation of manufacturing tolerances and registration systems required. In our PCB reportable segment, we regularly manufacture PCBs with more than 30 layers on a quick-turn and volume basis.
- *Blind and buried vias.* Vias are drilled holes that provide electrical connectivity between layers of circuitry in a PCB. Blind vias connect the surface layer of the PCB to an internal layer and terminate at the internal layer. Buried vias are holes that do not reach either surface of the PCB but allow inner layers to be interconnected. Products with blind and buried vias can be made thinner, smaller, lighter and with higher component density and more functionality than products with traditional vias.
- *Microvias.* HDI technology utilizes microvias, which are small vias with diameters generally less than 0.15 mm after plating. Advanced HDI products may also require the microvias to be fully filled using a specialized plating process so that additional microvia structures can be stacked to form more complex interconnections. These microvias consume much less space on the layers they connect, thereby providing for greater wiring densities and flexibility, and also providing closer spacing of components and their attachment pads. The fabrication of PCBs with microvias requires specialized equipment, such as laser drills, and highly developed process knowledge. Applications such as handheld wireless devices employ microvias to obtain a higher degree of functionality from a given surface area.
- *Embedded passives.* Embedded passive technology involves embedding either capacitive or resistive elements inside the PCB, which allows for removal of passive components from the surface of the PCB and thereby leaves more surface area for active components. Use of this technology provides greater surface area for surface-mounted ICs and better signal performance, as well as increased functionality of products with higher component density.
- *Fine line traces and spaces.* Traces are the connecting copper lines between the different components of the PCB, and spaces are the distances between traces. The smaller the traces and the tighter the spaces, the higher the density of the PCB and the greater the expertise required to achieve a desired final yield performance level. We are able to manufacture PCBs with traces and spaces less than 0.058 mm.
- *High aspect ratios.* The aspect ratio is the ratio between the thickness of the PCB and the diameter of a drilled hole. As the aspect ratio increases, it becomes increasingly more difficult to consistently and reliably form, electroplate and finish all the holes on a PCB. In production, we are able to provide aspect ratios of up to 30:1.
- *Thin core processing.* A core is the basic inner-layer building block material from which PCBs are constructed. A core consists of a flat sheet of material comprised of glass-reinforced resin with copper foil laminated on either side. The thickness of inner-layer cores is typically determined by the overall thickness of the PCB and the number of layers required. The demand for thinner cores derives from the requirements for thinner PCBs, higher layer counts and various electrical parameters. Core thickness in our PCBs ranges from as little as 0.058 mm up to 1.57 mm.
- *Advanced hole fill processes.* Our advanced hole fill processes provide designers the opportunity to increase the density of component placements by reducing the surface area required to place many types of components. In traditional design, components are routed from their surface interfaces through via connections in order to access power and ground connections and the internal circuitry used to connect to other discrete components. Our advanced hole fill processes provide methods to allow for vias to be placed inside their respective surface mount pads by filling the vias with a thermoset epoxy and plating flat copper surface mount pads directly over the filled hole.
- *Advanced materials.* We manufacture circuit boards using a wide variety of advanced dielectric materials. These high-performance materials offer electrical, thermal, and long-term reliability advantages

Table of Contents

over conventional materials but are more difficult to manufacture. We are certified by Underwriters Laboratories to manufacture PCBs using many types and combinations of these specialty materials. This broad offering allows us to manufacture PCBs for a wide array of end-use applications, including highly complex PCBs for niche and high-end commercial and aerospace and defense markets.

- *Quick Turn Manufacturing:* In addition, in circumstances where our customers require time critical engineering and manufacturing services, we are able to meet our customers' need with our quick-turn manufacturing capabilities.

Customers and Markets

Our customers include both OEMs and EMS companies that primarily serve the aerospace and defense, automotive, cellular phone, computing, medical/industrial/instrumentation, and networking/communications end markets of the electronics industry. Included in the end markets that our OEM and EMS customers serve is the U.S. government. As a result, we are a supplier, primarily as a subcontractor, to the U.S. government.

The following table shows the percentage of our net sales in each of the principal end markets we served for the periods indicated:

<u>End Markets(1)</u>	<u>2017</u>	<u>2016</u>	<u>2015(2)</u>
Aerospace and Defense	16%	15%	14%
Automotive	19	20	13
Cellular Phone(3)	18	14	21
Computing/Storage/Peripherals(3)	13	12	12
Medical/Industrial/Instrumentation	14	14	13
Networking/Communications	18	23	25
Other(3)	2	2	2
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

- (1) Sales to EMS companies are classified by the end markets of their OEM customers.
- (2) Amounts include activity of Viasystems since acquisition which occurred on May 31, 2015.
- (3) Smartphones are included in the Cellular Phone end market, tablets are included in the Computing/Storage/Peripherals end market and other consumer devices that include wearables, portable video devices and personal headphones are included in the Other end market.

Sales attributable to our five largest OEM customers, which can vary from year to year, collectively accounted for 37%, 33%, and 37%, of our net sales in fiscal years 2017, 2016 and 2015, respectively. Our five largest OEM customers in 2017 were, in alphabetical order, Apple Inc., Cisco Systems, Inc., Huawei Technology Co. Ltd., Robert Bosch GmbH, and Tesla Motors. For the fiscal year 2017, Apple accounted for 20% of our net sales. Sales attributed to OEMs include sales made through EMS providers. Sales to EMS providers comprised approximately 32%, 35%, and 35% of our net sales in fiscal years 2017, 2016 and 2015, respectively. Although our contractual relationships are with the EMS companies, we typically negotiate price and volume requirements directly with the OEMs. In addition, we are on the approved vendor lists of several of our EMS providers. This positions us to participate in business that is awarded at the discretion of the EMS provider.

During fiscal years 2017, 2016 and 2015, our net sales by country invoiced were as follows:

<u>Country</u>	<u>2017</u>	<u>2016</u>	<u>2015</u>
United States	32%	44%	46%
China	36	26	26
Other	32	30	28
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

[Table of Contents](#)

Other than in the United States and China, we do not conduct business in any country in which our net sales exceed 10% of our total net sales for the fiscal years 2017, 2016 and 2015.

Our sales and marketing strategy focuses on building long-term relationships with our customers' engineering and new product introduction personnel early in the product development phase, frequently through strategic account management teams. As the product moves from the prototype stage through ramp-to-volume and volume production, we shift our focus to the customers' procurement departments in order to capture sales at each point in the product's life cycle.

Our staff of engineers, sales support personnel, and managers assists our sales representatives in advising customers with respect to manufacturing feasibility, design review, and technological capabilities through direct communication and visits. We combine our sales efforts with customer service personnel at each facility to better serve our customers. Each large customer is typically assigned an account manager to coordinate all of the Company's services across all of our facilities. Additionally, the largest and most strategic customers are also supported by select program management and engineering teams. Our global sales force is comprised of direct sales personnel, complemented by commission-based independent representatives, and supports customers throughout North America, Europe, Asia and the Middle East.

Our North America footprint comprises a significant amount of our PCB reportable segment with fourteen PCB fabrication plants located in California, Colorado, Connecticut, Ohio, Oregon, Utah, Virginia, Wisconsin and Ontario, Canada. The footprint includes a facility that provides follow-on value-added services.

Our China footprint includes facilities from both our PCB and E-M Solutions reportable segments with eight PCB fabrication plants located in Hong Kong, Huiyang, Dongguan, Guangzhou, Shanghai, and Zhongshan China, and three custom assembly and system integration operations in Shanghai and Shenzhen China.

For certain risk attendant to our foreign operations, see Item 1A, *Risk Factors*.

For information regarding credit to customers, see Note 11 of the Notes to Consolidated Financial Statements.

For information about net sales, income before income taxes, depreciation, total assets and capital expenditures of each of our segments, and geographical information, including net sales to customers and long-lived assets, see Note 18 of the Notes to Consolidated Financial Statements.

Suppliers

The primary raw materials we use in PCB manufacturing include copper-clad laminate, chemical solutions such as copper and gold for plating operations, photographic film, carbide drill bits, and plastic for testing fixtures. Although we have preferred suppliers for some raw materials used in the manufacture of PCBs, most of our raw materials are generally readily available in the open market from numerous other potential suppliers.

The primary raw materials we use in backplane assemblies and other PCB assemblies are manufactured components such as PCBs, connectors, capacitors, resistors, diodes and integrated circuits, many of which are custom made and controlled by our customers' approved vendors. These components for backplane assemblies and other PCB assemblies in some cases have limited or sole sources of supply. For example, in some instances, our customers will require us to use a specific component from a particular supplier or require us to use a component provided by the customer itself, in which case we may have a single or limited number of suppliers for these specific components. The backplane assemblies, PCB assemblies and precision metal fabricated chassis and enclosures produced by us may be incorporated into a fully integrated and tested system delivered to our customer. These products often incorporate procured power, thermal, interconnect and mechanical components sourced from customer directed or our selected suppliers.

We typically use just-in-time procurement practices to maintain our raw materials inventory at low levels and work closely with our suppliers to obtain technologically advanced raw materials. In addition, we periodically seek alternative supply sources to ensure that we are receiving competitive pricing and service. Adequate amounts of all raw materials have been available in the past, and we believe this availability will continue into the foreseeable future.

Competition

Despite industry consolidation, the PCB industry remains fragmented and characterized by intense competition. There are several competitive factors our customers consider when choosing their supplier including, but not limited to, technical capabilities, pricing, service, support, reliability, and quality production. Our principal PCB and substrate competitors include AT&S (Austria Technologie & Systemtechnik AG), Chin Poon Industrial Co., Ltd., Compeq Manufacturing Co., Ltd., IBIDEN Co., Ltd., ISU Petasys Co., Ltd., Multek Corporation, Sanmina Corporation, Tripod Technology Corp., Unimicron Technology Corp., and Wus Printed Circuit Co., Ltd. Our principal E-M Solutions competitors include Amphenol Corporation, Flex, Jabil Circuit, Inc. and Sanmina Corporation.

We believe that our key competitive strengths include:

Leading global PCB manufacturer. We are one of the largest and most diversified PCB manufacturers in the world and enjoy significant economies of scale, with net sales of \$2.7 billion for fiscal 2017. The PCB industry is highly fragmented with the top 20 PCB providers comprising approximately 48% of market share in 2016, according to NTI. As our customers consolidate their supply base, we offer the technology breadth and scale to emerge as a preferred partner.

Breadth of technology and products. We offer a wide range of PCB products and electro-mechanical solutions, including HDI PCBs, conventional PCBs, flexible PCBs, rigid-flex PCBs, custom assemblies, and integrated circuit (IC) substrates. We also offer certain value-added services to support our customers' needs. These include design for manufacturability (DFM), PCB layout design, simulation and testing services, and quick turnaround QTA services. By providing these value-added services to customers, we are able to provide our customers with a "one-stop" manufacturing solution, which we believe enhances our relationships with our customers.

Diversified business model. Our sales are diversified by a well-balanced portfolio of end markets which we serve and by the customers we sell to within those end markets. We believe this diversity reduces our exposure to, and reliance on, any single end market or customer. We enjoy a large and diverse customer base with over 2,000 customers, as well as long-term relationships in excess of ten years with our ten largest customers. For fiscal 2017, net sales to our top five customers represented approximately 37% of our total net sales. Furthermore, for fiscal 2017, our largest five customers are not concentrated in any single end market, but rather are represented across four of our end markets.

Focused on attractive end markets with a favorable growth outlook and dependence on sophisticated product capabilities. We believe that our global manufacturing footprint and breadth of capabilities enables us to serve several key end markets for the PCB industry. The automotive industry in particular provides an opportunity for us as we combine our traditional market strength in core automotive engine controls with the advanced technologies and RF capabilities we offer for growing requirements in safety systems, automated driving and infotainment.

One-stop solution for customers. We are capable of providing a one-stop manufacturing solution to our customers from engineering support and prototype development through final volume production around the globe. This one-stop manufacturing solution allows us to better serve our customers, many of whom are based in time-critical high growth markets, enabling our customers to reduce the time required to develop new products and bring them to market. We utilize a facility specialization strategy in which each customer is directed to the facility best suited to the customer's product type, delivery time, complexity and volume needs, which enables us to reduce the time from order placement to delivery. As our customers ramp to volume, we are positioned to seamlessly transition them to one of our volume facilities in China.

Leading aerospace and defense supplier. We provide the aerospace and defense industry with products in North America from our broad North American footprint. We have passed OEM and government certification processes, and administrative requirements associated with participation in government and commercial aerospace programs. When supplying various departments and agencies of the U.S. government, we are required to maintain facility security clearances under the National Industrial Security Program Operating Manual and International Traffic in Arms Regulations. Along with supply of traditional and RF PCBs, we offer our engineering services and assembly capabilities which allow us to bring additional value to our customers.

[Table of Contents](#)

Seasonality

Orders for our products generally correspond to the production schedules of our customers. We historically experience higher net sales in the third and fourth quarters due to end customer demand in the fourth quarter for consumer electronics products. Seasonal fluctuations also include the Chinese New Year holidays in the first quarter, which typically results in lower net sales. We attribute this decline to shutdowns of our customers' and our own China based manufacturing facilities surrounding the Chinese New Year public holidays, which normally occur in January or February of each year.

Backlog

Backlog consists of purchase orders received, including, in some instances, demand agreements released for production under customer contracts. We obtain firm purchase orders from our customers for all products. However, for some of these purchase orders, customers do not make firm schedules for delivery more than 90 days in advance. Therefore, we measure backlog as orders with deliveries scheduled over the next 90 days. At January 1, 2018, total backlog was \$481.9 million, compared with \$405.3 million at the end of 2016. Substantially all backlog at January 1, 2018 is expected to be converted to sales in the first quarter of 2018. Additionally, we typically experience a higher amount of backlog in the second half of the year due to increased end customer demand for consumer electronics products in the fourth quarter, which is consistent with our seasonal patterns as discussed above.

Intellectual Property

We believe our business depends on the effectiveness of our fabrication techniques and our ability to continue to improve our manufacturing processes. We have limited patent or trade secret protection for our manufacturing processes. We rely on the collective experience of our employees in the manufacturing process to ensure that we continuously evaluate and adopt the new technologies available in our industry. In addition, we depend on training, recruiting, and retaining our employees, who are required to have sufficient know-how to operate advanced equipment and to conduct complicated manufacturing processes.

National Security Matters

A portion of our business consists of manufacturing defense and defense-related items for various departments and agencies of the U.S. government, including the U.S. Department of Defense, (DoD), which requires that we maintain facility security clearances under the National Industrial Security Program Operating Manual, or NISPOM. The NISPOM requires that a corporation with significant foreign ownership maintaining a facility security clearance take steps to prevent foreign control or influence, referred to as "FOCI." Pursuant to these laws and regulations, effective October 2010, we entered into a Special Security Agreement (SSA) with the DoD; Su Sih (BVI) Limited, or Su Sih (a significant foreign owner of our capital stock); and Mr. Tang Hsiang Chien (as the beneficial owner of Su Sih). The purpose of the SSA is to deny Mr. Tang, Su Sih, and other persons affiliated with our China operations, unauthorized access to classified and export controlled unclassified information and to mitigate any influence over our business or management in a manner that could result in the compromise of classified information or could adversely affect the performance of classified contracts.

Other Governmental Regulations

Our operations, particularly those in North America, are subject to a broad range of regulatory requirements relating to export control, environmental compliance, waste management, and health and safety matters. In particular, we are subject to the following:

- U.S. Department of State regulations, including the Arms Export Control Act (AECA) and International Traffic In Arms Regulations (ITAR) located at 22 CFR Parts 120-130;
- U.S. Department of Commerce regulations, including the Export Administration Regulations (EAR) located at 15 CFR Parts 730-744;
- Office of Foreign Asset Control (OFAC) regulations located at 31 CFR Parts 500-599;

Table of Contents

- U.S. Occupational Safety and Health Administration (OSHA), and state OSHA and Department of Labor laws pertaining to health and safety in the workplace;
- U.S. Environmental Protection Agency regulations pertaining to air emissions; waste water discharges; and the use, storage, discharge, and disposal of hazardous chemicals used in the manufacturing processes; the reporting of chemical releases to the environment; and the reporting of chemicals manufactured in by-products that are beneficially recycled;
- Department of Homeland Security regulations regarding the storage of certain chemicals of interest;
- corresponding state laws and regulations, including site investigation and remediation;
- corresponding U.S., county and city agencies;
- corresponding regulations and agencies in China for our Chinese facilities;
- material content directives and laws that ban or restrict certain hazardous substances in products sold in member states of the European Union, China, and other countries and jurisdictions;
- SEC rules that require reporting of the use of certain metals (conflict minerals) originating in the Democratic Republic of the Congo and the 9 countries surrounding it pursuant to Section 1502 of the Dodd-Frank Act; and
- reporting requirements of the California Transparency in Supply Chains Act of 2010 that requires reporting on efforts to eradicate slavery and human trafficking in retailers' and manufacturers' supply chains.

The process to manufacture PCBs requires adherence to domestic and foreign environmental regulations regarding the storage, use, handling, recycling, and disposal of chemicals, solid wastes and other hazardous materials, as well as compliance with air quality standards and chemical use reporting. We believe that our facilities in the United States and Canada comply in all material respects with applicable environmental laws and regulations. In China, governmental authorities have adopted new rules and regulations governing environmental issues. Our plants in China are not yet in full compliance with the newly adopted environmental regulations. We have developed plans in response to the new regulation and we are in the process of implementing these plans. We have established and enacted an investment plan related to the efforts to come into full compliance with the new regulations. There can be no assurance that violations will not occur in the future.

Employees

As of January 1, 2018, we had approximately 29,000 employees. Of our employees, approximately 27,540 were involved in manufacturing and engineering, 670 worked in sales and marketing, and approximately 790 worked in accounting, information systems and other support capacities. None of our North American employees are represented by unions. In China, approximately 21,350 employees are members of the All-China Federation of Trade Unions and accordingly are considered to be represented by a labor union. We have not experienced any labor problems resulting in a work stoppage and we believe that we have good relations with our employees.

Availability of Reports Filed with the Securities and Exchange Commission

We are a Delaware corporation founded in 1998, with our principal executive offices located at 1665 Scenic Avenue, Suite 250, Costa Mesa, CA 92626. Our telephone number is (714) 327-3000. Our website address is www.ttm.com. Information included on our website is not incorporated into this report. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports are available without charge on our website at www.ttm.com/investors/investor_sec.aspx, as soon as reasonably practicable after they are filed electronically with the Securities and Exchange Commission (SEC). Copies are also available without charge by (i) telephonic request by calling our Investor Relations Department at (714) 327-3000, (ii) e-mail request to investor@ttmtech.com, or (iii) a written request to TTM Technologies, Inc., Attention: Investor Relations, 1665 Scenic Avenue, Suite 250, Costa Mesa, CA 92626.

[Table of Contents](#)

ITEM 1A. RISK FACTORS.

An investment in our common stock involves a high degree of risk. You should carefully consider the factors described below, in addition to those discussed elsewhere in this report, in analyzing an investment in our common stock. If any of the events described below occurs, our business, financial condition, and results of operations would likely suffer, the trading price of our common stock could fall, and you could lose all or part of the money you paid for our common stock. The risk factors described below are not the only ones we face. Risks and uncertainties not known to us currently, or that may appear immaterial, also may have a material adverse effect on our business, financial condition, and results of operations.

In addition, the following risk factors and uncertainties could cause our actual results to differ materially from those projected in our forward-looking statements, whether made in this report or the other documents we file with the SEC, or our annual or quarterly reports to stockholders, future press releases, or orally, whether in presentations, responses to questions, or otherwise.

Risks Related to our Business

Uncertainty and adverse changes in the economy and financial markets could have an adverse impact on our business and operating results.

Uncertainty or adverse changes in the economy could lead to a significant decline in demand for the end products manufactured by our customers, which, in turn, could result in a decline in the demand for our products and pressure to reduce our prices. Any decrease in demand for our products could have an adverse impact on our financial condition, operating results and cash flows. Uncertainty and adverse changes in the economy could also increase the cost and decrease the availability of potential sources of financing and increase our exposure to losses from bad debts, either of which could have a material adverse effect on our financial condition, operating results and cash flows.

We have pursued and intend to continue to pursue acquisitions of other businesses and may encounter risks associated with these activities, which could harm our business and operating results.

As part of our business strategy, we expect that we will continue to grow by pursuing acquisitions of businesses, technologies, assets, or product lines that complement or expand our business. Risks related to an acquisition may include:

- the potential inability to successfully integrate acquired operations and businesses or to realize anticipated synergies, economies of scale, or other expected value;
- diversion of management's attention from normal daily operations of our existing business to focus on integration of the newly acquired business;
- unforeseen expenses associated with the integration of the newly acquired business;
- difficulties in managing production and coordinating operations at new sites;
- the potential loss of key employees of acquired operations;
- the potential inability to retain existing customers of acquired companies when we desire to do so;
- insufficient revenues to offset increased expenses associated with acquisitions;
- the potential decrease in overall gross margins associated with acquiring a business with a different product mix;
- the inability to identify certain unrecorded liabilities;
- the potential need to restructure, modify, or terminate customer relationships of the acquired company;
- an increased concentration of business from existing or new customers; and
- the potential inability to identify assets best suited to our business plan.

[Table of Contents](#)

Acquisitions may cause us to:

- enter lines of business and/or markets in which we have limited or no prior experience;
- issue debt and be required to abide by stringent loan covenants;
- assume liabilities; record goodwill and indefinite-lived intangible assets that will be subject to impairment testing and potential periodic impairment charges;
- become subject to litigation and environmental issues, which include product material content certifications related to conflict minerals;
- incur unanticipated costs;
- incur large and immediate write-offs; and
- incur substantial transaction-related costs, whether or not a proposed acquisition is consummated.

Acquisitions of high technology companies are inherently risky, and no assurance can be given that our recent or future acquisitions will be successful. Failure to manage and successfully integrate acquisitions we make could have a material adverse effect on our business, financial condition, and results of operations. Even when an acquired company has already developed and marketed products, product enhancements may not be made in a timely fashion. In addition, unforeseen issues might arise with respect to such products after any such acquisition.

We have substantial outstanding indebtedness, and our outstanding indebtedness could adversely impact our liquidity and flexibility in obtaining additional financing, our ability to fulfill our debt obligations and our financial condition and results of operations.

We have substantial debt and, as a result, we have significant debt service obligations. We maintain \$250.0 million of Convertible Senior Notes due 2020 at an interest rate of 1.75%, a \$349.1 million Term Loan Facility due 2024 (Term Loan Facility) at a floating rate of LIBOR plus 2.5%, \$375.0 million of Senior Notes due 2025 (Senior Notes) at an interest rate of 5.63%, a \$200.0 million U.S. Asset-Based Lending Credit Agreement (U.S. ABL), and a \$150.0 million Asia Asset-Based Lending Credit Agreement (Asia ABL). We and a number of our direct and indirect subsidiaries also have various credit facilities and letters of credit. Such agreements also contain certain financial covenants which require us to maintain, under the occurrence of certain events, a consolidated fixed charge coverage ratio.

In addition, in conjunction with the pending acquisition of Anaren, we received commitments to fund new \$700.0 million secured senior incremental term loan (Incremental Facility). Subsequent to January 1, 2018, we completed the allocation of \$600.0 million of commitments from lenders in the syndication for the Incremental Facility, which supersedes the original \$700.0 million commitment.

Subject to the limits contained in the credit agreements governing the Term Loan Facility (including the Incremental Facility), the U.S. ABL, the Asia ABL, the indenture governing the Senior Notes, and our other debt instruments, we may be able to incur substantial additional debt from time to time to finance working capital, capital expenditures, investments or acquisitions, or for other purposes. If we do so, the risks related to our high level of debt could intensify. Specifically, our high level of debt could have important consequences to us and our shareholders. For example, it could:

- make it more difficult for us to satisfy our obligations with respect to our indebtedness, which could in turn result in an event of default on such indebtedness;
- require us to use a substantial portion of our cash flow from operations for debt service payments, thereby reducing the availability of cash for working capital, capital expenditures, acquisitions and other general corporate purposes;
- impair our ability to obtain additional financing in the future for working capital, capital expenditures, acquisitions and other investments or general corporate purposes, which may limit our ability to execute our business strategy;
- diminish our ability to withstand a downturn in our business, the industry in which we operate or the economy generally and restrict us from exploiting business opportunities or making acquisitions;

Table of Contents

- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate or the general economy;
- increase our vulnerability to general adverse economic and industry conditions, including movements in interest rates, which could result in increased borrowing costs;
- limit management's discretion in operating our business; and
- place us at a competitive disadvantage as compared to our competitors that have less debt as it could limit our ability to capitalize on future business opportunities and to react to competitive pressures or adverse changes.

In addition, the indenture governing the Senior Notes and the credit agreements governing the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL contain restrictive covenants that will limit our ability to engage in activities that may be in our long-term best interest. Our failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of all our debt.

Servicing our debt requires a significant amount of cash and we may not be able to generate sufficient cash to service all of our debt and may be forced to take other actions to satisfy our obligations under our debt, which may not be successful.

We are required to make scheduled payments on all term loan facilities on a quarterly basis. Based on certain parameters defined in the term loan facilities, including a First Lien Leverage Ratio, we may be required to make an additional principal payment on an annual basis, beginning after fiscal year 2018, if our First Lien Leverage Ratio is greater than 2.0.

Our ability to make scheduled payments on or to refinance our debt obligations and to fund planned capital expenditures and expansion efforts depends on our ability to generate cash in the future and our financial condition and operating performance, which are subject to prevailing economic and competitive conditions and to certain regulatory, competitive, financial, business and other factors beyond our control. We cannot assure you that we will maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our debt.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we could face substantial liquidity problems and could be forced to reduce or delay investments and capital expenditures or to dispose of material assets or operations, seek additional capital (which could include obtaining additional equity capital on terms that may be onerous or highly dilutive) or restructure or refinance our indebtedness. We may not be able to effect any such alternative measures, if necessary, on commercially reasonable terms or at all and, even if successful, those alternative actions may not allow us to meet our scheduled debt service obligations. The credit agreements governing the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL, the indenture governing the Senior Notes will restrict our ability to dispose of assets and use the proceeds from those dispositions and may also restrict our ability to raise debt or equity capital to be used to repay other indebtedness when it becomes due. We may not be able to consummate those dispositions or to obtain proceeds in an amount sufficient to meet any debt service obligations then due.

In addition, we conduct certain of our operations through our subsidiaries. Accordingly, repayment of our indebtedness may be dependent on the generation of cash flow by our subsidiaries and their ability to make such cash available to us, by dividend, debt repayment or otherwise. Unless they are guarantors of the Senior Notes or our other indebtedness, our subsidiaries do not have any obligation to pay amounts due on our indebtedness or to make funds available for that purpose. Our subsidiaries may not be able to, or may not be permitted to, make distributions to enable us to make payments in respect of our indebtedness. Each subsidiary is a distinct legal entity, and under certain circumstances, legal and contractual restrictions may limit our ability to obtain cash from our subsidiaries. While the indenture governing the Senior Notes and the credit agreements governing the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL will limit the ability of our subsidiaries to incur consensual restrictions on their ability to pay dividends or make other intercompany payments to us, these limitations are subject to qualifications and exceptions. In the event that we do not receive distributions from our subsidiaries, we may be unable to make required principal and interest payments on our indebtedness.

[Table of Contents](#)

Our inability to generate sufficient cash flows to satisfy our debt obligations, or to refinance our indebtedness on commercially reasonable terms or at all, would materially and adversely affect our financial position and results of operations and our ability to satisfy our obligations under our indebtedness.

If we cannot make scheduled payments on our debt, we will be in default and holders of the Senior Notes could declare all outstanding principal and interest to be due and payable, the lenders under the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL could terminate their commitments to loan money, the lenders could foreclose against the assets securing their borrowings and we could be forced into bankruptcy or liquidation.

Despite our current level of indebtedness, we and our subsidiaries may still be able to incur substantially more debt. This could further exacerbate the risks to our financial condition described above.

We and our subsidiaries may be able to incur significant additional indebtedness in the future. Although the indenture governing the Senior Notes and the credit agreements governing the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL will contain restrictions on the incurrence of additional indebtedness, these restrictions are subject to a number of qualifications and exceptions, and the additional indebtedness incurred in compliance with these restrictions could be substantial. These restrictions also will not prevent us from incurring obligations that do not constitute indebtedness.

Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.

Borrowings under the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL are at variable rates of interest and expose us to interest rate risk. If interest rates were to increase, our debt service obligations on the variable rate indebtedness would increase even though the amount borrowed remained the same, and our net income and cash flows, including cash available for servicing our indebtedness, will correspondingly decrease. For illustrative purposes and assuming all loans under the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL were fully drawn, each quarter point change in interest rates would result in a \$3.3 million change in annual interest expense on our indebtedness under the Term Loan Facility (including the Incremental Facility), the U.S. ABL and the Asia ABL. In the future, we may enter into interest rate swaps that involve the exchange of floating for fixed rate interest payments in order to reduce interest rate volatility. However, we may not maintain interest rate swaps with respect to all of our variable rate indebtedness, and any swaps we enter into may not fully mitigate our interest rate risk.

A lowering or withdrawal of the ratings assigned to our debt securities by rating agencies may increase our future borrowing costs and reduce our access to capital.

When issued, our debt will have a non-investment grade rating, and any rating assigned could be lowered or withdrawn entirely by a rating agency if, in that rating agency's judgment, future circumstances relating to the basis of the rating, such as adverse changes, so warrant. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the Senior Notes. Credit ratings are not recommendations to purchase, hold or sell the Senior Notes. Additionally, credit ratings may not reflect the potential effect of risks relating to the structure or marketing of the Senior Notes.

Any future lowering of our ratings likely would make it more difficult or more expensive for us to obtain additional debt financing.

Recently enacted changes in tax law could materially affect our financial position and results of operations.

On December 22, 2017, the President of the United States signed into law H.R. 1 (the "U.S. Tax Reform"). We are in the process of determining the impact to our financial statements of all aspects of U.S. Tax Reform and intend to reflect the impact of such reform in the financial statements during the period in which such amounts can be reasonably estimated. The U.S. Tax Reform includes a number of provisions, including the lowering of the U.S. corporate tax rate from 35% to 21%, effective January 1, 2018. There are also provisions that may partially offset the benefit of such rate reduction, such as the repeal of the deduction for domestic production activities. The U.S. Tax Reform also includes international provisions, which generally establish a territorial-

[Table of Contents](#)

style system for taxing foreign-source income of domestic multinational corporations. Financial statement impacts could include adjustments for the re-measurement of deferred tax assets (liabilities) and the accrual for deemed repatriation tax on unremitted foreign earnings and profits. There is substantial uncertainty regarding the details of the U.S. Tax Reform. The intended and unintended consequences of the U.S. Tax Reform on our business are not yet widely understood and, due to the large and expanding scale of our international business activities, the changes to the taxation of our activities effected by the U.S. Tax Reform could increase our worldwide effective tax rate and could materially impact our financial position or results of operations.

We rely on the cellular phone and mobile technology industry for a significant portion of sales. The economic volatility in this industry has had, and may continue to have, a material adverse effect on our ability to forecast demand and production and to meet desired sales levels.

A large percentage of our business is conducted with customers who are in the cellular phone and mobile technology industry. This industry is characterized by intense competition, short product life cycles, seasonality, particularly around the year-end holiday season, and significant fluctuations in consumer demand. This industry is heavily dependent on consumers and therefore can be affected by their demand patterns. If the volatility in this industry continues, it may have a material adverse effect on our business, financial condition, and results of operations.

If we are unable to respond to rapid technological change and process development, we may not be able to compete effectively.

The market for our manufacturing services is characterized by rapidly changing technology and continual implementation of new production processes. The future success of our business will depend in large part upon our ability to maintain and enhance our technological capabilities, to manufacture products that meet changing customer needs, and to successfully anticipate or respond to technological changes on a cost-effective and timely basis. We expect that the investment necessary to maintain our technological position will increase as customers make demands for products and services requiring more advanced technology on a quicker turnaround basis. For example, in 2018 we expect to continue to make significant capital expenditures to expand our HDI, mSAP, and other advanced manufacturing capabilities. We may not be able to obtain access to additional sources of funds in order to respond to technological changes as quickly as our competitors. In addition, failure to adopt and implement technological improvements quickly may cause inefficiencies as our product yields or quality may decrease, resulting in increased costs.

In addition, the PCB industry could encounter competition from new or revised manufacturing and production technologies that render existing manufacturing and production technology less competitive or obsolete. We may not respond effectively to the technological requirements of the changing market. If we need new technologies and equipment to remain competitive, the development, acquisition, and implementation of those technologies and equipment will require us to make significant capital investments.

An increase in the cost of raw materials could have a material adverse effect on our business, financial condition, and results of operations and reduce our gross margins.

To manufacture PCBs, we use raw materials such as laminated layers of fiberglass, copper foil, chemical solutions, gold, and other commodity products, which we order from our suppliers. In the case of backplane assemblies, components include connectors, sheet metal, capacitors, resistors and diodes, many of which are custom made and controlled by our customers' approved vendors. If raw material and component prices increase, it may reduce our gross margins.

We are subject to risks of currency fluctuations.

A portion of our cash and other current assets is held in currencies other than the U.S. dollar. Changes in exchange rates among other currencies and the U.S. dollar will affect the value of these assets as translated to U.S. dollars on our balance sheet. To the extent that we ultimately decide to repatriate some portion of these funds to the United States, the actual value transferred could be impacted by movements in exchange rates. Any such type of movement could negatively impact the amount of cash available to fund operations or to repay debt.

[Table of Contents](#)

To the extent that we may have outstanding receivables or indebtedness denominated in the U.S. dollar or in the Hong Kong dollar (HKD), the fluctuation of the Chinese Renminbi (RMB) against the U.S. dollar or the HKD may have a material adverse effect on our business, financial condition, and results of operations (including the cost of servicing, and the value on our balance sheet of, the U.S. dollar and HKD-denominated indebtedness). Additionally, we have revenues and costs denominated in currencies other than the U.S. dollar (primarily the RMB). Fluctuations in the exchange rates between the U.S. dollar and the RMB could result in increases or decreases in our costs or revenues which could negatively impact our business, financial condition, and results of operations. Significant inflation or disproportionate changes in foreign exchange rates could occur as a result of general economic conditions, acts of war or terrorism, changes in governmental monetary or tax policy, or changes in local interest rates. For the year ended January 1, 2018, our consolidated statement of operations included a foreign exchange loss of approximately \$22.8 million due primarily to the appreciation of the RMB against the U.S. dollar and the HKD. The impact of future exchange rate fluctuations between the U.S. dollar and the RMB and the U.S. dollar and the HKD cannot be predicted. Further, China's government imposes controls over the convertibility of RMB into foreign currencies, which subjects us to further currency exchange risk.

Products we manufacture may contain design or manufacturing defects, which could result in reduced demand for our services and liability claims against us.

We manufacture products to our customers' specifications, which are highly complex and may contain design or manufacturing errors or failures, despite our quality control and quality assurance efforts. Defects in the products we manufacture, whether caused by a design, manufacturing, or materials failure or error, may result in delayed shipments, customer dissatisfaction, a reduction or cancellation of purchase orders, or liability claims against us. If these defects occur either in large quantities or too frequently, our business reputation may be impaired. Since our products are used in products that are integral to our customers' businesses, errors, defects, or other performance problems could result in financial or other damages to our customers beyond the cost of the PCB, for which we may be liable. Although our invoices and sales arrangements generally contain provisions designed to limit our exposure to product liability and related claims, existing or future laws or unfavorable judicial decisions could negate these limitation of liability provisions. In addition, we manufacture products for a range of automotive customers. If any of our products are or are alleged to be defective, we may be required to participate in a recall of such products. As suppliers become more integral to the vehicle design process and assume more of the vehicle assembly functions, vehicle manufacturers are increasingly looking to their suppliers for contributions when faced with product liability claims or recalls. In addition, vehicle manufacturers, which have traditionally borne the costs associated with warranty programs offered on their vehicles, are increasingly requiring suppliers to guarantee or warrant their products and may seek to hold us responsible for some or all of the costs related to the repair and replacement of parts supplied by us to the vehicle manufacturer.

We depend upon a relatively small number of OEM customers for a large portion of our sales, and a decline in sales to major customers would materially adversely affect our business, financial condition, and results of operations.

A small number of customers are responsible for a significant portion of our sales. Our five largest OEM customers accounted for approximately 37%, 33% and 37% of our net sales for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively, and one customer represented 20% of our sales for the year ended January 1, 2018. Sales attributed to OEMs include both direct sales as well as sales that the OEMs place through EMS providers. Our customer concentration could fluctuate, depending on future customer requirements, which will depend in large part on market conditions in the electronics industry segments in which our customers participate. The loss of one or more significant customers or a decline in sales to our significant customers would materially adversely affect our business, financial condition, and results of operations. In addition, we generate significant accounts receivable in connection with providing manufacturing services to our customers. If one or more of our significant customers were to become insolvent or were otherwise unable to pay for the manufacturing services provided by us, our business, financial condition, and results of operations would be materially adversely affected.

In addition, during industry downturns, we may need to reduce prices to limit the level of order losses, and we may be unable to collect payments from our customers. There can be no assurance that key customers would

[Table of Contents](#)

not cancel orders, that they would continue to place orders with us in the future at the same levels as experienced by us in prior periods, that they would be able to meet their payment obligations, or that the end-products that use our products would be successful. This concentration of customer base may materially adversely affect our business, financial condition, and results of operations due to the loss or cancellation of business from any of these key customers, significant changes in scheduled deliveries to any of these customers, or decreases in the prices of the products sold to any of these customers.

If we are unable to maintain satisfactory capacity utilization rates, our business, financial condition, and results of operations would be materially adversely affected.

Given the high fixed costs of our operations, decreases in capacity utilization rates can have a significant effect on our business. Accordingly, our ability to maintain or enhance gross margins will continue to depend, in part, on maintaining satisfactory capacity utilization rates. In turn, our ability to maintain satisfactory capacity utilization will depend on the demand for our products, the volume of orders we receive, and our ability to offer products that meet our customers' requirements at competitive prices. If current or future production capacity fails to match current or future customer demands, our facilities would be underutilized, our sales may not fully cover our fixed overhead expenses, and we would be less likely to achieve expected gross margins. If forecasts and assumptions used to support the realizability of our long-lived assets change in the future, significant impairment charges could result that would materially adversely affect our business, financial condition, and results of operations.

In addition, we generally schedule our quick turnaround production facilities at less than full capacity to retain our ability to respond to unexpected additional quick-turn orders. However, if these orders are not received, we may forego some production and could experience continued excess capacity. If we conclude we have significant, long-term excess capacity, we may decide to permanently close one or more of our facilities and lay off some of our employees. Closures or lay-offs could result in our recording restructuring charges such as severance, other exit costs, and asset impairments, as well as potentially causing disruptions in our ability to supply customers.

We are heavily dependent upon the worldwide electronics industry, which is characterized by economic cycles and fluctuations in product demand. A downturn in the electronics industry or prolonged global economic crisis could result in decreased demand for our manufacturing services and materially adversely affect our business, financial condition, and results of operations.

A majority of our revenue is generated from the electronics industry, which is characterized by intense competition, relatively short product life cycles, and significant fluctuations in product demand. The industry is subject to economic cycles and recessionary periods. Due to the uncertainty in the end markets served by most of our customers, we have a low level of visibility with respect to future financial results. Consequently, our past operating results, earnings, and cash flows may not be indicative of our future operating results, earnings, and cash flows.

We participate in the competitive, cyclical automotive industry, which is subject to strict quality control standards. Failure to meet quality standards may adversely affect our business, financial condition and results of operations.

A significant portion of our sales are to customers within the automotive industry. The automotive industry has historically experienced multi-year cycles of growth and decline. In recent years, we have witnessed a growth cycle. If sales of automobiles should decline or go into a cyclical downturn, our sales could decline and this could have a materially adverse impact on our business, financial condition and result of operations.

In addition, for safety reasons, automotive customers have strict quality standards that generally exceed the quality requirements of other customers. If such products do not meet these quality standards, our business, financial condition, and results of operations may be materially adversely affected. These automotive customers may require long periods of time to evaluate whether our manufacturing processes and facilities meet their quality standards. If we were to lose automotive customers due to quality control issues, we might not be able to regain those customers or gain new automotive customers for long periods of time, which could have a material adverse effect on our business, financial condition, and results of operations. Moreover, we may be required under our contracts with automotive industry customers to indemnify them for the cost of warranties and recalls relating to our products.

Our results can be adversely affected by rising labor costs.

There is uncertainty with respect to rising labor costs, particularly within China, where we have most of our manufacturing facilities. In recent periods there have been regular and significant increases in the minimum wage payable in various provinces of China. In addition, we have experienced very high employee turnover in our manufacturing facilities in China, generally after the Chinese New Year, and we are experiencing ongoing difficulty in recruiting employees for these facilities. Furthermore, labor disputes and strikes based partly on wages have in the past slowed or stopped production by certain manufacturers in China. In some cases, employers have responded by significantly increasing the wages of workers at such plants. Any increase in labor costs due to minimum wage laws or customer requirements about scheduling and overtime that we are unable to recover in our pricing to our customers could materially adversely affect our business, financial condition, and results of operations. In addition, the high turnover rate and our difficulty in recruiting and retaining qualified employees and the other labor trends we are noting in China could result in a potential for defects in our products, production disruptions or delays, or the inability to ramp production to meet increased customer orders, resulting in order cancellation or imposition of customer penalties if we are unable to deliver products in a timely manner.

To respond to competitive pressures and customer requirements, we may further expand internationally in lower-cost locations. If we pursue such expansions, we may be required to make additional capital expenditures. In addition, the cost structure in certain countries that are now considered to be favorable may increase as economies develop or as such countries join multinational economic communities or organizations, causing local wages to rise. As a result, we may need to continue to seek new locations with lower costs and the employee and infrastructure base to support PCB manufacturing. We cannot assure investors that we will realize the anticipated strategic benefits of our international operations or that our international operations will contribute positively to our operating results.

In our North America operations, rising labor and health care costs pose a significant risk. We work with our insurance brokers and carriers to control the cost of health care for our employees. However, there can be no assurance that our efforts will succeed, especially given recent and pending changes in government oversight of health care.

Our results of operations are often subject to demand fluctuations and seasonality. With a high level of fixed operating costs, even small revenue shortfalls would decrease our gross margins.

Our results of operations fluctuate for a variety of reasons, including:

- timing of orders from and shipments to major customers;
- the levels at which we utilize our manufacturing capacity;
- price competition;
- changes in our mix of revenues generated from quick-turn versus standard delivery time services;
- expenditures, charges or write-offs, including those related to acquisitions, facility restructurings, or asset impairments; and
- expenses relating to expanding existing manufacturing facilities.

A significant portion of our operating expenses is relatively fixed in nature, and planned expenditures are based in part on anticipated orders. Accordingly, unexpected revenue shortfalls may decrease our gross margins. In addition, we have experienced sales fluctuations due to seasonal patterns in the capital budgeting and purchasing cycles, as well as inventory management practices of our customers and the end markets we serve. In particular, the seasonality of the cellular phone and tablet industries and quick-turn ordering patterns affect the overall PCB industry. These seasonal trends have caused fluctuations in our operating results in the past and may continue to do so in the future. Results of operations in any period should not be considered indicative of the results that may be expected for any future period. In addition, our future quarterly operating results may fluctuate and may not meet the expectations of securities analysts or investors.

[Table of Contents](#)

We rely on the telecommunication industry for a significant portion of sales. The economic volatility in this industry has had, and may continue to have, a material adverse effect on our ability to forecast demand and production and to meet desired sales levels.

A large percentage of our business is conducted with customers who are in the telecommunication industry. This industry is characterized by intense competition, relatively short product life cycles, and significant fluctuations in product demand. This industry is heavily dependent on the end markets it serves and therefore can be affected by the demand patterns of those markets. If the volatility in this industry continues, it may have a material adverse effect on our business, financial condition, and results of operations.

Unanticipated changes in our tax rates or in our assessment of the realizability of our deferred income tax assets or exposure to additional income tax liabilities could affect our business, financial condition, and results of operations.

We are subject to income taxes in the United States and various foreign jurisdictions. Significant judgment is required in determining our provision for income taxes and, in the ordinary course of business, there are many transactions and calculations in which the ultimate tax determination is uncertain. Our effective tax rates could be materially adversely affected by changes in the mix of earnings in countries and states with differing statutory tax rates, changes in the valuation of deferred income tax assets and liabilities, changes in tax laws, as well as other factors. Our tax determinations are regularly subject to audit by tax authorities, and developments in those audits could adversely affect our income tax provision. Although we believe that our tax estimates are reasonable, the final determination of tax audits or tax disputes may be different from what is reflected in our historical income tax provisions, which could materially adversely affect our business, financial condition, and results of operations.

If our net earnings do not remain at or above recent levels, or we are not able to predict with a reasonable degree of probability that they will continue, we may have to record a valuation allowance against our net deferred income tax assets.

Certain of our foreign subsidiaries have deferred income tax assets. Based on our forecast for future taxable earnings for these foreign subsidiaries, we believe we will utilize the deferred income tax assets in future periods. However, if our estimates of future earnings decline, we may have to increase our valuation allowance against our net deferred income tax assets, resulting in a higher income tax provision, which would reduce our results of operations.

Issues arising during the upgrade of our enterprise resource planning system could affect our operating results and ability to manage our business effectively.

We are in the process of upgrading our enterprise resource planning, or ERP, management system to enhance operating efficiencies and provide more effective management of our business operations. We are investing significant financial and personnel resources into this project. However, there is no assurance that the system upgrade will meet our current or future business needs or that it will operate as designed. The transition to the new ERP system will affect numerous systems necessary for our operation. If we fail to correctly implement one or more components of the ERP system, we could experience significant disruption to our operations. Such disruptions could include, among other things, temporary loss of data, inability to process certain orders, failure of systems to communicate with each other and the inability to track or reconcile key data. We are heavily dependent on automated management systems, and any significant failure or delay in the system upgrade could cause a substantial interruption to our business and additional expense, which could result in an adverse impact on our operating results, cash flows or financial condition.

We have a significant amount of goodwill, indefinite-lived intangible assets, and other intangible assets on our consolidated balance sheet. If our goodwill, indefinite-lived intangible assets, or other intangible assets become impaired in the future, we would be required to record a non-cash charge to earnings, which may be material and would also reduce our stockholders' equity.

As of January 1, 2018, our consolidated balance sheet reflected \$475.5 million of goodwill and definite-lived intangible assets. We periodically evaluate whether events and circumstances have occurred, such that the

[Table of Contents](#)

potential for reduced expectations for future cash flows coupled with further decline in the market price of our stock and market capitalization may indicate that the remaining balance of goodwill and definite-lived intangible assets may not be recoverable. If factors indicate that assets are impaired, we would be required to reduce the carrying value of our goodwill and definite-lived intangible assets, which could harm our results during the periods in which such a reduction is recognized.

Our ability to use net operating loss carryforwards to offset future taxable income for U.S. federal income tax purposes is subject to limitations, and future transfers of shares of our common stock, when aggregated with the November 2016 and February 2017 secondary sales of our shares, could cause us to experience an “ownership change” that could further limit our ability to utilize our net operating losses.

Under U.S. federal income tax law, a corporation’s ability to utilize its net operating losses (NOL’s) to offset future taxable income may be significantly limited if it experiences an “ownership change” as defined in Section 382 of the Internal Revenue Code of 1986, as amended (the Code). In general, an ownership change will occur if there is a cumulative change in a corporation’s ownership by “5-percent shareholders” that exceeds 50 percentage points over a rolling three-year period.

A corporation that experiences an ownership change will generally be subject to an annual limitation on its pre-ownership change NOLs equal to the value of the corporation immediately before the ownership change, multiplied by the long-term tax-exempt rate (subject to certain adjustments). The annual limitation for a taxable year is generally increased by the amount of any “recognized built-in gains” for such year and the amount of any unused annual limitation in a prior year. As a result of our acquisition of Viasystems, the NOLs acquired were subject to this limitation. In February 2017 and November 2016, 4,000,000 and 13,800,000 shares of common stock, respectively, were sold by Su Sih, our largest shareholder and a “5-percent shareholder.” Additional future transfers or sales of our common stock during the rolling period by “5-percent shareholders” could cause us to experience an ownership change under Section 382, which could further limit our use of NOLs.

Adverse judgments or settlements resulting from legal proceedings in which we may be involved in the normal course of our business could reduce our profitability or limit our ability to operate our business.

In the normal course of our business, we have been, and may in the future be subject to employee claims based on, among other things, discrimination, minimum wage, overtime pay and other employment related matters. We cannot predict with certainty the cost of defense, the cost of prosecution or the ultimate outcome of these legal proceedings. Any significant adverse determinations, judgments or settlements could reduce our profitability and could materially adversely affect our business, financial condition and results of operations, limit our ability to operate our business or harm our reputation.

Employee strikes and other labor-related disruptions may materially adversely affect our business, financial condition, and results of operations.

Our business is labor intensive, utilizing large numbers of engineering and manufacturing personnel. Strikes or labor disputes with our unionized employees, primarily in China, may adversely affect our ability to conduct our business. If we are unable to reach agreement with any of our unionized work groups on future negotiations regarding the terms of their collective bargaining agreements, we may be subject to work interruptions or stoppages. Any of these events could be disruptive to our operations and could result in negative publicity, loss of contracts, and a decrease in revenues. We may also become subject to additional collective bargaining agreements in the future if more employees or segments of our workforce become unionized, including any of our employees in the United States. We have not experienced any labor problems resulting in a work stoppage since 2013.

We are exposed to the credit risk of some of our customers and to credit exposures in weakened markets.

Most of our sales are on an “open credit” basis, with standard industry payment terms. We monitor individual customer payment capability in granting such open credit arrangements, seek to limit such open credit to amounts we believe the customers can pay, and maintain reserves we believe are adequate to cover exposure

[Table of Contents](#)

for doubtful accounts. During periods of economic downturn in the electronics industry and the global economy, our exposure to credit risks from our customers increases. Although we have programs in place to monitor and mitigate the associated risks, such programs may not be effective in reducing our credit risks.

Additionally, our OEM customers often direct a significant portion of their purchases through a relatively limited number of EMS companies. Sales to EMS companies represented approximately 32%, 35% and 35% of our net sales for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively. Our contractual relationship is often with the EMS companies, who are obligated to pay us for our products. Because we expect our OEM customers to continue to direct our sales to EMS companies, we expect to continue to be subject to this credit risk with a limited number of EMS customers. If one or more of our significant customers were to become insolvent or were otherwise unable to pay us, our business, financial condition, and results of operations would be materially adversely affected.

We rely on suppliers and equipment manufacturers for the timely delivery of raw materials, components, equipment and spare parts used in manufacturing our PCBs and E-M Solutions. If a raw material supplier or equipment manufacturer goes bankrupt, liquidates, consolidates out of existence or fails to satisfy our product quality standards, it could harm our ability to purchase new manufacturing equipment, service the equipment we have, or timely produce our products, thereby affecting our customer relationships.

Consolidations and restructuring in our supplier base and equipment fabricators related to our raw materials purchases or the manufacturing equipment we use to fabricate our products may result in adverse changes in pricing of materials due to reduction in competition among our raw material suppliers or an elimination or shortage of equipment and spare parts from our manufacturing equipment supply base. Suppliers and equipment manufacturers may be impacted by other events outside our control including macro-economic, financial instability, environmental occurrences, or supplier interruptions due to fire, natural catastrophes or otherwise. Suppliers and equipment manufacturers may extend lead times, limit supplies, or increase prices due to capacity constraints or other factors, which could harm our ability to deliver our products on a timely basis and negatively impact our financial results. In addition, in extreme circumstances, the suppliers we purchase from could cease production due to a fire, natural disaster, consolidation or liquidation of their businesses. As such, this may impact our ability to deliver our products on a timely basis and harm our customer relationships and negatively impact our financial results.

We serve customers and have manufacturing facilities outside the United States and are subject to the risks characteristic of international operations.

We have significant manufacturing operations in Asia and Canada and sales offices located in Asia and Europe, and we continue to consider additional opportunities to make foreign investments and construct new foreign facilities.

For the year ended January 1, 2018, we generated approximately 73.2% of our net sales from non-U.S. operations, and a significant portion of our manufacturing material was provided by international suppliers during this period. As a result, we are subject to risks relating to significant international operations, including but not limited to:

- managing international operations;
- imposition of governmental controls;
- unstable regulatory environments;
- compliance with employment laws;
- implementation of disclosure controls, internal controls, financial reporting systems, and governance standards to comply with U.S. accounting and securities laws and regulations;
- limitations on imports or exports of our product offerings;
- fluctuations in the value of local currencies;

[Table of Contents](#)

- inflation or changes in political and economic conditions;
- labor unrest, rising wages, difficulties in staffing, and geographical labor shortages;
- government or political unrest;
- longer payment cycles;
- language and communication barriers, as well as time zone differences;
- cultural differences;
- increases in duties and taxation levied on our products;
- other potentially adverse tax consequences;
- imposition of restrictions on currency conversion or the transfer of funds;
- travel restrictions;
- expropriation of private enterprises;
- the potential reversal of current favorable policies encouraging foreign investment and trade; and
- the potential for strained trade relationships between the United States and its trading partners.

Our operations in China subject us to risks and uncertainties relating to the laws and regulations of China.

Under its current leadership, the government of China has been pursuing economic reform policies, including the encouragement of foreign trade and investment and greater economic decentralization. No assurance can be given, however, that the government of China will continue to pursue such policies, that such policies will be successful if pursued, or that such policies will not be significantly altered from time to time. Despite progress in developing its legal system, China does not have a comprehensive and highly developed system of laws, particularly with respect to foreign investment activities and foreign trade. Enforcement of existing and future laws and contracts is uncertain, and implementation and interpretation thereof may be inconsistent. As the Chinese legal system develops, the promulgation of new laws, changes to existing laws, and the preemption of local regulations by national laws may adversely affect foreign investors. Further, any litigation in China may be protracted and may result in substantial costs and diversion of resources and management's attention. In addition, though changes in government policies and rules are timely published or communicated, there is usually no indication of the duration of any grace period before which full implementation and compliance will be required. As a result, we may operate our business in violation of new rules and policies before full compliance can be achieved. These uncertainties could limit the legal protections available to us.

We depend on the U.S. government for a significant portion of our business, which involves unique risks. Changes in government defense spending or regulations could have a material adverse effect on our business, financial condition, and results of operations.

A significant portion of our revenues is derived from products and services that are ultimately sold to the U.S. government by our OEM and EMS customers and is therefore affected by, among other things, the federal government budget process. We are a supplier, primarily as a subcontractor, to the U.S. government and its agencies, as well as foreign governments and agencies. The contracts between our direct customers and the government end user are subject to political and budgetary constraints and processes, changes in short-range and long-range strategic plans, the timing of contract awards, the congressional budget authorization and appropriation processes, the government's ability to terminate contracts for convenience or for default, as well as other risks, such as contractor suspension or debarment in the event of certain violations of legal and regulatory requirements.

For the year ended January 1, 2018, aerospace and defense sales accounted for approximately 16% of our total net sales. The substantial majority of aerospace and defense sales are related to both U.S. and foreign military and defense programs. While we do not sell any significant volume of products directly to the U.S.

[Table of Contents](#)

government, we are a supplier to the U.S. government and its agencies, as well as foreign governments and agencies. Consequently, our sales are affected by changes in the defense budgets of the U.S. and foreign governments and may be affected by federal budget sequestration measures.

The domestic and international threat of terrorist activity, emerging nuclear states, and conventional military threats have led to an increase in demand for defense products and services and homeland security solutions in the recent past. The U.S. government, however, is facing unprecedented budgeting constraints. The termination or failure to fund one or more significant contracts by the U.S. government could have a material adverse effect on our business, financial condition, and results of operations.

Future changes to the U.S. Munitions List could reduce or eliminate restrictions that currently apply to some of the products we produce. If these regulations or others are changed in a manner that reduces restrictions on products being manufactured overseas, we would likely face an increase in the number of competitors and increased price competition from overseas manufacturers, who are restricted by the current export laws from manufacturing products for U.S. defense systems.

We are subject to the requirements of the National Industrial Security Program Operating Manual for our facility security clearance, which is a prerequisite to our ability to perform on classified contracts for the U.S. government.

A facility security clearance is required in order to be awarded and perform on classified contracts for the Department of Defense and certain other agencies of the U.S. government. As a cleared entity, we must comply with the requirements of the National Industrial Security Program Operating Manual (NISPOM), and any other applicable U.S. government industrial security regulations. Further, due to the fact that a significant portion of our voting equity is owned by a non-U.S. entity, we are required to be governed by and operate in accordance with the terms and requirements of the Special Security Agreement (SSA). The terms of the SSA have been previously disclosed in our SEC filings.

If we were to violate the terms and requirements of the SSA, the NISPOM, or any other applicable U.S. government industrial security regulations (which may apply to us under the terms of classified contracts), we could lose our security clearance. We cannot be certain that we will be able to maintain our security clearance. If for some reason our security clearance is invalidated or terminated, we may not be able to continue to perform on classified contracts and would not be able to enter into new classified contracts, which could materially adversely affect our business, financial condition, and results of operations.

Our failure to comply with the requirements of environmental laws could result in litigation, fines, revocation of permits necessary to our manufacturing processes, or debarment from our participation in federal government contracts.

Our operations are regulated under a number of domestic and foreign environmental and safety laws and regulations that govern, among other things, the discharge of hazardous materials into the air and water, as well as the handling, storage, recycling, and disposal of such materials. These laws and regulations include the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Superfund Amendment and Reauthorization Act, the Comprehensive Environmental Response, Compensation and Liability Act, the Toxic Substances Control Act, and the Federal Motor Carrier Safety Improvement Act, as well as analogous state, local, and foreign laws. Compliance with these environmental laws is a major consideration for us because our manufacturing processes use and generate materials classified as hazardous. Because we use hazardous materials and generate hazardous wastes in our manufacturing processes, we may be subject to potential financial liability for costs associated with the investigation and remediation of our own sites, or sites at which we have arranged for the disposal of hazardous wastes, if such sites become contaminated. Even if we fully comply with applicable environmental laws and are not directly at fault for the contamination, we may still be liable. The wastes we generate include spent ammoniacal and cupric etching solutions, metal stripping solutions, waste acid solutions, waste alkaline cleaners, waste oil, and waste waters that contain heavy metals such as copper, tin, lead, nickel, gold, silver, cyanide, and fluoride, and both filter cake and spent ion exchange resins from equipment used for on-site waste treatment.

Environmental law violations, including the failure to maintain required environmental permits, could subject us to fines, penalties, and other sanctions, including the revocation of our effluent discharge permits. This

[Table of Contents](#)

could require us to cease or limit production at one or more of our facilities and could have a material adverse effect on our business, financial condition, and results of operations. Even if we ultimately prevail, environmental lawsuits against us would be time consuming and costly to defend.

Environmental laws have generally become more stringent and we expect this trend to continue over time, especially in developing countries, imposing greater compliance costs and increasing risks and penalties associated with violation. We operate in environmentally sensitive locations, and we are subject to potentially conflicting and changing regulatory agendas of political, business, and environmental groups. Changes or restrictions on discharge limits, emissions levels, material storage, handling, or disposal might require a high level of unplanned capital investment or relocation to another global location where prohibitive regulations do not exist. It is possible that environmental compliance costs and penalties from new or existing regulations may materially adversely affect our business, financial condition, and results of operations.

We are increasingly required to certify compliance with various material content restrictions in our products based on laws of various jurisdictions or territories such as the Restriction of Hazardous Substances (RoHS) and Registration, Evaluation, Authorization and Restriction of Chemicals, or REACH directives in the European Union and China's RoHS legislation. Similar laws have been adopted in other jurisdictions and may become increasingly prevalent. In addition, we must also certify as to the non-applicability of the EU's Waste Electrical and Electronic Equipment directive for certain products that we manufacture. The REACH directive requires the identification of Substances of Very High Concern, or SVHCs periodically. We must survey our supply chain and certify to the non-presence or presence of SVHCs to our customers. As with other types of product certifications that we routinely provide, we may incur liability and pay damages if our products do not conform to our certifications.

We are also subject to an increasing variety of environmental laws and regulations in China, which impose limitations on the discharge of pollutants into the air and water and establish standards for the treatment, storage, and disposal of solid and hazardous wastes. The manufacturing of our products generates gaseous chemical wastes, liquid wastes, waste water, and other industrial wastes from various stages of the manufacturing process. Production sites in China are subject to increasing regulation and periodic monitoring by the relevant environmental protection authorities. Environmental claims or the failure to comply with current or future regulations could result in the assessment of damages or imposition of fines against us, suspension of production, or cessation of operations.

The process to manufacture PCBs requires adherence to domestic and foreign environmental regulations regarding the storage, use, handling, recycling, and disposal of chemicals, solid wastes, and other hazardous materials, as well as compliance with air quality standards and chemical use reporting. In China, governmental authorities have adopted new rules and regulations governing environmental issues. An update to Chinese environmental waste water law was issued in late 2012, allowing for an interim period in which plants subject to such law may install equipment that meet the new regulatory regime. Our plants in China are not yet in full compliance with the newly adopted environmental regulations. We have developed plans to these new regulations and we are in the process of implementing these plans. However, there can be no assurance that violations will not occur in the future.

Competition in the PCB market is intense, and we could lose market share if we are unable to maintain our current competitive position in end markets using our quick-turn, high technology, and high-mix manufacturing services.

The PCB industry is intensely competitive, highly fragmented, and rapidly changing. We expect competition to continue, which could result in price reductions, reduced gross margins, and loss of market share. Our principal PCB and substrate competitors include AT & S Austria Technologie & Systemtechnik AG, Chin Poon Industrial Co., LTD., Compeq Manufacturing Co., Ltd., IBIDEN Co., Ltd., ISU Petasys Co., Ltd., Multek Corporation, Sanmina Corporation, Tripod Technology Corp., Unimicron Technology Corp., and Wus Printed Circuit Co., Ltd. Our principal E-M Solutions competitors include Amphenol Corp, Flex, Jabil Circuit, Inc. and Sanmina Corporation. In addition, we increasingly compete on an international basis, and new and emerging technologies may result in new competitors entering our markets.

Table of Contents

Some of our competitors and potential competitors have advantages over us, including:

- greater financial and manufacturing resources that can be devoted to the development, production, and sale of their products;
- more established and broader sales and marketing channels;
- more manufacturing facilities worldwide, some of which are closer in proximity to OEMs;
- manufacturing facilities that are located in countries with lower production costs;
- lower capacity utilization, which in peak market conditions can result in shorter lead times to customers;
- ability to add additional capacity faster or more efficiently;
- preferred vendor status with existing and potential customers;
- greater name recognition; and
- larger customer bases.

In addition, these competitors may respond more quickly to new or emerging technologies or adapt more quickly to changes in customer requirements than we do. We must continually develop improved manufacturing processes to meet our customers' needs for complex products, and our manufacturing process technology is generally not subject to significant proprietary protection. During recessionary periods in the electronics industry, our strategy of providing quick-turn services, an integrated manufacturing solution, and responsive customer service may take on reduced importance to our customers. As a result, we may need to compete more on the basis of price, which would cause our gross margins to decline.

If we are unable to provide our customers with high-end technology, high-quality products, and responsive service, or if we are unable to deliver our products to our customers in a timely manner, our business, financial condition, and results of operations may be materially adversely affected.

In order to maintain our existing customer base and obtain business from new customers, we must demonstrate our ability to produce our products at the level of technology, quality, responsiveness of service, timeliness of delivery, and cost that our customers require. If our products are of substandard quality, if they are not delivered on time, if we are not responsive to our customers' demands, or if we cannot meet our customers' technological requirements, our reputation as a reliable supplier of our products would likely be damaged. If we are unable to meet anticipated product and service standards, we may be unable to obtain new contracts or keep our existing customers, and this would have a material adverse effect on our business, financial condition, and results of operations.

We are subject to risks for the use of certain metals from "conflict minerals" originating in the Democratic Republic of the Congo.

During the third quarter of 2012, the SEC adopted rules implementing the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank). These rules impose diligence and disclosure requirements regarding the use of "conflict minerals" mined from the Democratic Republic of Congo and neighboring countries. While these new rules continue to be the subject of ongoing litigation and, as a result, uncertainty, we submitted a conflict minerals report on Form SD with the SEC for the past four years, most recently on May 30, 2017. Compliance with these rules results in additional costs and expenses, including costs and expenses incurred for due diligence to determine and verify the sources of any conflict minerals used in our products, in addition to the costs and expenses of remediation and other changes to products, processes, or sources of supply as a consequence of such verification efforts. These rules may also affect the sourcing and availability of minerals used in the manufacture of our PCBs, as there may be only a limited number of suppliers offering "conflict free" minerals that can be used in our products. There can be no assurance that we will be able to obtain such minerals in sufficient quantities or at competitive prices. Also, since our supply chain is complex, we may, at a minimum, face reputational challenges with our customers, stockholders, and other stakeholders if we are unable to sufficiently verify the origins of the minerals used in our products. We may also encounter customers who require that all of the components of our products be certified as conflict free. If we are not able to meet customer requirements, such customers may choose to disqualify us as a supplier, which could impact our sales and the value of portions of our inventory.

[Table of Contents](#)

Outages, computer viruses, break-ins, and similar events could disrupt our operations, and breaches of our security systems may cause us to incur significant legal and financial exposure.

We rely on information technology networks and systems, some of which are owned and operated by third parties, to collect, process, transmit, and store electronic information. In particular, we depend on our information technology infrastructure for a variety of functions, including worldwide financial reporting, inventory management, procurement, invoicing, and email communications. Any of these systems may be susceptible to outages due to fire, floods, power loss, telecommunications failures, hacking, terrorist attacks, and similar events. . In addition, in the ordinary course of our business, we collect and store sensitive data in our data centers and on our networks, including intellectual property, our proprietary and confidential business information and that of our customers, suppliers and business partners, and personally identifiable information of our employees. The secure collection, processing, storage, maintenance and transmission of this information is critical to our operations. Despite the implementation of network security measures, our systems and those of third parties on which we rely may also be vulnerable to computer viruses, break-ins, cyber attacks, attacks by hackers or breached due to employee or third party (including suppliers and business partners) error, malfeasance or other disruptions. If we or our vendors are unable to prevent such outages and breaches, our operations could be disrupted. If unauthorized parties gain access to our information systems or such information is used in an unauthorized manner, misdirected, altered, lost, or stolen during transmission, any theft or misuse of such information could result in, among other things, unfavorable publicity, governmental inquiry and oversight, difficulty in marketing our services, allegations by our customers that we have not performed our contractual obligations, loss of customers, litigation by affected parties, and possible financial obligations for damages related to the theft or misuse of such information, any of which could have a material adverse effect on our business, financial condition, and results of operations.

Damage to our manufacturing facilities due to fire, natural disaster, or other events could materially adversely affect our business, financial condition, and results of operations.

The destruction or closure of any of our facilities for a significant period of time as a result of fire, explosion, blizzard, act of war or terrorism, flood, tomado, earthquake, lightning, other natural disasters, an outbreak of epidemics such as Ebola or severe acute respiratory syndrome, required maintenance, or other events could harm us financially, increasing our costs of doing business and limiting our ability to deliver our manufacturing services on a timely basis.

Our insurance coverage with respect to damages to our facilities or our customers' products caused by natural disasters is limited and is subject to deductibles and coverage limits. Such coverage may not be adequate or continue to be available at commercially reasonable rates and terms.

In the event one or more of our facilities is closed on a temporary or permanent basis as a result of a natural disaster, required maintenance or other event, or in the event that an outbreak of a serious epidemic results in quarantines, temporary closures of offices or manufacturing facilities, travel restrictions or the temporary or permanent loss of key personnel, our operations could be significantly disrupted. Such events could delay or prevent product manufacturing and shipment for the time required to transfer production or repair, rebuild or replace the affected manufacturing facilities. This time frame could be lengthy and result in significant expenses for repair and related costs. While we have disaster recovery plans in place, there can be no assurance that such plans will be sufficient to allow our operations to continue in the event of every natural or man-made disaster, pandemic, required repair or other extraordinary event. Any extended inability to continue our operations at unaffected facilities following such an event would reduce our revenue and potentially damage our reputation as a reliable supplier.

We face constant pricing pressure from our customers and competitors, which may decrease our profit margins.

Competition in the PCB market is intense, and we expect that competition will continue to increase, thereby creating a highly aggressive pricing environment. We and some of our competitors have reduced average selling prices in the past. In addition, competitors may reduce their average selling prices faster than our ability to reduce costs, which can also accelerate the rate of decline of our selling prices. When prices decline, we may also be required to write down the value of our inventory.

[Table of Contents](#)

The effects of such pricing pressures on our business may be exacerbated by inflationary pressures that affect our costs of supply. When we are unable to extract comparable concessions from our suppliers on prices they charge us, this in turn reduces gross profit if we are unable to raise prices. Further, uncertainty or adverse changes in the economy could also lead to a significant decline in demand for our products and pressure to reduce our prices. As a result of the recent global economic downturn, many businesses have taken a more conservative stance in ordering inventory. Any decrease in demand for our products, coupled with pressure from the market and our customers to decrease our prices, would materially adversely affect our business, financial condition, and results of operations.

The pricing pressure we face on our products requires us to introduce new and more advanced technology products to maintain average selling prices or reduce any declines in average selling prices. As we shift production to more advanced, higher-density PCBs, we tend to make significant investments in plants and other capital equipment and incur higher costs of production, which may not be recovered.

The prominence of EMS companies as our customers could reduce our gross margins, potential sales, and customers.

Sales to EMS companies represented approximately 32%, 35% and 35% of our net sales for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively. Sales to EMS providers include sales directed by OEMs as well as orders placed with us at the EMS providers' discretion. EMS providers source on a global basis to a greater extent than OEMs. The growth of EMS providers increases the purchasing power of such providers and has in the past, and could in the future, result in increased price competition or the loss of existing OEM customers. In addition, some EMS providers, including some of our customers, have the ability to directly manufacture PCBs and create backplane assemblies. If a significant number of our other EMS customers were to acquire these abilities, our customer base might shrink, and our sales might decline substantially. Moreover, if any of our OEM customers outsource the production of PCBs and creation of backplane assemblies to these EMS providers, our business, financial condition, and results of operations may be materially adversely affected.

If we are unable to manage our growth effectively, our business, financial condition, and results of operations could be materially adversely affected.

We have experienced, and expect to continue to experience, growth in the scope and complexity of our operations. This growth may strain our managerial, financial, manufacturing, and other resources. In order to manage our growth, we may be required to continue to implement additional operating and financial controls and hire and train additional personnel. There can be no assurance that we will be able to do so in the future, and failure to do so could jeopardize our expansion plans and seriously harm our operations. In addition, growth in our capacity could result in reduced capacity utilization and a corresponding decrease in gross margins.

Our international sales are subject to laws and regulations relating to corrupt practices, trade, and export controls and economic sanctions. Any non-compliance could have a material adverse effect on our business, financial condition, and results of operations.

We operate on a global basis and are subject to anti-corruption, anti-bribery, and anti-kickback laws and regulations, including restrictions imposed by the Foreign Corrupt Practices Act (the FCPA). The FCPA and similar anti-corruption, anti-bribery, and anti-kickback laws in other jurisdictions generally prohibit companies and their intermediaries and agents from making improper payments to government officials or any other persons for the purpose of obtaining or retaining business. We operate and sell our products in many parts of the world that have experienced governmental corruption to some degree and, in certain circumstances, strict compliance with anti-corruption, anti-bribery, and anti-kickback laws may conflict with local customs and practices. We also, from time to time, undertake business ventures with state-owned companies or enterprises.

Our global business operations must also comply with all applicable domestic and foreign export control laws, including International Traffic In Arms Regulations (ITAR), and Export Administration Regulations (EAR). Some items we manufacture are controlled for export by the U.S. Department of Commerce's Bureau of Industry and Security under EAR.

[Table of Contents](#)

We train our employees concerning anti-corruption, anti-bribery, and anti-kickback laws and compliance with international regulations regarding trades and exports, and we have policies in place that prohibit employees from making improper payments. We cannot provide assurances that our internal controls and procedures will guarantee compliance by our employees or third parties with whom we work. If we are found to be liable for violations of the FCPA or similar anti-corruption, anti-bribery, or anti-kickback laws in international jurisdictions or for violations of ITAR, EAR, or other similar regulations regarding trades and exports, either due to our own acts or out of inadvertence, or due to the inadvertence of others, we could suffer criminal or civil fines or penalties or other repercussions, including reputational harm, which could have a material adverse effect on our business, financial condition, and results of operations.

Our global business operations also must be conducted in compliance with applicable economic sanctions laws and regulations, such as laws administered by the U.S. Department of the Treasury's Office of Foreign Asset Control, the U.S. State Department, and the U.S. Department of Commerce. We must comply with all applicable economic sanctions laws and regulations of the United States and other countries. Violations of these laws or regulations could result in significant additional sanctions including criminal or civil fines or penalties, more onerous compliance requirements, more extensive debarments from export privileges, or loss of authorizations needed to conduct aspects of our international business.

In certain countries, we may engage third-party agents or intermediaries, such as customs agents, to act on our behalf, and if these third-party agents or intermediaries violate applicable laws, their actions may result in criminal or civil fines or penalties or other sanctions being assessed against us. We take certain measures designed to ensure our compliance with U.S. export and economic sanctions laws, anti-corruption laws and regulations, and export control laws. However, it is possible that some of our products were sold or will be sold to distributors or other parties, without our knowledge or consent, in violation of applicable law. There can be no assurances that we will be in compliance in the future. Any such violation could result in significant criminal or civil fines, penalties, or other sanctions and repercussions, including reputational harm, which could have a material adverse effect on our business, financial condition, and results of operations.

Employee theft or fraud could result in loss.

Certain of our employees have access to, or signature authority with respect to, bank accounts or other company assets, which could expose us to fraud or theft. In addition, certain employees have access to certain precious metals used in connection with our manufacturing and key information technology infrastructure and to customer and other information that is commercially valuable. Should any employee, for any reason, steal any such precious metals (which has occurred from time to time), compromise our information technology systems, or misappropriate customer or other information, we could incur losses, including losses relating to claims by our customers against us, and the willingness of customers to do business with us may be damaged. Additionally, in the case of our defense business, we could be barred from future participation in government programs. Any such losses may not be fully covered by insurance.

Because we sell on a purchase order basis, we are subject to uncertainties and variability in demand by our customers that could decrease revenues and harm our operating results.

Although we have long-term contracts with many customers, those contracts generally do not contain volume commitments. We generally sell to customers on a purchase order basis. Our quick-turn orders are subject to particularly short lead times. Consequently, our sales are subject to short-term variability in demand by our customers. Customers submitting purchase orders may cancel, reduce, or delay their orders for a variety of reasons, subject to negotiations. The level and timing of orders placed by our customers may vary due to:

- customer attempts to manage inventory;
- changes in customers' manufacturing strategies, such as a decision by a customer to either diversify or consolidate the number of PCB manufacturers or backplane assembly service providers used or to manufacture or assemble its own products internally;
- variation in demand for our customers' products; and
- changes in new product introductions.

[Table of Contents](#)

We have periodically experienced terminations, reductions, and delays in our customers' orders. Further terminations, reductions, or delays in our customers' orders could materially adversely affect our business, financial condition, and results of operations.

Increasingly, our customers are requesting that we enter into supply agreements with them that have restrictive terms and conditions. These agreements typically include provisions that increase our financial exposure, which could result in significant costs to us.

Increasingly, our customers are requesting that we enter into supply agreements with them. These agreements typically do not include volume commitments, but do include provisions that generally serve to increase our exposure for product liability and limited sales returns, which could result in higher costs to us as a result of such claims. In addition, these agreements typically contain provisions that seek to limit our operational and pricing flexibility and extend payment terms, which could materially adversely affect our cash flow, business, financial condition, and results of operations.

Our business has benefited from OEMs deciding to outsource their PCB manufacturing and backplane assembly needs to us. If OEMs choose to provide these services in-house or select other providers, our business could suffer.

Our future revenue growth partially depends on new outsourcing opportunities from OEMs. Current and prospective customers continuously evaluate our performance against other providers. They also evaluate the potential benefits of manufacturing their products themselves. To the extent that outsourcing opportunities are not available either due to OEM decisions to produce these products themselves or to use other providers, our financial results and future growth could be materially adversely affected.

Consolidation among our customers could materially adversely affect our business, financial condition, and results of operations.

Recently, some of our large customers have consolidated, and further consolidation of customers may occur. Depending on which organization becomes the controller of the supply chain function following the consolidation, we may not be retained as a preferred or approved supplier. In addition, product duplication could result in the termination of a product line that we currently support. While there is potential for increasing our position with the combined customer, there does exist the potential for decreased revenue if we are not retained as a continuing supplier. We also face the risk of increased pricing pressure from the combined customer because of its increased market share.

We may need additional capital in the future to fund investments in our operations, refinance our indebtedness, and to maintain and grow our business, and such capital may not be available on a timely basis, on acceptable terms, or at all.

Our business is capital-intensive, and our ability to increase revenue, profit, and cash flow depends upon continued capital spending. To the extent that the funds generated by our ongoing operations are insufficient to cover our liquidity requirements, we may need to raise additional funds through financings. If we are unable to fund our operations and make capital expenditures as currently planned or if we do not have sufficient liquidity to service the interest and principal payments on our debt, it would have a material adverse effect on our business, financial condition, and results of operations. If we do not achieve our expected operating results, we would need to reallocate our sources and uses of operating cash flows. This may include borrowing additional funds to service debt payments, which may impair our ability to make investments in our business. Looking ahead at long-term needs, we may need to raise additional funds for a number of purposes, including the following:

- to fund capital equipment purchases to increase production capacity, upgrade and expand our technological capabilities and replace aging equipment or introduce new products;
- to refinance our existing indebtedness;
- to fund our operations beyond 2018;

Table of Contents

- to fund working capital requirements for future growth that we may experience;
- to enhance or expand the range of services we offer;
- to increase our sales and marketing activities; or
- to respond to competitive pressures or perceived opportunities, such as investment, acquisition, and international expansion activities.

Should we need to raise funds through incurring additional debt, we may become subject to covenants even more restrictive than those contained in our current debt instruments. There can be no assurance that additional capital, including any future equity or debt financing, would be available on a timely basis, on favorable terms, or at all. If such funds are not available to us when required or on acceptable terms, our business, financial condition, and results of operations could be materially adversely affected.

Our operations could be materially adversely affected by a shortage of utilities or a discontinuation of priority supply status offered for such utilities.

The manufacturing of PCBs requires significant quantities of electricity and water. Our operations in Asia have historically purchased substantially all of the electrical power for their manufacturing plants in China from local power plants. Because China's economy has recently been in a state of growth, the strain on the nation's power plants is increasing, which has led to continuing power outages in various parts of the country. There may be times when our operations in China may be unable to obtain adequate sources of electricity to meet production requirements. Various regions in China have in the past experienced shortages of both electricity and water and unexpected interruptions of power supply. From time to time, the Chinese government rations electrical power, which can lead to unscheduled production interruptions at our manufacturing facilities.

In addition, certain areas in which our North America operations have manufacturing facilities, particularly in California, have experienced power and resource shortages from time to time, including mandatory periods without electrical power, changes to water availability, and significant increases in utility and resource costs.

We do not generally maintain any back-up power generation facilities or reserves of water for our operations, so if we were to lose supplies of power or water at any of our facilities, we would be required to cease operations until such supply was restored. Any resulting cessation of operations could materially adversely affect our ability to meet our customers' orders in a timely manner, thus potentially resulting in a loss of business, along with increased costs of manufacturing, and under-utilization of capacity. In addition, the sudden cessation of our power or water supply could damage our equipment, resulting in the need for costly repairs or maintenance, as well as damage to products in production, resulting in an increase in scrapped products.

We may be unable to hire and retain sufficient qualified personnel, and the loss of any of our key executive officers could materially adversely affect our business, financial condition, and results of operations.

We believe that our future success will depend in large part on our ability to attract and retain highly skilled, knowledgeable, sophisticated, and qualified managerial and professional personnel. We may not be able to retain our executive officers and key personnel or attract additional qualified management in the future. We can make no assurances that future changes in executive management will not have a material adverse effect on our business, financial condition, or results of operations. Our business also depends on our continuing ability to recruit, train, and retain highly qualified employees, particularly engineering and sales and marketing personnel. The competition for these employees is intense, and the loss of these employees could harm our business. Further, our ability to successfully integrate acquired companies depends in part on our ability to retain key management and existing employees at the time of the acquisition.

[Table of Contents](#)

Our manufacturing processes depend on the collective industry experience of our employees. If a significant number of these employees were to leave us, it could limit our ability to compete effectively and could materially adversely affect our business, financial condition, and results of operations.

We have limited patent or trade secret protection for our manufacturing processes. We rely on the collective experience of our employees involved in our manufacturing processes to ensure that we continuously evaluate and adopt new technologies in our industry. Although we are not dependent on any one employee or a small number of employees, if a significant number of our employees involved in our manufacturing processes were to leave our employment, and we were not able to replace these people with new employees with comparable experience, our manufacturing processes might suffer as we might be unable to keep up with innovations in the industry. As a result, we may lose our ability to continue to compete effectively. For example, we have experienced a significant amount of employee attrition in our China operations each year, which has negatively impacted our yield, costs of production, and service times.

Infringement of our intellectual property rights could negatively affect us, and we may be exposed to intellectual property infringement claims from third parties that could be costly to defend, could divert management's attention and resources, and if successful, could result in liability.

We rely on a combination of copyright, patent, trademark, and trade secret laws, confidentiality procedures, contractual provisions, and other measures to establish and protect our proprietary and confidential information. All of these measures afford only limited protection. These measures may be invalidated, circumvented, breached, or challenged, and others may develop intellectual property, technologies or processes that are similar, or superior to, our intellectual property or technology. We may not have adequate controls and procedures in place to protect our proprietary and confidential information. Despite our efforts to protect our intellectual property and proprietary rights, unauthorized parties may attempt to copy, and succeed in, copying, our products or may obtain or use information that we regard as proprietary or confidential. If it becomes necessary for us to resort to litigation to protect our intellectual property rights, any proceedings could be burdensome, costly, and distracting to management, and we may not prevail. Further, adequate remedies may not be available in the event of an unauthorized use or disclosure of our proprietary or confidential information. Failure to successfully establish or enforce our intellectual property rights could materially and adversely affect our business, financial condition, and results of operations.

Furthermore, there is a risk that we may infringe on the intellectual property rights of others. As is the case with many other companies in the PCB industry, we from time to time receive communications from third parties asserting patent rights over our products and enter into discussions with such third parties. Irrespective of the validity or the successful assertion of such claims, we could incur costs in either defending or settling any intellectual property disputes alleging infringement. If any claims, whether or not they have merit, are brought against our customers for such infringement, we could be required to expend significant resources in defending such claims. In the event we are subject to any infringement claims, we may be required to spend a significant amount of money to develop non-infringing alternatives or obtain licenses. We may not be successful in developing such alternatives or in obtaining such licenses on reasonable terms, or at all, and may be required to modify or cease marketing our products or services, which could disrupt the production processes, damage our reputation, and materially and adversely affect our business, financial condition, and results of operations.

Our business, financial condition, and results of operations could be materially adversely affected by climate change initiatives.

Our manufacturing processes require that we purchase significant quantities of energy from third parties, which results in the generation of greenhouse gases, either directly on-site or indirectly at electric utilities. Both domestic and international legislation to address climate change by reducing greenhouse gas emissions could create increases in energy costs and price volatility. Considerable international attention is now focused on development of an international policy framework to guide international action to address climate change. Proposed and existing legislative efforts to control or limit greenhouse gas emissions could affect our energy sources and supply choices, as well as increase the cost of energy and raw materials that are derived from sources that generate greenhouse gas emissions.

Risks Related to the Acquisition of Anaren (Acquisition)

The Acquisition is subject to closing conditions. Failure to complete the Acquisition could have material and adverse effects on TTM.

On December 1, 2017, TTM entered into the Stock Purchase Agreement in connection with the Acquisition. Although we currently expect the Acquisition to close in the first half of 2018, subject to customary closing conditions, including regulatory approvals, there can be no assurance that the Acquisition will be completed in accordance with the anticipated timing or at all. In addition, if the Acquisition has not been completed by June 1, 2018 (subject to extension to September 1, 2018 in certain circumstances), either Anaren or TTM may terminate the Purchase Agreement unless the failure of the Acquisition to be completed has resulted from certain failures of the party seeking to terminate the Purchase Agreement to perform its obligations there under. In conjunction with the pending Acquisition, we have received commitments to fund a \$700.0 million Incremental Facility. Subsequent to January 1, 2018, we completed the allocation of \$600.0 million of commitments from lenders in the syndication for the Incremental Facility, which supercedes the original \$700.0 million commitment. TTM expects to pay \$600.0 million of the purchase price for the Acquisition with proceeds of the Incremental Facility. If the Incremental Facility is not funded for any reason, TTM may be unable to complete the Acquisition.

If the Acquisition is not completed on a timely basis, or at all, TTM's ongoing business may be adversely affected. Additionally, in the event the Acquisition is not completed, TTM will be subject to a number of risks without realizing any of the benefits of having completed the Acquisition, including the following:

- TTM will be required to pay its costs relating to the Acquisition, such as legal, accounting, financing and financial advisory fees, whether or not the Acquisition is completed, and could be required to pay Anaren a termination fee of \$31.0 million in cash if the Purchase Agreement is terminated under circumstances in which certain required regulatory approvals are not obtained prior to June 1, 2018 or September 1, 2018, as applicable;
- in circumstances where the termination fee is not the specified remedy for a failure by TTM to complete the acquisition in accordance with its obligations, TTM may be subject to claims for damages or specific performance;
- time and resources committed by management to matters relating to the Acquisition could otherwise have been devoted to pursuing other beneficial opportunities; and
- the market price of TTM's securities could decline to the extent that the current market price reflects a market assumption that the Acquisition will be completed, or to the extent that the Acquisition is fundamental to TTM's business strategy.

The integration of Anaren may present significant challenges to TTM, and although TTM expects the Acquisition will result in cost savings, synergies, and other benefits to TTM, TTM may not realize those benefits because of difficulties related to integration, the realization of synergies, and other challenges.

TTM and Anaren have operated and, until consummation of the Acquisition, will continue to operate independently, and there can be no assurances that their businesses can be integrated successfully. It is possible that the integration process could result in the loss of key TTM or Anaren employees, the loss of customers, the disruption of either company's or both companies' ongoing businesses or other unexpected integration issues, higher than expected integration costs and an overall post-completion integration process that takes longer than originally anticipated. Specifically, the following issues and potential risks, among others, must be addressed in integrating the operations of TTM and Anaren in order to realize the anticipated benefits of the Acquisition so the combined company performs as expected:

- failure to implement the business plan for the combined company;
- combining the businesses of TTM and Anaren and meeting the capital requirements of the combined company in a manner that permits the combined company to achieve the cost savings or revenue synergies anticipated to result from the Acquisition, the failure of which would result in the anticipated benefits of the Acquisition not being realized in the time frame currently anticipated or at all;
- satisfying the requirements of our customers and meeting their expectations while we integrate operations;

Table of Contents

- integration of the contracting activities of TTM and Anaren, particularly with respect to the companies' respective military and government contracts;
- harmonizing the companies' operating practices, employee development and compensation programs, internal controls, and other policies, procedures, and processes;
- costs, including legal and settlement costs, associated with TTM's and Anaren's legal proceedings, and other costs, including legal and settlement costs, associated with the combined company's other loss contingencies, in each case whether known or unknown and whether relating to past, present or future facts, events, circumstances, or occurrences, any of which could be materially adverse to the business, results of operations, assets, or financial condition of TTM or Anaren and, following the Acquisition, the financial position, results of operations, and liquidity of the combined company and the ability of the combined company to achieve expected benefits of the Acquisition;
- potential deterioration in the financial performance of TTM and Anaren, including any potential deviation in results of operations from historical levels;
- difficulties in the retention and assimilation of employees;
- demands on management related to the increase in the size of our company after the Acquisition;
- the diversion of management's attention from the management of daily operations to the integration of operations;
- unanticipated changes in applicable laws and regulations;
- the imposition of divestiture requirements or a required exit from business lines to obtain regulatory approvals;
- difficulties and risks in the integration of departments and systems (including accounting, health information and management information systems), technologies (including software), books and records and procedures, as well as in maintaining uniform standards and controls (including internal control over financial reporting and related procedures and policies); and
- other unanticipated issues, expenses, or liabilities that could materially adversely affect our ability to realize any expected synergies on a timely basis, or at all.

If we cannot successfully integrate Anaren, we may experience material negative consequences to our business, financial condition, or results of operations. Successful integration of TTM and Anaren will depend on our ability to manage these operations, to realize opportunities for revenue growth and to eliminate redundant and excess costs. Because of difficulties in combining the two companies, we may not be able to achieve the benefits that we expect to achieve as a result of the Acquisition.

The Acquisition may be consummated on different terms from those contained in the Stock Purchase Agreement.

Prior to the consummation of the Acquisition, the parties may, by their mutual agreement, amend or alter the terms of the Stock Purchase Agreement, including with respect to any covenants or agreements with respect to the parties' respective operations during the pendency thereof. Any such amendments or alterations may have negative consequences, including reducing the cash available for TTM's or Anaren's operations or to meet respective obligations or restricting or limiting assets or operations of either of TTM or Anaren.

Efforts may be made by various parties to rescind the Acquisition, place restrictions on the business of the combined company, or require divestitures to gain the approval of regulatory authorities with respect to the Acquisition.

The consummation of the Acquisition is conditioned upon the expiration or termination of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (the "HSR Act") waiting period and the receipt of certain other approvals, including approval from the Committee on Foreign Investment in the United States ("CFIUS") and the Defense Security Service. We received early termination of the waiting period under the HSR Act on December 22, 2017. As of the date of this report, we have not yet received the necessary approval from CFIUS.

[Table of Contents](#)

Notwithstanding the expiration of the statutory waiting periods or an extension thereto and receipt of clearance of the Acquisition from the applicable regulatory authorities, at any time after consummation of the Acquisition the Antitrust Division of the U.S. Department of Justice, Federal Trade Commission (the “FTC”), or any state or foreign regulatory authority, could take action under antitrust laws as it deems necessary or desirable in the public interest, including seeking to rescind the Acquisition or the divestiture of shares purchased or particular assets held by the combined company, in addition to other restrictions. Moreover, a competitor, customer or other third party could initiate a private action under antitrust laws challenging the Acquisition after it has been consummated. There can be no assurance that a challenge to the Acquisition on antitrust grounds after the consummation of the Acquisition will not be made or, if this challenge is made, what the result will be.

If the challenging party is successful, the Acquisition may be rescinded or we may be subject to requirements, limitations or costs, required to make divestitures or have restrictions placed on the conduct of the combined company’s business. If we agree to any material requirements, limitations, costs, divestitures or restrictions, these requirements, limitations, costs, divestitures or restrictions could adversely affect our ability to integrate Anaren’s operations with TTM’s operations and/or reduce the anticipated benefits of the Acquisition. This could have a material adverse effect on the combined company’s business and results of operations.

Additionally, while the Acquisition is conditioned on the satisfaction of applicable regulatory requirements, it is not conditioned on the absence of any changes to the business of TTM, Anaren, and the combined company that may be necessitated by such regulatory authorities to obtain approvals. As a result of the foregoing, the financial profile of the combined company may be different in a material manner than the historical financial presentations of TTM and Anaren and the pro forma balance sheet and statements of operations data included in this offering memorandum.

ITEM 1B. *UNRESOLVED STAFF COMMENTS*

None.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we may become a party to various legal proceedings arising in the ordinary course of our business. There can be no assurance that we will prevail in any such litigation. We believe that the amount of any reasonably possible loss for known matters would not be material to our financial statements; however, the outcome of these actions is inherently difficult to predict. In the event of an adverse outcome, the ultimate potential loss could have a material adverse effect on our financial condition, results of operations, or cash flows in a particular period.

ITEM 4. MINE SAFETY DISCLOSURES

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Historical Trading Price

Our common stock has been listed on the Nasdaq Global Select Market under the symbol "TTMP" since September 21, 2000. The following table sets forth the quarterly high and low sales prices of our common stock as reported on the Nasdaq Global Select Market for the periods indicated.

	<u>High</u>	<u>Low</u>
2017:		
First Quarter	\$17.86	\$13.31
Second Quarter	\$18.85	\$15.42
Third Quarter	\$19.54	\$12.76
Fourth Quarter	\$17.65	\$15.14
2016:		
First Quarter	\$ 6.97	\$ 4.67
Second Quarter	\$ 8.16	\$ 6.22
Third Quarter	\$11.58	\$ 6.93
Fourth Quarter	\$15.00	\$10.85

As of February 19, 2018, there were approximately 283 holders of record of our common stock. The closing sale price of our common stock on the Nasdaq Global Select Market on February 19, 2018 was \$15.80.

Dividend Policy

TTM Technologies, Inc. has not declared or paid any dividends since 2000 and does not anticipate paying any cash dividends in the foreseeable future. TTM Technologies, Inc. presently intends to retain any future earnings to service debt and to finance future operations and the expansion of its business. In addition, TTM Technologies, Inc. debt agreements contain restrictions and limitations on the declaration and payment of dividends and distributions.

STOCK PRICE PERFORMANCE GRAPH

The performance graph below compares, for the period from December 31, 2012 to January 1, 2018, the cumulative total stockholder return on our common stock against the cumulative total return of:

- the NASDAQ Composite Index; and
- the Dow Jones U.S. Electrical Components & Equipment Index.

The graph assumes \$100 was invested in our common stock on December 31, 2012, and an investment in NASDAQ Composite Index and the Dow Jones US Electrical Components & Equipment Index. The stock performance shown on the graph below represents historical stock performance and is not necessarily indicative of future stock performance.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*
Among TTM Technologies, Inc., the NASDAQ Composite Index and the Dow Jones US Electrical Components & Equipment Index

* \$100 invested on December 31, 2012 in stock or index, including reinvestment of dividends.

	12/31/12	12/30/13	12/29/14	12/28/15	01/02/17	01/01/18

[Table of Contents](#)

- (1) Beginning in 2013, we operate on a 52 or 53 week year ending on the Monday nearest December 31. Fiscal year 2017, 2015, 2014 and 2013 were 52 weeks ended January 1, 2018, December 28, 2015, December 29, 2014 and December 30, 2013, respectively. Fiscal year 2016 consisted of 53 weeks ended on January 2, 2017 with the additional week included in the fourth quarter. We estimate the additional week contributed approximately \$29.2 million of additional revenue and approximately \$1.1 million of additional operating income for the year ended January 2, 2017.
- (2) Our results for the year ended December 28, 2015 include activity of Viasystems, which we acquired on May 31, 2015. Additionally, our results include \$34.4 million of bank fees and legal, accounting and other professional service costs associated with the acquisition of Viasystems.

	As of				
	January 1, 2018(1)	January 2, 2017(1)	December 28, 2015(1)	December 29, 2014	December 30, 2013
	(In thousands)				
Consolidated Balance Sheet Data:					
Working capital	\$ 500,951	\$ 323,776	\$ 277,526	\$ 302,111	\$ 346,988
Total assets	2,781,882	2,500,076	2,640,133	1,601,289	1,673,575
Long-term debt, including current maturities	980,057	1,019,682	1,170,786	502,687	573,743
TTM Technologies, Inc. stockholders' equity	1,011,380	820,847	819,105	715,464	705,295

	January 1, 2018	January 2, 2017	December 28, 2015	December 29, 2014	December 30, 2013
	(In thousands)				
Supplemental Data:					
Adjusted EBITDA ⁽²⁾	\$ 388,566	\$ 395,445	\$ 285,673	\$ 166,044	\$ 181,293
Net cash provided by operating activities	332,755	298,336	237,462	129,810	71,388
Net cash used in investing activities	(124,090)	(77,968)	(247,660)	(108,571)	(35,689)
Net cash (used in) provided by financing activities	(58,976)	(217,109)	(5,756)	(77,141)	12,985

- (1) Reflects adoption of Financial Accounting Update 2015-03, *Imputation of Interest*, which requires that debt issuance costs related to debt be reported as a direct reduction from the face amount of the debt. Accordingly, as of January 1, 2018 and January 2, 2017, approximately \$12.5 million and \$4.7 million, respectively, of unamortized debt issuance costs were presented as a reduction of long-term debt on our balance sheet. Furthermore, we reclassified approximately \$31.2 million of unamortized debt issuance costs that had been presented as other non-current assets as of December 28, 2015 as a reduction of long-term debt.

[Table of Contents](#)

(2) “EBITDA” means earnings before interest expense, income taxes, depreciation and amortization. Adjusted EBITDA means earnings before interest expense, income taxes, depreciation, amortization, stock-based compensation, gain on sale of certain assets is associated with the closure of manufacturing facilities and on the sale of certain subsidiaries, acquisition-related costs, and impairments, restructuring and other charges. This is a non-GAAP financial measurement used by us to enhance the understanding of our operating results. Adjusted EBITDA is a key measure we use to evaluate our operations. We provide our adjusted EBITDA because we believe that investors and securities analysts will find adjusted EBITDA to be a useful measure for evaluating our operating performance and comparing our operating performance with that of similar companies that have different capital structures and for evaluating our ability to meet our future debt service, capital expenditures, and working capital requirements. However, adjusted EBITDA should not be considered as an alternative to cash flows from operating activities as a measure of liquidity or as an alternative to net income as a measure of operating results in accordance with accounting principles generally accepted in the United States. The following provides a reconciliation of adjusted EBITDA to the financial information in our consolidated statements of operations.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This financial review presents our operating results for each of our three most recent fiscal years and our financial condition at January 1, 2018. Except for historical information contained herein, the following discussion contains forward-looking statements which are subject to known and unknown risks, uncertainties and other factors that may cause our actual results to differ materially from those expressed or implied by such forward-looking statements. We discuss such risks, uncertainties and other factors throughout this report and specifically under Item 1A of Part I of this report, Risk Factors. In addition, the following discussion should be read in connection with the information presented in our consolidated financial statements and the related notes to our consolidated financial statements.

COMPANY OVERVIEW

We are a leading global printed circuit board (PCB) manufacturer, focusing on quick-turn and volume production of technologically complex PCBs and electro-mechanical solutions (E-M Solutions). We focus on providing time-to-market and volume production of advanced technology products and offer a one-stop manufacturing solution to our customers from engineering support to prototype development through final mass production. This one-stop manufacturing solution allows us to align technology development with the diverse needs of our customers and to enable them to reduce the time required to develop new products and bring them to market. We serve a diversified customer base consisting of approximately 2,000 customers in various markets throughout the world, including aerospace and defense, automotive components, smartphones and touchscreen tablets, high-end computing, and medical, industrial and instrumentation related products as well as networking/communications infrastructure products. Our customers include both original equipment manufacturers (OEMs) and electronic manufacturing services (EMS) providers.

RECENT DEVELOPMENTS

On September 28, 2017, we entered into a \$350.0 million Term Loan Facility due 2024 (Term Loan Facility), and issued \$375.0 million of Senior Notes due 2025 (Senior Notes). In conjunction with the issuance of the Term Loan Facility and Senior Notes, we repaid in full the remaining outstanding balance of the September 27, 2016 Term Loan Credit Agreement (2016 Term Loan) and repaid \$63.0 million on our existing U.S. Asset-Based Lending Credit Agreement (U.S. ABL).

On December 1, 2017, we entered into a definitive stock purchase agreement with Anaren Holdings, LLC pursuant to which we agreed to purchase all of the issued and outstanding common stock of Anaren Holding Corp., for total consideration of \$775.0 million in cash subject to customary working capital and certain other adjustments. Other than the equity interest of Anaren, Inc. (Anaren), Anaren Holding Corp. has no material assets or liabilities and has no material independent operations. Anaren is a leading provider of mission-critical radio frequency (RF) solutions, microelectronics, and microwave components and assemblies for the wireless infrastructure and space and defense electronics markets. Anaren's microwave products are used in wireless communication systems including wireless infrastructure, wireless consumer and medical applications, as well as advanced radar, beam-forming, jamming, motion control and receiver applications for the space and defense markets, covering a broad range of frequencies and power levels. Its Integrated Radio module product lines provide proprietary low power RF monitoring solutions deployable in a wide variety of end market applications. The acquisition of Anaren will significantly increase our aerospace and defense design capability with particular focus on RF products, deepen our customer engagement in aerospace and defense and networking/communications and complement our focus on high technology PCB products manufacturing. We expect to complete the acquisition in the first half of 2018.

In conjunction with the pending acquisition of Anaren, we have received commitments to fund a \$700.0 million senior secured incremental term loan (Incremental Facility). Subsequent to January 1, 2018, we completed the allocation of \$600.0 million in commitments from lenders in syndication for the Incremental Facility, which supercedes the original \$700.0 million commitment. Upon the consummation of the acquisition of Anaren, we will use the borrowings from the Incremental Facility and cash on hand to finance the acquisition.

[Table of Contents](#)**FINANCIAL OVERVIEW**

For the fiscal year 2017, we experienced higher demand in our Cellular Phone, Computing, and Aerospace and Defense end markets, partially offset by lower demand in our Networking/Communications end market.

While our customers include both OEMs and EMS providers, we measure customers based on OEM companies as they are the ultimate end customers. Sales to our five largest customers accounted for 37%, 33% and 37% of our net sales in fiscal years 2017, 2016 and 2015, respectively. We sell to OEMs both directly and indirectly through EMS providers.

The following table shows the percentage of our net sales attributable to each of the principal end markets we served for the periods indicated:

<u>End Markets⁽¹⁾</u>	<u>2017</u>	<u>2016</u>	<u>2015⁽²⁾</u>
Aerospace and Defense	16%	15%	14%
Automotive	19	20	13
Cellular Phone ⁽³⁾	18	14	21
Computing/Storage/Peripherals ⁽³⁾	13	12	12
Medical/Industrial/Instrumentation	14	14	13
Networking/Communications	18	23	25
Other ⁽³⁾	2	2	2
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

(1) Sales to EMS companies are classified by the end markets of their OEM customers.

(2) Amounts include activity of Viasystems, which we acquired on May 31, 2015.

(3) Smartphones are included in the Cellular Phone end market, tablets are included in the Computing/Storage/Peripherals end market and other consumer devices include wearables, portable video devices and personal headphones are included in the Other end market.

We derive revenues primarily from the sale of PCBs and custom electronic assemblies using customer-supplied engineering and design plans. We recognize revenues when persuasive evidence of a sales arrangement exists, the sales terms are fixed or determinable, title and risk of loss have transferred, and collectability is reasonably assured — generally when products are shipped to the customer. Net sales consist of gross sales less an allowance for returns, which typically have been less than 2% of gross sales. We provide our customers a limited right of return for defective PCBs and backplane assemblies. We record an estimate for sales returns and allowances at the time of sale based on historical results. Purchase orders may be cancelled prior to shipment. We generally charge customers a fee, based on the percentage completed, if an order is cancelled once it has entered production.

Cost of goods sold consists of materials, labor, outside services, and overhead expenses incurred in the manufacture and testing of our products. Shipping and handling fees and related freight costs and supplies associated with shipping products are also included as a component of cost of goods sold. Many factors affect our gross margin, including capacity utilization, product mix, production volume, and yield. We generally do not participate in any significant long-term contracts with suppliers, and we believe there are a number of potential suppliers for the raw materials we use.

Selling and marketing expenses consist primarily of salaries, labor related benefits, and commissions paid to our internal sales force, independent sales representatives, and our sales support staff, as well as costs associated with marketing materials and trade shows.

General and administrative costs primarily include the salaries for executive, finance, accounting, information technology, facilities and human resources personnel, as well as expenses for accounting and legal assistance, incentive compensation expense, and gains or losses on the sale or disposal of property, plant and equipment.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our consolidated financial statements included in this report have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, net sales and expenses, and related disclosure of contingent assets and liabilities.

A critical accounting policy is defined as one that is both material to the presentation of our consolidated financial statements and requires us to make judgments that could have a material effect on our financial condition or results of operations. These policies require us to make assumptions about matters that are highly uncertain at the time of the estimate. Different estimates we could reasonably have used, or changes in the estimates that are reasonably likely to occur, could have a material effect on our financial condition or results of operations.

We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Management has discussed the development, selection and disclosure of these estimates with the audit committee of our board of directors. Actual results may differ from these estimates under different assumptions or conditions.

Our critical accounting policies include asset valuation related to bad debts and inventory; sales returns and allowances; impairment of long-lived assets, including goodwill and intangible assets; realizability of deferred tax assets; and determining self-insurance reserves.

Allowance for Doubtful Accounts

We provide customary credit terms to our customers and generally do not require collateral. We perform ongoing credit evaluations of the financial condition of our customers and maintain an allowance for doubtful accounts based upon historical collections experience and judgments as to expected collectability of accounts. Our actual bad debts may differ from our estimates.

Inventories

In assessing the realizability of inventories, we are required to make judgments as to future demand requirements and compare these with current and committed inventory levels. When the estimated sales value of inventory is less than the carrying value, the inventory cost is written down to its estimated net realizable value, thereby establishing a new cost basis. Our inventory requirements may change based on projected customer demand, market conditions, technological and product life cycle changes, longer or shorter than expected usage periods, and other factors that could affect the valuation of our inventories. We maintain certain finished goods inventories near certain key customer locations in accordance with agreements with those customers. Although this inventory is typically supported by valid purchase orders, should these customers ultimately not purchase these inventories, our results of operations and financial condition would be adversely affected.

Sales Returns and Allowances

We derive revenues primarily from the sale of PCBs and custom electronic assemblies using customer-supplied engineering and design plans. We recognize revenue when persuasive evidence of a sales arrangement exists, the sales terms are fixed or determinable, title and risk of loss have transferred, and collectability is reasonably assured — generally when products are shipped to the customer. We provide our customers a limited right of return for defective PCBs and backplane assemblies. We accrue an estimate for sales returns and allowances at the time of sale using our judgment based on historical results and anticipated returns as a result of current period sales. To the extent actual experience varies from our historical experience, revisions to these allowances may be required.

Long-lived Assets

We have significant long-lived tangible and intangible assets consisting of property, plant and equipment, definite-lived intangibles, and goodwill. We review these assets for impairment whenever events or changes in

[Table of Contents](#)

circumstances indicate that the carrying amount of such assets may not be recoverable. In addition, we perform an impairment test related to goodwill at least annually. As necessary, we make judgments regarding future cash flow forecasts in the assessment of impairment.

During the fourth quarter of each year, and when events and circumstances warrant an evaluation, we perform an impairment assessment of goodwill, which may require the use of a fair-value based analysis. We assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If we conclude that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, we compare the fair values of the applicable reporting units with their carrying values. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the amount by which the carrying value exceeds the fair value is recognized as an impairment loss. We determine the fair value of our reporting units based on discounted cash flows and market approach analyses as considered necessary. We consider factors such as the state of the economy and reduced expectations for future cash flows coupled with a decline in our market capitalization for a sustained period as indicators for potential goodwill impairment. In the fourth quarter of 2017, we performed our annual impairment test qualitatively and concluded that it was more likely than not that goodwill was not impaired.

We also assess other long-lived assets, specifically definite-lived intangibles and property, plant and equipment, for potential impairment given similar impairment indicators. When indicators of impairment exist related to our long-lived tangible assets and definite-lived intangible assets, we use an estimate of the undiscounted cash flows in measuring whether the carrying amount of the assets is recoverable. Measurement of the amount of impairment, if any, is based upon the difference between the asset's carrying value and estimated fair value. Fair value is determined through various valuation techniques, including cost-based, market and income approaches as considered necessary, which involve judgments related to future cash flows and the application of the appropriate valuation model. During the fiscal year 2016 we recorded impairment charges to reduce the carrying value of certain long-lived assets in the PCB reportable segment. See Note 4 to our consolidated financial statements.

Assets Held for Sale — We classify assets to be sold as assets held for sale when (i) we have approved and commit to a plan to sell the asset, (ii) the asset is available for immediate sale in its present condition, (iii) an active program to locate a buyer and other actions required to sell the asset have been initiated, (iv) the sale of the asset is probable, (v) the asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value, and (vi) it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Assets classified as held for sale are recorded at the lower of the carrying amount or fair value less the cost to sell.

Assets Held for Use — If a decision to dispose of an asset or a business is made and the held for sale criteria are not met, it is considered held for use. Assets of the business are evaluated for recoverability in the following order: (i) assets other than goodwill, property and intangibles; (ii) property and intangibles subject to amortization; and (iii) goodwill. In evaluating the recoverability of property and intangible assets subject to amortization, in a held for use business, the carrying value is first compared to the sum of the undiscounted cash flows expected to result from the use and eventual disposition. If the carrying value exceeds the undiscounted expected cash flows, then a fair value analysis is performed. An impairment charge is recognized if the carrying value exceeds the fair value.

Income Taxes

Deferred income tax assets are reviewed for recoverability, and valuation allowances are provided, when necessary, to reduce deferred income tax assets to the amounts that are more likely than not to be realized based on our estimate of future taxable income. At January 1, 2018, we had a net noncurrent deferred income tax liability of \$4.9 million, which is net of the \$64.4 million deferred tax asset. At January 1, 2018, our deferred income tax asset of \$64.4 million was net of a valuation allowance of approximately \$167.2 million. Should our expectations of taxable income change in future periods, it may be necessary to adjust our valuation allowance, which could affect our results of operations in the period such a determination is made. We record income tax provision or benefit during interim periods at a rate that is based on expected results for the full year. If future changes in market conditions cause actual results for the year to be more or less favorable than those expected, adjustments to the effective income tax rate could be required.

[Table of Contents](#)

Effects of the Tax Cuts and Jobs Act

On December 22, 2017, the Tax Cuts and Jobs Act (Tax Act) was enacted. Accounting Standards Codification (ASC) 740, *Accounting for Income Taxes*, requires companies to recognize the effect of tax law changes in the period of enactment regardless of the effective date of those tax law changes. Certain provisions of the Tax Act are effective September 27, 2017, others are effective or identified as of December 31, 2017 and others are effective after January 1, 2018.

Given the timing of enactment of the Tax Act and the significance of the legislation, the SEC staff issued Staff Accounting Bulletin No. 118 (SAB 118), which allows registrants to record provisional amounts during a one year “measurement period” similar to that used when accounting for business combinations. However, the measurement period should not extend beyond one year from the Tax Act enactment date and is deemed to have ended when the registrant has obtained, prepared and analyzed the information necessary to finalize its accounting.

To the extent that a company’s accounting for certain income tax effects of the Tax Act is incomplete but the registrant is able to determine a reasonable estimate, it must record a provisional estimate in the financial statements. If a company cannot determine a provisional estimate to be included in the financial statements, it should continue to apply ASC 740, *Accounting for Income Taxes*, on the basis of the provisions of the tax laws that were in effect immediately before the enactment of the Tax Act. More specifically, SAB 118 summarizes a three-step process to be applied at each reporting period to account for and disclose the tax effects of the Tax Act. The steps are (1) to record the effects of the change in tax law for which accounting is complete; (2) to record provisional amounts (or adjustments to provisional amounts) for the effects of the tax law where accounting is not complete, but for which a reasonable estimate has been determined; and (3) where a reasonable estimate cannot yet be made, to continue to apply ASC 740, *Accounting for Income Taxes*, based on the tax law in effect prior to enactment of the Tax Act.

We do not believe that accounting is complete for the year ended January 1, 2018. With respect to the reduction in the U.S. corporate income tax rate to 21 percent, we revalued our ending gross deferred tax items, previously recorded at 35 percent, using the enacted 21 percent corporate tax rate. This change resulted in no net tax expense/benefit but did cause an approximate \$66.0 million reduction to our U.S. federal deferred tax asset fully offset by a reduction of our valuation allowance. While we are able to make a reasonable estimate of the impact of the reduction in corporate rate, it may be affected by other analyses related to the Tax Act, including, but not limited to, our calculation of deemed repatriation of deferred foreign income and the state tax effect of adjustments made to federal temporary differences, as well as changes to our valuation allowance.

Further effects of tax law changes where we have made a provisional estimate include the one-time mandatory repatriation transition tax on the net accumulated earnings and profits of a U.S. taxpayer’s foreign subsidiaries earned post 1986. We have performed a preliminary earnings and profits analysis with consideration given to foreign loss carryforwards acquired as a result of our acquisitions and determined that there should be no income tax effect in the current or any future period. We will continue to identify and evaluate data to more thoroughly identify the tax impact and record adjustments, if any, within the measurement period.

Other significant provisions that are not yet effective and for which we have not completed our analysis, but which may impact income taxes in future years include: limitations on certain entertainment expenses, the inclusion of commissions and performance based compensation in determining the excessive compensation limitation, limitation on the current deductibility of net interest expense in excess of 30 percent of adjusted taxable income, an incremental tax (base erosion anti-abuse tax or BEAT) on excessive amounts paid to foreign related parties, a minimum tax on certain foreign earnings in excess of 10 percent of the foreign subsidiaries tangible assets (i.e., global intangible low-taxed income or GILTI), the benefit related to foreign derived intangible income (FDII), the required capitalization of research and development expenditures and the impact of requiring tax conformity with Accounting Standard Update (ASU) 2014-09, *Revenue from Contracts with Customers*. We are still evaluating whether to make a policy election to treat the GILTI tax as a period expense or to provide U.S. deferred taxes on foreign earnings that are expected to generate GILTI income when they reverse in future years.

In addition, we are subject to income taxes in the United States and foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are many transactions for which the ultimate tax determination is uncertain. Additionally, our calculations of income taxes are based on our interpretations of applicable tax laws in the jurisdictions in which we file.

[Table of Contents](#)

Self Insurance

We are primarily self-insured in the United States for group health insurance and worker's compensation benefits provided to our U.S. employees, and we purchase insurance to protect against annual claims at the individual and aggregate level. We estimate our exposure for claims incurred but not reported at the end of each reporting period. We use our judgment using our historical claim data and information and analysis provided by actuarial and claim advisors, our insurance carriers and brokers on an annual basis to estimate our liability for these claims. This liability is subject to individual insured stop-loss coverage of \$350,000 per individual for group health insurance and \$250,000 per individual for worker's compensation benefits. Our actual claims experience may differ from our estimates.

RESULTS OF OPERATIONS

We operate on a 52 or 53 week year ending on the Monday nearest December 31. Fiscal year 2017 and 2015 were 52 weeks ended January 1, 2018 and December 28, 2015, respectively. Fiscal year 2016 consisted of 53 weeks ended on January 2, 2017 with the additional week included in the fourth quarter. We estimate the additional week contributed approximately \$29.2 million of additional revenue and approximately \$1.1 million of additional operating income for the year ended January 2, 2017.

The following table sets forth the relationship of various items to net sales in our consolidated statements of operations:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
Net sales	100.0%	100.0%	100.0%
Cost of goods sold	83.8	83.3	85.2
Gross profit	16.2	16.7	14.8
Operating expenses:			
Selling and marketing	2.5	2.6	2.7
General and administrative	4.7	5.8	8.0
Amortization of definite-lived intangibles	1.0	1.0	0.9
Restructuring charges	—	0.4	0.4
Impairment of long-lived assets	—	0.1	—
Gain on sale of assets	—	—	(0.1)
Total operating expenses	8.2	9.9	11.9
Operating income	8.0	6.8	2.9
Other income (expense):			
Interest expense	(2.0)	(3.0)	(2.9)
Loss on extinguishment of debt	—	(1.9)	—
Other, net	(0.7)	0.7	0.4
Total other expense, net	(2.7)	(4.2)	(2.5)
Income before income taxes	5.3	2.6	0.4
Income tax provision	(0.6)	(1.2)	(1.6)
Net income (loss)	4.7	1.4	(1.2)
Less: Net income attributable to the noncontrolling interest	—	—	—
Net income (loss) attributable to TTM Technologies, Inc. stockholders	4.7%	1.4%	(1.2)%

[Table of Contents](#)

The Viasystems Group, Inc. (Viasystems) acquisition occurred on May 31, 2015. Accordingly, our fiscal year 2015 only includes Viasystems' 2015 results of operations for the last seven fiscal months.

We have two reportable segments: PCB and E-M Solutions. The PCB reportable segment is comprised of multiple operating segments. Factors considered in determining whether operating segments can be aggregated into reportable segments included similarity regarding economic characteristics, products, production process, type or class of customers, distribution methods and regulatory environments.

The following table compares net sales by reportable segment for fiscal years 2017, 2016 and 2015:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Net Sales:			
PCB	\$2,461,575	\$2,346,554	\$1,944,041
E-M Solutions	210,086	198,483	158,655
Total sales	2,671,661	2,545,037	2,102,696
Inter-segment sales	(13,069)	(11,678)	(7,208)
Total net sales	<u>\$2,658,592</u>	<u>\$2,533,359</u>	<u>\$2,095,488</u>

Net Sales

Total net sales increased \$125.2 million, or 4.9%, from \$2,533.4 million for the year ended January 2, 2017 to \$2,658.6 million for the year ended January 1, 2018. Net sales for the PCB reportable segment, excluding inter-segment sales, increased \$113.6 million, or 4.9%, from \$2,334.9 million for the year ended January 2, 2017 to \$2,448.5 million for the year ended January 1, 2018. This increase was primarily due to higher demand in our Cellular Phone, Computing/Storage/Peripherals and Aerospace and Defense end markets compared to the year ended January 2, 2017, partially offset by lower demand in our Networking/Communications end market. While these changes resulted in essentially no change in PCB shipments as compared to the year ended January 2, 2017, average PCB selling price increased by 4.9% as a result of higher average PCB selling price in our Cellular Phone end market, which is primarily due to a more complex technology at a higher cost. Net sales for the E-M Solutions reportable segment, excluding inter-segment sales, increased \$11.6 million, or 5.8%, from \$198.5 million for the year ended January 2, 2017 to \$210.1 million for the year ended January 1, 2018. This increase was primarily due to higher demand in our Automotive end market.

Total net sales increased \$437.9 million, or 20.9%, from \$2,095.5 million for the year ended December 28, 2015 to \$2,533.4 million for the year ended January 2, 2017. Net sales for the PCB reportable segment, excluding inter-segment sales, increased \$397.7 million, or 20.5%, from \$1,937.2 million for the year ended December 28, 2015 to \$2,334.9 million for the year ended January 2, 2017. This increase was primarily due to the additional sales resulting from a full year contribution from the acquisition of Viasystems, combined with higher demand in our Automotive and Aerospace and Defense end markets, partially offset with lower demand in our Cellular Phone end market. These changes, including the sales from Viasystems, resulted in a 40% increase in PCB shipments from the year ended December 28, 2015. Our increased net sales were partially offset by a decrease in the average PCB selling price of 13%, which was driven by a product mix shift resulting from the acquisition. Net sales for the E-M Solutions reportable segment, excluding inter-segment sales, increased \$40.2 million, or 25.4%, from \$158.3 million for the year ended December 28, 2015 to \$198.5 million for the year ended January 2, 2017. This increase was due to the additional sales resulting from the acquisition of Viasystems.

The inter-segment sales are primarily sales from the PCB reportable segment to the E-M Solutions reportable segment.

Gross Margin

Overall gross margin decreased from 16.7% for the year ended January 2, 2017 to 16.2% for the year ended January 1, 2018. Gross margin for the PCB reportable segment decreased from 17.7% for the year ended

[Table of Contents](#)

January 2, 2017 to 17.2% for the year ended January 1, 2018, primarily due to the change in classification of certain facilities and labor support related costs from general and administrative expenses to cost of goods sold as a result of changes in our business structure, partially offset by higher margins in our Cellular Phone focused facilities. Gross margin for the E-M Solutions reportable segment decreased from 9.1% for the year ended January 2, 2017 to 8.1% for the year ended January 1, 2018 primarily due to mix shift toward higher direct material content work.

Capacity utilization is a key driver for us, particularly in our high volume Asia facilities, as a significant portion of our operating costs are fixed in nature. Capacity utilization for the year ended January 2, 2017 in our Asia and North America PCB facilities was 81% and 57%, respectively, compared to 86% and 54%, respectively, for the year ended January 1, 2018.

Overall gross margin increased from 14.8% for the year ended December 28, 2015 to 16.7% for the year ended January 2, 2017. Gross margin for the PCB reportable segment increased from 15.5% for the year ended December 28, 2015 to 17.7% for the year ended January 2, 2017 primarily due to higher utilization and full year contribution from the Automotive focused facilities and the absence of \$13.3 million of increased costs incurred during fiscal year 2015 due to the fair value mark up of acquired inventory associated with the acquisition of Viasystems. Gross margin for the E-M Solutions reportable segment increased from 6.6% for the year ended December 28, 2015 to 9.1% for the year ended January 2, 2017 primarily due to increased production volumes at certain acquired facilities.

Selling and Marketing Expenses

Selling and marketing expenses decreased \$0.5 million from \$66.4 million for the year ended January 2, 2017 to \$65.9 million for the year ended January 1, 2018. As a percentage of net sales, selling and marketing expenses were 2.6% for the year ended January 2, 2017 as compared to 2.5% for the year ended January 1, 2018. The decrease in selling and marketing expense as a percentage of net sales for the periods noted was primarily due to higher net sales and lower travel expenses.

Selling and marketing expenses increased \$9.0 million from \$57.4 million for the year ended December 28, 2015 to \$66.4 million for the year ended January 2, 2017. As a percentage of net sales, selling and marketing expenses were 2.7% for the year ended December 28, 2015 as compared to 2.6% for the year ended January 2, 2017. The increase in selling and marketing expense for the year ended January 2, 2017 primarily related to additional selling and marketing activities resulting from the acquisition of Viasystems.

General and Administrative Expenses

General and administrative expenses decreased \$21.1 million from \$147.2 million, or 5.8% of net sales, for the year ended January 2, 2017 to \$126.1 million, or 4.7% of net sales, for the year ended January 1, 2018. The decrease in expense is primarily related to the change in classification of certain facilities and labor support related costs to cost of goods sold due to changes in our business structure.

General and administrative expenses decreased \$20.5 million from \$167.7 million, or 8.0% of net sales, for the year ended December 28, 2015 to \$147.2 million, or 5.8% of net sales, for the year ended January 2, 2017. The decrease in expense primarily related to a decrease of \$32.8 million in acquisition-related costs as compared to the year ended December 28, 2015, partially offset by increased expenses resulting from the acquisition of Viasystems. The decrease in general and administrative expense as percentage of net sales was primarily due to the decrease in acquisition-related costs and higher net sales.

Impairment of Long-Lived Assets and Restructuring Charges

For the years ended January 1, 2018, January 2, 2017 and December 28, 2015, we incurred restructuring charges of \$1.2 million, \$8.9 million, and \$7.4 million, respectively, related to a consolidation plan (the Consolidation Plan) announced on September 29, 2015, that resulted in the closure of our facilities in Cleveland, Ohio, Milpitas, California, and Juarez, Mexico and other global realignment efforts.

[Table of Contents](#)

During the year ended January 1, 2018, in connection with the Consolidation Plan, we recognized restructuring charges of \$0.3 million and \$0.5 million in our PCB and E-M Solutions reportable segments, respectively, and \$0.4 million in Corporate. For the year ended January 2, 2017, we recognized restructuring charges of \$3.7 million and \$4.5 million in our PCB and E-M Solutions reportable segments, respectively, and \$0.7 million in Corporate. For the year ended December 28, 2015, we recognized restructuring charges of \$2.0 million, for both our PCB and E-M Solutions reportable segments and \$3.4 million in Corporate. These charges primarily represent employee separation and contract termination and other costs associated with the Consolidation Plan and other global realignment restructuring efforts. As of January 1, 2018, we had incurred approximately \$17.5 million of restructuring charges since the inception of the Consolidation Plan and we have substantially completed such Consolidation Plan.

Additionally, as a result of the above mentioned plant closures and other plant realignment efforts, we also recognized impairment charges of \$3.3 million for the year ended January 2, 2017, of which \$1.4 million were recognized in our PCB reportable segment and \$1.9 million were recognized in the Corporate. The impairment charge for the PCB reportable segment related to machinery and equipment while the impairment charge for Corporate related to the write-off of capitalized software costs.

If forecasts and assumptions used to support the realizability of our long-lived assets change in the future, significant impairment or restructuring charges could result that would adversely affect our results of operations and financial condition.

Other Income (Expense)

Other expense, net decreased \$33.7 million from \$106.5 million for the year ended January 2, 2017 to \$72.8 million for the year ended January 1, 2018. The decrease in other expense, net was primarily due to:

- the absence of the 2016 loss on extinguishment of debt of \$47.8 million related to the full repayment of the 2015 Term Loan Credit Agreement,
- a decrease in interest expense of \$22.1 million, due to overall lower amount of principal outstanding, a lower Term Loan Facility interest rate margin by 175 basis points, and three quarters of comparatively lower amortization of debt issuance costs and debt discount after the full repayment of our 2016 Term Loan in the fourth quarter of 2016, and
- partially offset by an increase from a change in foreign exchange expense of \$36.3 million resulting from a \$22.8 million foreign exchange losses for the year ended January 1, 2018 compared to a \$13.5 million of foreign exchange gains for the year ended January 2, 2017 primarily resulting from a weakening U.S. dollar relative to the Chinese Renminbi.

Other expense, net increased \$54.1 million from \$52.4 million for the year ended December 28, 2015 to \$106.5 million for the year ended January 2, 2017. The increase in other expense, net was primarily due to:

- the loss on extinguishment of debt of \$47.8 million related to the full repayment of the 2015 Term Loan Credit Agreement,
- an increase in interest expense of \$16.2 million primarily related to twelve months of outstanding borrowings consisting of the 2016 Term Loan and ABL Revolving Loans, for the year ended January 2, 2017, compared with only seven months of outstanding borrowings for the year ended December 28, 2015, and
- partially offset by an increase in foreign exchange gains of \$7.1 million resulting from \$13.5 million of foreign exchange gains for the year ended January 2, 2017 compared to \$6.4 million of foreign exchange gains for the year ended December 28, 2015.

Income Taxes

The provision for income taxes decreased \$16.2 million from an income tax expense of \$31.4 million for the year ended January 2, 2017 to \$15.2 million for the year ended January 1, 2018. The decrease in income tax expense in 2017 was primarily due to a release of the valuation allowance in certain foreign entities and an increase in tax incentives in China.

[Table of Contents](#)

Our tax expense is primarily impacted by tax rates in China and Hong Kong, the U.S. federal income tax rate, apportioned state income tax rates, generation of other credits and deductions available to us, changes in our valuation allowance, and certain non-deductible items. Certain losses generated are not more likely than not to be realizable, and thus no income tax benefit has been recognized on these losses. We had a net deferred income tax liability of approximately \$4.9 million and \$14.0 million as of January 1, 2018 and January 2, 2017, respectively. As of January 1, 2018, we have a full valuation allowance recorded in U.S. Based on our forecast for future taxable earnings in certain foreign jurisdictions, we believe it is more likely than not that we will utilize the deferred income tax assets in future periods.

The provision for income taxes decreased \$3.2 million from an income tax expense of \$34.6 million for the year ended December 28, 2015 to \$31.4 million for the year ended January 2, 2017. The decrease in income tax expense in 2016 is primarily due to the release of uncertain tax positions due to lapse of statute in foreign jurisdiction

Liquidity and Capital Resources

Our principal sources of liquidity have been cash provided by operations, the issuance of convertible senior notes, term debt, senior notes and revolving debt. Our principal uses of cash have been to finance capital expenditures, finance acquisitions (including the contemplated acquisition of Anaren in fiscal 2018), meet debt service requirements, fund working capital requirements, and refinance existing debt. We anticipate that servicing debt, financing capital expenditures, financing acquisitions, and funding working capital requirements will continue to be the principal demands on our cash in the future.

Cash flow provided by operating activities during the year ended January 1, 2018 was \$332.8 million as compared to \$298.3 million in the same period in 2016. The improved cash flow was the result of stronger operational performance. As of January 1, 2018, we had net working capital of approximately \$501.0 million compared to \$323.8 million as of January 2, 2017. At January 1, 2018 cash cycle days improved to 38 days as compared to 43 days at January 2, 2017.

Net cash used in investing activities was approximately \$124.1 million for the year ended January 1, 2018 primarily reflecting the purchases of property, plant and equipment of \$151.3 million, offset by net of proceeds from sales of property, plant and equipment and assets held for sale of \$27.2 million.

Net cash used in financing activities was approximately \$59.0 million for the year ended January 1, 2018 primarily reflecting proceeds from long-term debt totaling \$725.0 million, offset by the repayment of \$700.9 million of long-term debt, repayment of \$63.0 million of a revolving loan, payment of \$8.6 million for purchase of the non-controlling interest in one of our subsidiaries, and payment of debt issuance costs and original issue discount of \$11.6 million associated with the Term Loan Facility and Senior Notes.

As of January 1, 2018, we had cash and cash equivalents of approximately \$409.3 million, of which approximately \$294.2 million was held by our foreign subsidiaries, primarily in Asia.

Our 2018 capital expenditure plan is expected to be in the range of \$150.0 million to \$170.0 million.

Long-term Debt and Letters of Credit

On September 28, 2017, we entered into a \$350.0 million Term Loan Facility, and issued \$375.0 million of Senior Notes. In conjunction with the issuance of the Term Loan Facility and Senior Notes, we repaid in full the remaining outstanding balance of the 2016 Term Loan and repaid \$63.0 million of our existing U.S. ABL.

In conjunction with the pending acquisition of Anaren, we have received commitments to fund a \$700.0 million Incremental Facility. Subsequent to January 1, 2018, we completed the allocation of \$600.0 million of commitments from lenders in the syndication for the Incremental Facility, which supercedes the original \$700.0 million commitment. The Incremental Facility would be issued at a discount at 99.75% and have a floating rate of LIBOR plus a margin of 2.5%. Upon the consummation of the acquisition of Anaren, we will use the borrowings from the Incremental Facility and cash on hand to finance such acquisition.

Term Loan Facility

The Term Loan Facility, of which \$3.5 million is included in short-term debt and \$345.6 million is included in long-term debt, was issued at a discount at 99.5% and bears interest, at our option, at a floating rate of LIBOR,

[Table of Contents](#)

plus an applicable interest margin of 2.5%, or an alternate base rate, (defined as the greater of the JP Morgan prime, the New York Fed bank rate plus 0.9% or LIBOR plus 1%), subject to a 1% floor plus an applicable margin of 1.5%. At January 1, 2018, the interest rate on the outstanding borrowings under the Term Loan Facility was 4.06%. There is no provision, other than an event of default, for the interest margin to increase. The Term Loan Facility will mature on September 28, 2024. The Term Loan Facility is secured by a significant amount of our domestic assets and a pledge of 65% of voting stock of our first tier foreign subsidiaries and is structurally senior to our Senior Notes and Convertible Senior Notes. See Senior Notes and Convertible Senior Notes below.

We are required to make scheduled payments of the outstanding Term Loan Facility balance on a quarterly basis beginning January 1, 2018. Based on certain parameters defined in the Term Loan Facility, including a First Lien Leverage Ratio, we may be required to make an additional principal payment on an annual basis beginning after fiscal year 2018, if our First Lien Leverage Ratio is greater than 2.0. Any additional annual payments or prepayments would reduce future required scheduled payments. Any remaining outstanding balances under the Term Loan Facility are due at the maturity date of September 28, 2024.

Borrowings under the Term Loan Facility are subject to certain affirmative and negative covenants, including limitations on indebtedness, corporate transactions, investments and dispositions, and share payments. At January 1, 2018, we were in compliance with the covenants under the Term Loan Facility.

Senior Notes

The \$375.0 million of Senior Notes issued, which is included in long-term debt, bear interest at a rate of 5.63% per annum. Interest is payable semiannually in arrears on April 1 and October 1 of each year beginning April 1, 2018. The Senior Notes will mature on October 1, 2025.

Borrowings under the Senior Notes are subject to certain affirmative and negative covenants, including limitations on indebtedness, corporate transactions, investments and dispositions, and share payments. At January 1, 2018, we were in compliance with the covenants under the Senior Notes.

Asset-Based Lending Agreements

We maintain a \$200.0 million U.S. ABL, and a \$150.0 million Asia Asset-Based Lending Credit Agreement (Asia ABL) (collectively the ABL Revolving Loans).

The U.S. ABL consists of three tranches comprised of a revolving credit facility of up to \$200.0 million, a letter of credit facility for up to \$50.0 million, and swingline loans for up to \$30.0 million, provided that at no time may amounts outstanding under the tranches exceed in aggregate \$200.0 million or the applicable borrowing base, which is a percentage of the principal amount of Eligible Accounts, as defined in the U.S. ABL agreement. Borrowings under the U.S. ABL bear interest at either a floating rate of LIBOR plus a margin of 150 basis points or JP Morgan Chase Bank's prime rate plus a margin of 50 basis points, at our option. At January 1, 2018, the interest rate on the outstanding borrowings under the U.S. ABL was 3.06%. The applicable margin can vary based on the remaining availability of the facility, from 125 to 175 basis points for LIBOR-based loans and from 25 to 75 basis points for JP Morgan Chase Bank's prime rate-based loans. Other than availability and an event of default, there are no other provisions for the interest margin to increase. The U.S. ABL will mature on May 31, 2020. Loans made under the U.S. ABL are secured first by all of our domestic cash, receivables and certain inventories as well as by a second position against a significant amount of our domestic assets and a pledge of 65% of voting stock of our first tier foreign subsidiaries and are structurally senior to our Senior Notes and Convertible Senior Notes. See Senior Notes and Convertible Senior Notes elsewhere in this section. As noted earlier, concurrent with the issuance of the Term Loan Facility and Senior Notes, we paid down \$63.0 million of the outstanding balance of our U.S. ABL. At January 1, 2018, \$17.0 million of the U.S. ABL was outstanding and classified as long-term debt, which is consistent with its maturity date.

The Asia ABL consists of two tranches comprised of a revolving credit facility for up to \$150.0 million and a letter of credit facility for up to \$100.0 million, provided that at no time may amounts outstanding under both tranches exceed in aggregate \$150.0 million or the applicable borrowing base, which is a percentage of the principal amount of Eligible Accounts, as defined in the Asia ABL agreement. Borrowings under the Asia ABL

[Table of Contents](#)

bear interest at a floating rate of LIBOR plus 140 basis points. At January 1, 2018, the interest rate on the outstanding borrowings under the Asia ABL was 2.96%. There is no provision, other than an event of default, for the interest margin to increase. The Asia ABL will mature on May 22, 2020. Loans made under the Asia ABL are secured by a portion of our Asia cash and receivables and are structurally senior to our domestic obligations, including the Senior Notes and Convertible Senior Notes. See Senior Notes and Convertible Senior Notes elsewhere in this section. At January 1, 2018, \$30.0 million of the Asia ABL was outstanding and classified as long-term debt, which is consistent with its maturity date.

We have up to \$50.0 million and \$100.0 million Letters of Credit Facilities under the U.S. ABL and the Asia ABL, respectively. As of January 1, 2018, letters of credit in the amount of \$7.6 million were outstanding under the U.S. ABL and \$43.1 million were outstanding under the Asia ABL with various expiration dates through March 2019. Available borrowing capacity under the U.S. ABL and the Asia ABL was \$175.4 million and \$76.9 million, respectively, which considers letters of credit outstanding at January 1, 2018.

We are required to pay a commitment fee of 0.25% to 0.375% per annum on any unused portion of the ABL Revolving Loans. We paid commitment fees of \$0.8 million, \$0.7 million and \$0.8 million for the years ended January 1, 2018, January 2, 2017, and December 28, 2015, respectively. Under the occurrence of certain events, the ABL Revolving Loans are subject to various financial and operational covenants, including maintaining minimum fixed charge coverage ratios. At January 1, 2018, we were in compliance with the covenants under the ABL Revolving Loans.

Chinese Revolver

Additionally, we are party to a revolving loan credit facility (Chinese Revolver) with a lender in China. Under this arrangement, the lender has made available to us approximately \$32.2 million in unsecured borrowing with all terms of the borrowing to be negotiated at the time the Chinese Revolver is drawn upon. There are no commitment fees on the unused portion of the Chinese Revolver, and this arrangement expires in January 2019. As of January 1, 2018, the Chinese Revolver had not been drawn upon.

Convertible Senior Notes due 2020

We issued 1.75% convertible senior notes due December 15, 2020, in a public offering for an aggregate principal amount of \$250.0 million. The convertible senior notes bear interest at a rate of 1.75% per annum. Interest is payable semiannually in arrears on June 15 and December 15 of each year. The convertible senior notes are senior unsecured obligations and rank equally to our future unsecured senior indebtedness and senior in right of payment to any of our future subordinated indebtedness. Offering expenses are being amortized to interest expense over the term of the convertible senior notes.

Conversion: At any time prior to March 15, 2020, holders may convert their convertible senior notes into cash and, if applicable, into shares of our common stock based on a conversion rate of 103.7613 shares of our common stock per \$1,000 principal amount of convertible senior notes, subject to adjustment, under the following circumstances: (1) during any calendar quarter beginning after March 31, 2015 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days during the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day of such preceding calendar quarter; (2) during the five business day period after any 10 consecutive trading day period in which the trading price per note for each day of that 10 consecutive trading day period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on such day; or (3) upon the occurrence of specified corporate transactions described in the indenture governing the notes. As of January 1, 2018, the conversion criteria had been met allowing holders to give notice of conversion in 2017 and the first quarter of 2018.

On or after March 15, 2020 until the close of business on the third scheduled trading day preceding the maturity date, holders may convert their notes at any time, regardless of the foregoing circumstances. Upon conversion, for each \$1,000 principal amount of notes, we will pay shares of our common stock, cash or a combination of cash and shares of our common stock at our election, if applicable, based on a daily conversion value calculated on a proportionate basis for each day of the 80 trading day observation period. All conversions

Table of Contents

occurring on the same date or on or after March 15, 2020 shall be settled using the same settlement method. Additionally, in the event of a fundamental change as defined in the indenture governing the notes, or other conversion rate adjustments such as share splits or combinations, other distributions of shares, cash or other assets to stockholders, including self-tender transactions (Other Conversion Rate Adjustments), the conversion rate may be modified to adjust the number of shares per \$1,000 principal amount of the notes. As of January 1, 2018, none of the criteria for a fundamental change or a conversion rate adjustment had been met.

The maximum number of shares issuable upon conversion, including the effect of a fundamental change and subject to Other Conversion Rate Adjustments, would be 32.4 million.

Note Repurchase: We are not permitted to redeem the convertible senior notes at any time prior to maturity. In the event of a fundamental change or certain default events, as defined in the indenture governing the notes, holders may require us to repurchase for cash all or a portion of their convertible senior notes at a price equal to 100% of the principal amount, plus any accrued and unpaid interest.

In connection with the issuance of the convertible senior notes due 2020, we entered into a convertible note hedge and warrant transaction (the Call Spread Transaction), with respect to our common stock. The convertible note hedge consists of our option to purchase up to 25.9 million common stock shares at a price of \$9.64 per share. The hedge expires on December 15, 2020 and can only be executed upon the conversion of the above mentioned convertible senior notes due 2020. Additionally, we sold warrants to purchase 25.9 million shares of our common stock at a price of \$14.26 per share. The warrants expire ratably from March 2021 through January 2022. The Call Spread Transaction has no effect on the terms of the convertible senior notes due 2020 and reduces potential dilution by effectively increasing the conversion price of the convertible senior notes due 2020 to \$14.26 per share of our common stock.

Based on our current level of operations, we believe that cash generated from operations, cash on hand and cash from the issuance of term and revolving debt will be adequate to meet our currently anticipated capital expenditure, debt service, and working capital needs for the next 12 months.

Contractual Obligations and Commitments

The following table provides information on our contractual obligations as of January 1, 2018:

Contractual Obligations(1)	Total	Less Than 1 Year	1 - 3	4 - 5	After
			Years	Years	5 Years
			(In thousands)		
Long-term debt obligations	\$ 773,044	\$ 4,578	\$ 53,966	\$ 7,875	\$706,625
Convertible debt obligations	249,985	—	249,985	—	—
Interest on debt obligations	279,701	41,667	81,171	70,032	86,831
Equipment payables	59,049	58,465	584	—	—
Purchase obligations	104,779	94,433	1,764	610	7,972
Operating lease commitments	38,110	18,604	9,146	4,173	6,187
Total contractual obligations	<u>\$1,504,668</u>	<u>\$217,747</u>	<u>\$396,616</u>	<u>\$82,690</u>	<u>\$807,615</u>

(1) Unrecognized uncertain tax benefits of \$38.8 million are not included in the table above as the settlement timing is uncertain.

Off Balance Sheet Arrangements

We do not currently have, nor have we ever had, any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts. As a result, we are not materially exposed to any financing, liquidity, market, or credit risk that could arise if we had engaged in these relationships.

Seasonality

Orders for our products generally correspond to the production schedules of our customers. We historically experience higher net sales in the third and fourth quarters due to end customer demand in the fourth quarter for consumer electronics products. Seasonal fluctuations also include the Chinese New Year holidays in the first quarter, which typically results in lower net sales. We attribute this decline to shutdowns of our customers' and our own China based manufacturing facilities surrounding the Chinese New Year public holidays, which normally occur in January or February of each year.

Recently Issued Accounting Standards

In August 2017, the Financial Accounting Standards Board (FASB) issued ASU 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities*. This ASU amends and simplifies existing guidance in order to allow companies to more accurately present the economic effects of risk management activities in the financial statements. ASU 2017-12 also amends the guidance surrounding the recognition of the value of hedged instruments to include the entire change in value, rather than just the effective portion, in other comprehensive income and recognized in earnings at the same time that the hedged item affects earnings for cash flow and net investment hedges. This ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the new guidance to determine the impact it may have on our consolidated financial statements and related disclosures.

In January 2017, the FASB issued ASU 2017-04, *Intangibles (Topic 350): Goodwill and Other*. This ASU simplifies the accounting for goodwill impairment and removes Step 2 of the goodwill impairment test. Goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value limited to the total amount of goodwill allocated to that reporting unit. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. We elected to early adopt ASU 2017-04 on a prospective basis during the second quarter of 2017, and the adoption did not have a material impact on our consolidated financial statements and related disclosures.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations (Topic 805): Clarifying the Definition of a Business*. The purpose of this ASU is to clarify the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. We elected to early adopt ASU 2017-01 on a prospective basis during the fourth quarter of 2017, and the adoption did not have a material impact on our consolidated financial statements and related disclosures.

In October 2016, the FASB issued ASU 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory*. The objective of this update is to improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory by recognizing the income tax consequences when the transfer occurs. This ASU is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on our consolidated financial statements or related disclosures.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230)*. The objective of this update is to add or clarify guidance on the classification of certain cash receipts and payments in the statement of cash flows. We adopted this ASU 2016-15 in the first quarter of 2017 and the adoption did not have a material impact on our consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-09, *Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. The objective of this update is to simplify several aspects of the accounting for employee share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. We adopted ASU 2016-09 during the first quarter of 2017. The adoption did not have a material impact on our consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*. The objective of this update is to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on

[Table of Contents](#)

the balance sheet and disclosing key information about leasing arrangements. This ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those annual periods and is to be applied utilizing a modified retrospective approach. While we continue to evaluate the new guidance to determine the impact it may have on our consolidated financial statements and related disclosures, the primary effect of adopting this update will be to record assets and obligations for current operating leases.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments—Overall (Topic 825): Recognition and Measurement of Financial Assets and Financial Liabilities*. This ASU amends certain aspects of recognition, measurement, presentation and disclosure of financial instruments, and supersedes the guidance to classify equity securities with readily determinable fair values into different categories (that is, trading or available-for-sale) and requires equity securities to be measured at fair value with changes in the fair value recognized through net income. This ASU is effective for annual and interim periods beginning after December 15, 2017. We do not anticipate the adoption will have a material impact on our consolidated financial statements and related disclosures.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, as amended, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for us at the beginning of fiscal year 2018. The standard permits the use of either the retrospective or cumulative effect transition method. We have assessed that the impact of the new guidance will result in a change to the timing of revenue recognition for our revenue stream from “point in time” upon physical delivery to an “over time” model and this transition will have a material impact on our consolidated financial statements upon adoption. As of January 2, 2018, we will apply the cumulative effect transition method and currently estimate that the adoption will increase retained earnings by a range of \$30.0 million to \$40.0 million and contract assets by a range of \$250.0 million to \$270.0 million for 2017. We have identified and implemented changes to our revenue processes and internal controls to meet the ASU’s reporting and disclosure requirements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign currency risks

In the normal course of business we are exposed to risks associated with fluctuations in foreign currency exchange rates associated with transactions that are denominated in currencies other than our functional currencies, as well as the effects of translating amounts denominated in a foreign currency to the U.S. Dollar as a normal part of our financial reporting process. Certain of our China operations utilize the Renminbi (RMB) and the Hong Kong Dollar (HKD) as the functional currencies, which results in recognition of translation adjustments included as a component of other comprehensive income. Our foreign exchange exposure results primarily from employee-related and other costs of running operations in foreign countries, foreign currency denominated purchases and translation of balance sheet accounts denominated in foreign currencies. Our primary foreign exchange exposure is to the RMB. For the year ended January 1, 2018, our consolidated statement of operations includes \$22.8 of foreign currency losses primarily due to the appreciation of the RMB against the U.S. dollar and the HKD. We do not engage in hedging to manage foreign currency risk related to revenue and expenses denominated in RMB and HKD, nor do we currently use derivative instruments to reduce exposure to foreign currency risk for a majority of our loans due from our foreign subsidiaries. However, we may consider the use of derivatives in the future. In general, our Chinese customers pay us in RMB, which partially mitigates this foreign currency exchange risk. Additionally, loans due from our foreign subsidiaries are, in some cases, denominated in currencies other than the RMB, thus providing a natural economic hedge, partially mitigating our RMB foreign currency exposure.

Interest rate risk

Our business is exposed to interest rate risk resulting from fluctuations in interest rates. Our interest expense is more sensitive to fluctuations in the general level of LIBOR interest rates than to changes in rates in other markets. Increases in interest rates would increase interest expense relating to our outstanding variable rate borrowings and increase the cost of debt. Fluctuations in interest rates can also lead to significant fluctuations in the fair value of our debt obligations.

[Table of Contents](#)

As of January 1, 2018, approximately 61.3% of our long term debt was based on fixed rates. Based on our borrowings as of January 1, 2018, an assumed 100 basis point change in variable rates would cause our annual interest cost to change by \$4.0 million.

Debt Instruments

The table below presents the fiscal calendar maturities of long-term debt through 2022 and thereafter of our debt instruments as of January 1, 2018 and January 2, 2017.

As of January 1, 2018									
	2018	2019	2020	2021	2022	Thereafter	Total	Fair Market Value	Weighted Average Interest Rate
(In thousands)									
US\$ Variable Rate	\$ 3,500	\$2,625	\$ 50,500	\$ 4,375	\$ 3,500	\$331,625	\$ 396,125	\$ 393,943	3.94%
US\$ Fixed Rate	1,078	407	250,419	—	—	375,000	626,904	815,887	4.08%
Total	\$ 4,578	\$3,032	\$300,919	\$ 4,375	\$ 3,500	\$706,625	\$1,023,029	\$1,209,830	

As of January 2, 2017									
	2017	2018	2019	2020	2021	Thereafter	Total	Fair Market Value	Weighted Average Interest Rate
(In thousands)									
US\$ Variable Rate	\$110,000	\$ —	\$ —	\$ —	\$700,000	\$ —	\$ 810,000	\$ 818,750	4.84%
US\$ Fixed Rate	652	358	381	250,407	—	—	251,798	382,673	1.78%
Total	\$110,652	\$ 358	\$ 381	\$250,407	\$700,000	\$ —	\$1,061,798	\$1,201,423

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Reference is made to our consolidated financial statements, the notes thereto, and the report thereon, commencing on page 68 of this report, which consolidated financial statements, notes and report are incorporated herein by reference.

We operate on a 52 or 53 week year ending on the Monday nearest December 31. Fiscal year 2017 consisted of 52 weeks ended January 1, 2018, and fiscal year 2016 consisted of 53 weeks ended January 2, 2017 with the additional week included in the fourth quarter. Each quarter of fiscal year 2017 contained 91 days.

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
(In thousands, except per share data)				
Year Ended January 1, 2018:				
Net sales	\$625,247	\$627,182	\$666,814	\$739,349
Gross profit	105,019	95,867	96,834	131,861
Income before income taxes	37,264	26,309	22,740	53,645
Net income	33,125	20,751	21,535	49,316
Net income attributable to TTM Technologies, Inc. stockholders	32,959	20,591	21,453	49,211
Earnings per share attributable to TTM Technologies, Inc. stockholders:				
Basic	\$ 0.33	\$ 0.20	\$ 0.21	\$ 0.48
Diluted	\$ 0.28	\$ 0.18	\$ 0.19	\$ 0.40
Year Ended January 2, 2017:⁽¹⁾⁽²⁾				
Net sales	\$583,258	\$601,847	\$641,720	\$706,534
Gross profit	83,563	97,645	109,562	132,845
Income (loss) before income taxes	(1,673)	17,786	35,283	15,606
Net income (loss)	(7,150)	18,765	25,770	(1,810)
Net income (loss) attributable to TTM Technologies, Inc. stockholders	(7,264)	18,548	25,582	(2,005)
Earnings (loss) per share attributable to TTM Technologies, Inc. stockholders:				
Basic	\$ (0.07)	\$ 0.19	\$ 0.26	\$ (0.02)
Diluted	\$ (0.07)	\$ 0.17	\$ 0.23	\$ (0.02)

- (1) Fiscal year 2016 consisted of 53 weeks ended January 2, 2017 with the additional week included in the fourth quarter. We estimate that the additional week contributed approximately \$29.2 million of additional revenue and approximately \$1.1 million of additional operating income for the year ended January 2, 2017.
- (2) Includes impairment and restructuring charges of \$3.3 million and \$1.9 million, respectively, in the first quarter, restructuring charges of \$4.0 million in the second quarter, restructuring charges of \$2.1 million in the third quarter, and loss on extinguishment of debt of \$47.8 million and restructuring charges of \$0.9 million in the fourth quarter.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, under the supervision and with the participation of our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Report. Based on this evaluation, our CEO and CFO have concluded that, as of January 1, 2018, such disclosure controls and procedures were effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosures.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). Under the supervision of and with the participation of our CEO and CFO, management conducted an assessment of the effectiveness of our internal control over financial reporting as of January 1, 2018 based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this assessment, management concluded that our internal control over financial reporting was effective as of January 1, 2018.

The effectiveness of our internal control over financial reporting as of January 1, 2018 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report, which appears under the heading "Report of Independent Registered Public Accounting Firm" on page 69 of this Report.

Inherent Limitations on Effectiveness of Controls

A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. In addition, the design of any system of controls is based in part on certain assumptions about the likelihood of future events.

Changes in Internal Control over Financial Reporting

We are implementing an enterprise resource planning ("ERP") system on a worldwide basis, which is expected to improve the efficiency of the financial reporting and related transaction processes. The gradual implementation is expected to occur in phases over the next several years. The implementation of a worldwide ERP system will likely affect the processes that constitute our internal control over financial reporting and will require testing for effectiveness in future periods.

We have completed the ERP implementation with respect to the first phase, and accordingly, modified certain existing as well as implemented new processes and internal controls to adapt to our new ERP system. We believe that the new ERP system and related changes to processes and internal controls will enhance our internal control over financial reporting while providing us with the ability to scale our business. We have taken the necessary steps to monitor and maintain appropriate internal control over financial reporting during 2017 and will continue to evaluate the operating effectiveness of related key controls during subsequent periods.

There were no other changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended January 1, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
TTM Technologies, Inc.:

Opinions on the Consolidated Financial Statements and Internal Control Over Financial Reporting

We have audited the accompanying consolidated balance sheets of TTM Technologies, Inc. and subsidiaries (the “Company”) as of January 1, 2018 and January 2, 2017, the related consolidated statements of operations, comprehensive income (loss), stockholders’ equity, and cash flows for each of the years in the three-year period ended January 1, 2018, and the related notes (collectively, the “consolidated financial statements”). We also have audited the Company’s internal control over financial reporting as of January 1, 2018, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of January 1, 2018 and January 2, 2017, and the results of its operations and its cash flows for each of the years in the three-year period ended January 1, 2018, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 1, 2018, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Basis for Opinions

The Company’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management’s Report on Internal Control over Financial Reporting* appearing under Item 9A. Our responsibility is to express an opinion on the Company’s consolidated financial statements and an opinion on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting

[Table of Contents](#)

includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ KPMG LLP

We have served as the Company's auditor since 2014.

TTM TECHNOLOGIES, INC.
Notes to Consolidated Financial Statements
(Dollars and shares in thousands, except per share data)

(1) Nature of Operations and Basis of Presentation

TTM Technologies, Inc. (the Company or TTM) is a leading global printed circuit board (PCB) manufacturer, focusing on quick-turn and volume production of technologically complex PCBs and electro-mechanical solutions (E-M Solutions). The Company provides time-to-market and volume production of advanced technology products and offers a one-stop manufacturing solution to customers from engineering support to prototype development through final mass production. This one-stop manufacturing solution enables the Company to align technology developments with the diverse needs of the Company's customers and to enable them to reduce the time required to develop new products and bring them to market.

The Company serves a diversified customer base in various markets throughout the world, including aerospace and defense, automotive components, smartphones and touchscreen tablets, high-end computing, medical, industrial and instrumentation related products, as well as networking/communications infrastructure products. The Company's customers include both original equipment manufacturers (OEMs) and electronic manufacturing services (EMS) providers.

The Company operates on a 52 or 53 week year ending on the Monday nearest December 31. Fiscal 2017 and 2015 were 52 weeks ended on January 1, 2018 and December 28, 2015, respectively. Fiscal 2016 consisted of 53 weeks ended on January 2, 2017 with the additional week included in the fourth quarter. All references to years relate to fiscal years unless otherwise noted.

(2) Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Such estimates include the sales return reserve; accounts receivable; inventories; goodwill; intangible assets and other long-lived assets; self insurance reserves; product warranty liabilities; environmental liabilities; legal contingencies; income taxes; and others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the economic environment, which management believes to be reasonable under the circumstances. Management adjusts such estimates and assumptions when facts and circumstances dictate. The actual results we experienced may differ materially and adversely from our estimates. To the extent there are material differences between the estimates and actual results, our future result of operations will be affected.

Principles of Consolidation

The consolidated financial statements include the accounts of TTM and its subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Foreign Currency Translation and Transactions

The functional currency of certain of the Company's subsidiaries is either the Chinese Renminbi (RMB) or the Hong Kong Dollar. Accordingly, assets and liabilities are translated into U.S. dollars using period-end exchange rates. Sales and expenses are translated at the average exchange rates in effect during the period. The resulting translation gains or losses are recorded as a component of accumulated other comprehensive income in the consolidated statement of stockholders' equity and the consolidated statement of comprehensive income (loss). Net gains and losses resulting from foreign currency remeasurements and transactions are included in

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

income as a component of other, net in the consolidated statements of operations and totaled \$22,802 loss, \$13,538 gain and \$6,766 gain for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively.

Cash Equivalents

The Company considers highly liquid investments with insignificant interest rate risk and original maturities to the Company of three months or less to be cash equivalents. Cash equivalents consist primarily of interest-bearing bank accounts.

The Company considers highly liquid investments with an effective maturity to the Company of more than three months and less than one year to be short-term investments.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are reflected at estimated net realizable value, do not bear interest and do not generally require collateral. The Company performs credit evaluations of its customers and adjusts credit limits based upon payment history and the customer's current creditworthiness. The Company maintains an allowance for doubtful accounts based upon a variety of factors. The Company reviews all open accounts and provides specific reserves for customer collection issues when it believes the loss is probable, considering such factors as the length of time receivables are past due, the financial condition of the customer, and historical experience. The Company also records a reserve for all customers, excluding those that have been specifically reserved for, based upon evaluation of historical losses.

The following summarizes the activity in the Company's allowance for doubtful accounts for the years ended January 1, 2018, January 2, 2017 and December 28, 2015:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Balance at beginning of year	\$ 2,851	\$ 1,525	\$ 696
Additions charged to expense	346	1,560	854
Deductions	(719)	(223)	(26)
Effect of foreign currency exchange rates	(10)	(11)	1
Balance at end of year	<u>\$ 2,468</u>	<u>\$ 2,851</u>	<u>\$ 1,525</u>

Inventories

Inventories are stated at the lower of cost (determined on a first-in, first-out and weighted average basis) or net realizable value. Assessments to value the inventory at the lower of the actual cost to purchase and / or manufacture the inventory, or net realizable value of the inventory, are based upon assumptions about future demand and market conditions. As a result of the Company's assessments, when the net realizable value of inventory is less than the carrying value, the inventory cost is written down to the net realizable value and the write down is recorded as a charge to cost of goods sold.

Property, Plant and Equipment, Net

Property, plant and equipment are recorded at cost. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets. Assets recorded under leasehold improvements are

TTM TECHNOLOGIES, INC.**Notes to Consolidated Financial Statements — (Continued)**

amortized using the straight-line method over the lesser of their useful lives or the related lease term. The Company uses the following estimated useful lives:

Land use rights	50-99 years
Buildings and improvements	7-50 years
Machinery and equipment	3-12 years
Furniture and fixtures	3-7 years

Upon retirement or other disposition of property, plant and equipment, the cost and related accumulated depreciation are removed from the accounts. The resulting gain or loss is included in the determination of operating income in the period incurred. Depreciation and amortization expense on property, plant and equipment was \$150,809, \$156,229, and \$133,508 for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively.

The Company capitalizes interest on borrowings during the active construction period of major capital projects. Capitalized interest is amortized over the average useful lives of such assets, which primarily consist of buildings and machinery and equipment. The Company capitalized interest costs of \$1,494, \$1,876 and \$888 during the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively, in connection with various capital projects.

Major renewals and betterments are capitalized and depreciated over their estimated useful lives while minor expenditures for maintenance and repairs are included in operating income as incurred.

Goodwill

Goodwill represents the excess of purchase price of an acquisition over the fair value of net assets acquired. Goodwill is not amortized but instead is assessed for impairment, at a reporting unit level, annually and when events and circumstances warrant an evaluation. In making this assessment, management relies on a number of factors, including expected future operating results, business plans, economic projections, anticipated future cash flows, business trends and market conditions.

The Company has two reportable segments consisting of four reporting units. The Company evaluates its goodwill on an annual basis in the fourth quarter or more frequently if it believes indicators of impairment exist. The Company assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the Company concludes that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, it compares the fair values of the applicable reporting units with their carrying values. The Company estimates the fair values of its reporting units using a combination of the income and market approach. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the amount by which the carrying value exceeds the fair value is recognized as an impairment loss. In the fourth quarter of 2017, the Company performed its annual impairment test qualitatively and concluded that goodwill was not impaired.

Intangible Assets

Intangible assets include customer relationships and technology, which are being amortized over their estimated useful lives using straight-line and accelerated methods. The estimated useful lives of such intangibles range from 3 years to 10 years.

Impairment of Long-lived Assets

Long-lived tangible assets, including property, plant and equipment, assets held for sale, and definite-lived intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

carrying value of the asset or asset groups may not be recoverable. The Company regularly evaluates whether events or circumstances have occurred that indicate possible impairment and relies on a number of factors, including expected future operating results, business plans, economic projections, and anticipated future cash flows. The Company uses an estimate of the future undiscounted net cash flows of the related asset or asset group over the remaining life in measuring whether the assets are recoverable. Measurement of the amount of impairment, if any, is based upon the difference between the asset's carrying value and estimated fair value. Fair value is determined through various valuation techniques, including cost-based, market and income approaches as considered necessary. See Note 4 for information regarding the impairment of long-lived assets during 2016.

The Company classifies assets to be sold as assets held for sale when (i) Company management has approved and commits to a plan to sell the asset; (ii) the asset is available for immediate sale in its present condition and is ready for sale; (iii) an active program to locate a buyer and other actions required to sell the asset have been initiated; (iv) the sale of the asset is probable; (v) the asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Assets classified as held for sale are recorded at the lower of the carrying amount or fair value less the cost to sell and are a component of prepaid expenses and other current assets in the consolidated balance sheet.

The Company classifies assets held for use when a decision to dispose of an asset or a business is made and the held for sale criteria are not met. Assets of the business are evaluated for recoverability in the following order: (i) assets other than goodwill, property and intangibles; (ii) property and intangibles subject to amortization; and (iii) goodwill. In evaluating the recoverability of property and intangible assets subject to amortization, in a held for use business, the carrying value is first compared to the sum of the undiscounted cash flows expected to result from the use and eventual disposition. If the carrying value exceeds the undiscounted expected cash flows, then a fair value analysis is performed. An impairment charge is recognized if the carrying value exceeds the fair value.

Revenue Recognition

The Company derives its revenue primarily from the sale of PCBs using customer supplied engineering and design plans and recognizes revenue when: (i) persuasive evidence of a sales arrangement exists; (ii) the sales terms are fixed or determinable; (iii) title and risk of loss have transferred; and (iv) collectability is reasonably assured — generally when products are shipped to the customer, except in situations in which title passes upon receipt of the products by the customer. In this case, revenues are recognized upon notification that customer receipt has occurred. The Company does not have customer acceptance provisions, but it does provide its customers a limited right of return for defective PCBs. The Company accrues an estimated amount for sales returns and allowances related to defective PCBs at the time of sale based on its ability to estimate sales returns and allowances using current and historical information. The reserve for sales returns and allowances is included as a reduction to revenue and accounts receivable, net. Shipping and handling fees and related freight costs and supplies associated with shipping products to customers are included as a component of cost of goods sold. Incremental warranty costs that are not related to sales returns are recorded in accrued expenses and cost of goods sold.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The following summarizes the activity in the Company's allowance for sales returns and allowances for the years ended January 1, 2018, January 2, 2017 and December 28, 2015:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Balance at beginning of year	\$ 8,119	\$ 7,789	\$ 6,890
Additions charged as a reduction of sales	14,574	22,060	21,728
Deductions	(14,524)	(21,728)	(20,832)
Effect of foreign currency exchange rates	2	(2)	3
Balance at end of year	<u>\$ 8,171</u>	<u>\$ 8,119</u>	<u>\$ 7,789</u>

Stock-Based Compensation

The Company recognizes stock-based compensation expense in its consolidated financial statements for its incentive compensation plan awards.

The incentive compensation plan awards include performance-based restricted stock units, restricted stock units, and stock options. The associated compensation expense for all awards is based on the grant date fair value of the awards, and for years 2016 and 2015 include estimated forfeitures. For performance-based restricted stock units, compensation expense also includes management's periodic assessment of annual financial performance goals to be achieved. Compensation expense for the incentive compensation plan awards is recognized on a straight line basis over the vesting period of the awards. The fair value of performance-based restricted stock units is estimated on the grant date using a Monte Carlo simulation model based on the underlying common stock closing price as of the date of grant, the expected term, stock price volatility, and risk-free interest rates. The fair value of restricted stock units is measured on the grant date based on the quoted closing market price of the Company's common stock. The fair value of the stock options is estimated on the grant date using the Black-Scholes option pricing model based on the underlying common stock closing price as of the date of grant, the expected term, stock price volatility, and risk-free interest rates.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred income tax assets or liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred income tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be settled or realized. The effect on deferred income tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax assets are reviewed for recoverability, and the Company records a valuation allowance to reduce its deferred income tax assets when it is more likely than not that all or some portion of the deferred income tax assets will not be realized.

The Company has various foreign subsidiaries formed or acquired to conduct or support its business outside the United States. The Company expects its earnings attributable to foreign subsidiaries will be indefinitely reinvested outside of the U.S., except as noted below and, therefore, no deferred tax liabilities for U.S. income taxes on undistributed earnings are recorded. Foreign earnings from certain subsidiaries may be repatriated to the parent holding company located in the Cayman Islands, and therefore, a deferred tax liability has been recorded on the undistributed earnings of these subsidiaries.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The Company recognizes the effect of income tax positions only if those positions are more likely than not to be sustained. Recognized income tax positions are measured at the largest amount that is greater than 50 percent likely to be realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. Estimated interest and penalties related to underpayment of income taxes are recorded as a component of income tax provision in the consolidated statement of operations.

Effects of the Tax Cuts and Jobs Act

On December 22, 2017, the Tax Cuts and Jobs Act (Tax Act) was enacted. Accounting Standard Codification (ASC) 740, *Accounting for Income Taxes*, requires companies to recognize the effect of tax law changes in the period of enactment regardless of the effective date of those tax law changes. Certain provisions of the Tax Act are effective September 27, 2017, others are effective or identified as of December 31, 2017 and others are effective after January 1, 2018.

Given the timing of enactment of the Tax Act and the significance of the legislation, the SEC staff issued Staff Accounting Bulletin No. 118 (SAB 118), which allows registrants to record provisional amounts during a one year “measurement period” similar to that used when accounting for business combinations. However, the measurement period should not extend beyond one year from the Tax Act enactment date and is deemed to have ended when the registrant has obtained, prepared and analyzed the information necessary to finalize its accounting.

To the extent that a company’s accounting for certain income tax effects of the Tax Act is incomplete but the registrant is able to determine a reasonable estimate, it must record a provisional estimate in the financial statements. If a company cannot determine a provisional estimate to be included in the financial statements, it should continue to apply ASC 740, *Accounting for Income Taxes*, on the basis of the provisions of the tax laws that were in effect immediately before the enactment of the Tax Act. More specifically, SAB 118 summarizes a three-step process to be applied at each reporting period to account for and disclose the tax effects of the Tax Act. The steps are (1) to record the effects of the change in tax law for which accounting is complete; (2) to record provisional amounts (or adjustments to provisional amounts) for the effects of the tax law where accounting is not complete, but for which a reasonable estimate has been determined; and (3) where a reasonable estimate cannot yet be made, to continue to apply ASC 740, *Accounting for Income Taxes*, based on the tax law in effect prior to enactment of the Tax Act.

Amounts recorded where accounting is complete for the year ended January 1, 2018 primarily relate to the reduction in the U.S. corporate income tax rate to 21 percent. The Company revalued its ending gross deferred tax items, previously recorded at 35 percent, using the enacted 21 percent corporate tax rate. This change resulted in no net tax expense/benefit but did cause an approximate \$66,000 reduction to our U.S. federal deferred tax asset fully offset by a reduction of our valuation allowance.

Effects of tax law changes where a reasonable estimate of the accounting effects cannot yet been made include the one-time mandatory repatriation transition tax on the net accumulated earnings and profits of a U.S. taxpayer’s foreign subsidiaries earned post 1986. The Company has performed a preliminary earnings and profits analysis with consideration given to foreign loss carryforwards acquired as a result of the Company’s acquisitions and determined on a provisional basis that there should be no income tax effect in the current or any future period. The Company will continue to identify and evaluate data to more thoroughly identify the tax impact and record adjustments, if any, within the measurement period.

Other significant provisions that are not yet effective for which the Company has not completed its analysis, but may impact income taxes in future years include: limitations on certain entertainment expenses, the inclusion of commissions and performance based compensation in determining the excessive compensation limitation, limitation on the current deductibility of net interest expense in excess of 30 percent of adjusted taxable income, an incremental tax (base erosion anti-abuse tax or BEAT) on excessive amounts paid to foreign related parties, a

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

minimum tax on certain foreign earnings in excess of 10 percent of the foreign subsidiaries tangible assets (i.e., global intangible low-taxed income or GILTI), the benefit related to foreign derived intangible income (FDII), the required capitalization of research and development expenditures and the impact of requiring tax conformity with Accounting Standard Update (ASU) 2014-09, *Revenue from Contracts with Customers*. The Company is still evaluating whether to make a policy election to treat the GILTI tax as a period expense or to provide U.S. deferred taxes on foreign earnings that are expected to generate GILTI income when they reverse in future years.

Self Insurance

The Company is primarily self insured in the United States for group health insurance and workers compensation benefits provided to U.S. employees. The Company also purchases stop loss insurance to protect against annual claims per individual and at an aggregate level. The individual insured stop loss on the Company's self insurance is \$350 per individual for group health insurance and \$250 per individual for worker's compensation benefits. Self insurance liabilities are estimated for claims incurred but not paid based on judgment, using the Company's historical claim data and information and analysis provided by actuarial and claim advisors, the Company's insurance carrier and brokers. The Company has accrued \$6,386 and \$5,375 for self insurance liabilities as of January 1, 2018 and January 2, 2017, respectively, and these amounts are reflected within accrued salaries, wages and benefits in the consolidated balance sheets.

Group health insurance and workers compensation benefits for the Company's plants in China and Canada are fully insured with third parties.

Convertible Debt

The accounting standards for convertible debt instruments that may be fully or partially settled in cash upon conversion require the debt and equity components to be separately accounted for in a manner that reflects the Company's nonconvertible borrowing rate when interest expense is recognized in subsequent periods. The amount recorded as debt is based on the fair value of the debt component as a standalone instrument, determined using an average interest rate for similar nonconvertible debt issued by entities with credit ratings comparable to the Company's at the time of issuance. The difference between the debt recorded at inception and its principal amount is to be accreted to principal through interest expense through the estimated life of the note.

Value Added and Sales Tax Collected from Customers

As a part of the Company's normal course of business, value added and sales taxes are collected from customers. Such taxes collected are remitted, in a timely manner, to the appropriate governmental tax authority on behalf of the customer. The Company's policy is to present revenue and costs, net of value added and sales taxes.

Fair Value Measures

The Company measures at fair value certain of its financial and non-financial assets and liabilities by using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, essentially an exit price, based on the highest and best use of the asset or liability. The levels of the fair value hierarchy are:

Level 1 — Quoted market prices in active markets for identical assets or liabilities;

Level 2 — Significant other observable inputs (e.g., quoted prices for similar items in active markets, quoted prices for identical or similar items in markets that are not active, inputs other than quoted prices that are observable, such as interest rate and yield curves, and market-corroborated inputs); and

Level 3 — Unobservable inputs in which there is little or no market data, which require the reporting unit to develop its own assumptions.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

Environmental Accrual

Accruals for estimated costs for environmental obligations generally are recognized no later than the date when the Company identifies what cleanup measures, if any, are likely to be required to address the environmental condition. Included in such obligations are the estimated direct costs to investigate and address the conditions, and the associated engineering, legal and consulting costs. In making these estimates, the Company considers information that is currently available, existing technology, enacted laws and regulations, and its estimates of the timing of the required remedial actions. Such accruals are initially measured on a discounted basis — and are adjusted as further information becomes available or circumstances change — and are accreted to the payable amount over time.

Earnings Per Share

Basic earnings per common share excludes dilution and is computed by dividing net income attributable to TTM Technologies, Inc. stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per common share reflect the potential dilution that could occur if stock options, convertible senior notes or other common stock equivalents were exercised or converted into common stock. The dilutive effect of stock options or other common stock equivalents is calculated using the treasury stock method, while the dilutive effect of convertible senior notes is calculated using the if-converted method.

Comprehensive Income

Comprehensive income includes changes to equity accounts that were not the result of transactions with stockholders. Comprehensive income is comprised of net income (loss), changes in the cumulative foreign currency translation adjustments and realized and unrealized gains or losses on hedged derivative instruments.

Noncontrolling Interest Holdings

Noncontrolling interest consisted of a 5% equity interest in a manufacturing facility in Huiyang, China which was acquired along with other assets and liabilities of Viasystems Group Inc. (Viasystems). During the fourth quarter of 2017, the Company purchased the 5% equity interest from the noncontrolling interest holder. See Note 21.

Loss Contingencies

The Company establishes an accrual for an estimated loss contingency when it is both probable that an asset has been impaired or that a liability has been incurred and the amount of the loss can be reasonably estimated. Any legal fees expected to be incurred in connection with a contingency are expensed as incurred.

Recently Adopted and Issued Accounting Standards

In August 2017, the Financial Accounting Standards Board (FASB) issued ASU 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities*. This ASU amends and simplifies existing guidance in order to allow companies to more accurately present the economic effects of risk management activities in the financial statements. ASU 2017-12 also amends the guidance surrounding the recognition of the value of hedged instruments to include the entire change in value, rather than just the effective portion, in other comprehensive income and recognized in earnings at the same time that the hedged item affects earnings for cash flow and net investment hedges. This ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. The Company is currently evaluating the new guidance to determine the impact it may have on its consolidated financial statements and related disclosures.

In January 2017, the FASB issued ASU 2017-04, *Intangibles (Topic 350): Goodwill and Other*. This ASU simplifies the accounting for goodwill impairment and removes Step 2 of the goodwill impairment test. Goodwill

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value limited to the total amount of goodwill allocated to that reporting unit. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. The Company elected to early adopt ASU 2017-04 on a prospective basis during the second quarter of 2017 and the adoption did not have a material impact on its consolidated financial statements and related disclosures.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations (Topic 805): Clarifying the Definition of a Business*. The purpose of this ASU is to clarify the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The Company elected to early adopt ASU 2017-01 on a prospective basis during the fourth quarter of 2017 and the adoption did not have a material impact on the consolidated financial statements and related disclosures.

In October 2016, the FASB issued ASU 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory*. The objective of this update is to improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory by recognizing the income tax consequences when the transfer occurs. This ASU is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the consolidated financial statements or related disclosures.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230)*. The objective of this update is to add or clarify guidance on the classification of certain cash receipts and payments in the statement of cash flows. The Company adopted this ASU 2016-15 in the first quarter of 2017 and the adoption did not have a material impact on the consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-09, *Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. The objective of this update is to simplify several aspects of the accounting for employee share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The Company adopted ASU 2016-09 on January 3, 2017. The adoption did not have a material impact on the consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*. The objective of this update is to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. This ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those annual periods and is to be applied utilizing a modified retrospective approach. While the Company continues to evaluate the new guidance to determine the impact it may have on its consolidated financial statements and related disclosures, the primary effect of adopting this update will be to record assets and obligations for current operating leases.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments — Overall (Topic 825): Recognition and Measurement of Financial Assets and Financial Liabilities*. This ASU amends certain aspects of recognition, measurement, presentation and disclosure of financial instruments, and supersedes the guidance to classify equity securities with readily determinable fair values into different categories (that is, trading or available-for-sale) and requires equity securities to be measured at fair value with changes in the fair value recognized through net income. This ASU is effective for annual and interim periods beginning after December 15, 2017. The Company does not anticipate the adoption will have a material impact on the consolidated financial statements and related disclosures.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, as amended, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company at the beginning of fiscal year 2018. The standard permits the use of either the retrospective or cumulative effect transition method. The

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

Company has assessed that the new guidance will result in a change to the timing of revenue recognition for the Company's revenue stream from "point in time" upon physical delivery to an "over time" model and this transition will have a material impact on the Company's consolidated financial statements upon adoption. As of January 2, 2018, management will apply the cumulative effect transition method and currently estimates that the adoption will increase retained earnings by a range of \$30,000 to \$40,000 and contract assets by a range of \$250,000 to \$270,000 for 2017. The Company has identified and implemented changes to its revenue processes and internal controls to meet the ASU's reporting and disclosure requirements.

(3) Acquisitions

Definitive Stock Purchase Agreement for the Acquisition of Anaren, Inc.

On December 1, 2017, the Company entered into a definitive stock purchase agreement with Anaren Holdings, LLC pursuant to which the Company agreed to purchase all of the issued and outstanding common stock of Anaren Holding Corp., for total consideration of \$775,000 in cash subject to customary working capital and certain other adjustments. Other than the equity interests of Anaren, Inc. (Anaren), Anaren Holding Corp. has no material assets or liabilities and has no material independent operations. Anaren is a leading provider of mission-critical radio frequency (RF) solutions, microelectronics, and microwave components and assemblies for the wireless infrastructure and space and defense electronics markets. Anaren's microwave products are used in wireless communication systems including wireless infrastructure, wireless consumer and medical applications, as well as advanced radar, beam-forming, jamming, motion control and receiver applications for the space and defense markets, covering a broad range of frequencies and power levels. Its Integrated Radio module product lines provide proprietary low power RF monitoring solutions deployable in a wide variety of end market applications. The acquisition of Anaren will significantly increase the Company's aerospace and defense design capability with particular focus on RF products, deepen our customer engagements in aerospace and defenses and networking/communications and complement the Company's focus on high technology PCB products manufacturing. The Company expects to complete the acquisition in the first half of 2018.

In conjunction with the pending acquisition of Anaren, the Company has received commitments to fund a \$700,000 senior secured incremental term loan (the Incremental Facility). Upon the consummation of the acquisition of Anaren, the Company will use the borrowings from the Incremental Facility and cash on hand to finance the acquisition. Also see Note 22 regarding a subsequent event.

Bank fees and legal, accounting, and other professional service costs associated with the ongoing acquisition of Anaren of \$2,266 has been expensed and recorded as general and administrative expense in the consolidated statements of operations for the year ended January 1, 2018.

Acquisitions of Viasystems

On May 31, 2015, the Company completed the acquisition of Viasystems, for total consideration of \$248,824 in cash and 15,082 shares of TTM common stock with a fair value of \$149,006, and thereby acquired all of the outstanding shares of capital stock and other equity rights of Viasystems. Additionally, in connection with the completion of the acquisition, the Company assumed and refinanced Viasystems' debt, which was approximately \$669,024 as of May 31, 2015. Viasystems was a worldwide provider of complex multi-layer rigid, flexible, and rigid-flex PCBs and custom electronic assemblies.

Bank fees and legal, accounting, and other professional service costs associated with the acquisition of Viasystems of \$1,688 and \$34,448 for the years ended January 2, 2017 and December 28, 2015, respectively, have been expensed and recorded as general and administrative expense in the consolidated statements of operations. There were no bank fees or legal, accounting, and other professional service costs associated with the acquisition of Viasystems for the year ended January 1, 2018.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

(4) Restructuring and Impairment Charges

Consolidation Plan and Restructuring Activities

During the year ended December 28, 2015 and following the acquisition of Viasystems on May 31, 2015, the Company announced a consolidation plan that resulted in the closure of certain of the Company's facilities (the Consolidation Plan) and the layoff of related employees at these facilities. The Consolidation Plan was part of the Company's integration strategy to improve total plant utilization, operational performance and customer focus. In connection with the Consolidation Plan and other global realignment restructuring efforts, the Company recognized employee separation costs and contract termination and other costs during the years ended January 1, 2018, January 2, 2017 and December 28, 2015. Contract termination and other costs primarily represented plant closure costs as well as costs related to building operating leases.

The below table summarizes such restructuring costs by reportable segment for the years ended January 1, 2018, January 2, 2017 and December 28, 2015:

	January 1, 2018			For the Year ended January 2, 2017			December 28, 2015		
	Employee separation/severance	Contract termination and other costs	Total	Employee separation/severance	Contract termination and other costs	Total	Employee separation/severance	Contract termination and other costs	Total
	(In thousands)								
Reportable Segment:									
PCB	\$ 178	\$ 99	\$ 277	\$ 1,548	\$ 2,141	\$3,689	\$ 2,050	\$ —	\$2,050
E-M Solutions	—	520	520	903	3,644	4,547	2,039	—	2,039
Corporate	33	360	393	(231)	946	715	2,743	549	3,292
	<u>\$ 211</u>	<u>\$ 979</u>	<u>\$1,190</u>	<u>\$ 2,220</u>	<u>\$ 6,731</u>	<u>\$8,951</u>	<u>\$ 6,832</u>	<u>\$ 549</u>	<u>\$7,381</u>

The below table shows the utilization of the accrued restructuring costs during the years ended January 1, 2018 and January 2, 2017:

	Severance	Contract Termination	Total
	(In thousands)		
Accrued at December 28, 2015	\$ 6,044	\$ 535	\$ 6,579
Charged to expense	2,495	6,698	9,193
Adjustments to estimate	(275)	33	(242)
Amount paid	(8,140)	(6,224)	(14,364)
Accrued at January 2, 2017	\$ 124	\$ 1,042	\$ 1,166
Charged to expense	211	979	1,190
Amount paid	(335)	(1,522)	(1,857)
Accrued at January 1, 2018	<u>\$ —</u>	<u>\$ 499</u>	<u>\$ 499</u>

As of January 1, 2018, the Company has incurred approximately \$17,522 of restructuring charges since the inception of the Consolidation Plan and has substantially completed such Consolidation Plan.

Additionally, the Company recognized \$3,346 in impairment charges during the year ended January 2, 2017. As a result of the above mentioned plant closures and other plant realignment efforts, \$1,393 of impairment charges were recognized in the consolidated statement of operations related to machinery and equipment in the PCB reportable segment. In addition, \$1,953 of impairment charges were recognized in the consolidated statement of operations related to capitalized software costs in Corporate.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

Sale of Suzhou, China Manufacturing Facility

During the year ended December 28, 2015, the Company sold its Meadville Aspocomp (Suzhou) Electronic Co., Ltd. subsidiary for \$21,275 and recognized a gain of \$2,504. The Suzhou, China manufacturing facility is included in the PCB reportable segment.

Interest	\$ 6,297	\$ 927
Other	108,388	96,275
	<u>\$ 114,685</u>	<u>\$ 97,202</u>

In 2017, the Company sold buildings and related land and land use rights associated with the Cleveland, Ohio and Hong Kong facilities with an aggregate carrying value of \$23,397. The buildings and related land and land use rights were classified as assets held for sale at January 2, 2017 and included in prepaids and other current assets in the consolidated balance sheets.

TTM TECHNOLOGIES, INC.
Notes to Consolidated Financial Statements — (Continued)

(6) Goodwill

As of January 1, 2018 and January 2, 2017, goodwill was as follows:

	<u>Total</u> <u>(In thousands)</u>
Balance as of December 28, 2015	
Goodwill	\$ 518,390
Accumulated impairment losses	<u>(171,400)</u>
	346,990
Goodwill recognized during the year	25,624
Foreign currency translation adjustment	<u>(5)</u>
Balance as of January 2, 2017	
Goodwill	\$ 544,009
Accumulated impairment losses	<u>(171,400)</u>
	372,609
Foreign currency translation adjustment	<u>(38)</u>
Balance as of January 1, 2018	
Goodwill	\$ 543,971
Accumulated impairment losses	<u>(171,400)</u>
	<u>\$ 372,571</u>

Goodwill balances include foreign currency translation adjustments related to foreign subsidiaries with functional currencies other than the U.S. Dollar. All of the Company's goodwill is included as a component of the PCB reportable segment.

In the fourth quarter of 2017, the Company performed its annual impairment test qualitatively and concluded that it was more likely than not that there was no impairment to goodwill. The Company will continue to evaluate its goodwill on an annual basis during its fourth fiscal quarter and whenever events or changes in circumstances — such as significant adverse changes in business climate or operating results, changes in management strategy, coupled with a decline in the market price of our stock and market capitalization — indicate that there may be a potential impairment. If factors indicate that assets are impaired, we would be required to reduce the carrying value of our goodwill and definite-lived intangible assets, which may result in an impairment charge.

During the year ended January 2, 2017, the Company finalized the allocation of the purchase price associated with the acquisition of Viasystems which resulted in an increase in goodwill due to the reassessment of product claims and other contingent liabilities, and certain tax positions at certain foreign jurisdictions.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

(7) Definite-lived Intangibles

As of January 1, 2018 and January 2, 2017, the components of definite-lived intangibles were as follows:

	Gross Amount	Accumulated Amortization	Foreign Currency Translation Adjustment	Net Carrying Amount	Weighted Average Amortization Period (years)
(In thousands)					
January 1, 2018:					
Customer relationships	\$203,563	\$(101,089)	\$ 72	\$102,546	8.1
Technology	3,000	(2,596)	—	404	3.0
	<u>\$206,563</u>	<u>\$(103,685)</u>	<u>\$ 72</u>	<u>\$102,950</u>	
January 2, 2017:					
Customer relationships	\$203,563	\$ (78,473)	\$ 119	\$125,209	8.1
Technology	3,000	(1,596)	—	1,404	3.0
	<u>\$206,563</u>	<u>\$ (80,069)</u>	<u>\$ 119</u>	<u>\$126,613</u>	

The January 1, 2018 and January 2, 2017 definite-lived intangible balances include foreign currency translation adjustments related to foreign subsidiaries with functional currencies other than the U.S. Dollar.

Definite-lived intangibles are generally amortized using the straight line method of amortization over the useful life, with the exception of certain customer relationship intangibles, which are amortized using an accelerated method of amortization based on estimated cash flows. Amortization expense was \$23,634, \$24,252, and \$18,888 for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively.

Estimated aggregate amortization for definite-lived intangible assets for the next five years and thereafter is as follows:

	(In thousands)
2018	\$ 22,863
2019	18,746
2020	18,746
2021	14,921
2022	12,329
Thereafter	15,345
	<u>\$ 102,950</u>

TTM TECHNOLOGIES, INC.

Less: current maturities		(4,578)		(110,652)
Long-term debt, less current maturities		\$ 975,479		\$ 909,030

The fiscal calendar maturities of long-term debt through 2022 and thereafter are as follows:

	(In thousands)
2018	\$ 4,578
2019	3,032
2020	300,919
2021	4,375
2022	3,500
Thereafter	706,625
	<u>\$ 1,023,029</u>

On September 28, 2017, the Company entered into a \$350,000 Term Loan Facility due 2024 (Term Loan Facility), and issued \$375,000 of Senior Notes due 2025 (Senior Notes). In conjunction with the issuance of the Term Loan Facility and Senior Notes, the Company repaid in full the remaining outstanding balance of the September 27, 2016 Term Loan Credit Agreement (2016 Term Loan) and repaid \$63,000 on its existing U.S. Asset-Based Lending Credit Agreement (U.S. ABL).

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

Term Loan Facility

The Term Loan Facility, of which \$3,500 is included in short-term debt and \$345,625 is included in long-term debt, was issued at a discount at 99.5% and bears interest, at the Company's option, at a floating rate of LIBOR, plus an applicable interest margin of 2.5%, or an alternate base rate, (defined as the greater of the JP Morgan prime, the New York Fed bank rate plus 0.9% or LIBOR plus 1.0%), subject to a 1.0% floor plus an applicable margin of 1.5%. At January 1, 2018 the interest rate on the outstanding borrowings under the Term Loan Facility was 4.06%. There is no provision, other than an event of default, for the interest margin to increase. The Term Loan Facility will mature on September 28, 2024. The Term Loan Facility is secured by a significant amount of the domestic assets of the Company and a pledge of 65% of voting stock of the Company's first tier foreign subsidiaries and is structurally senior to the Company's Senior Notes and Convertible Senior Notes. See Senior Notes and Convertible Senior Notes below.

The Company is required to make scheduled payments of the outstanding Term Loan Facility balance on a quarterly basis beginning January 1, 2018. Based on certain parameters defined in the Term Loan Facility, including a First Lien Leverage Ratio, the Company may be required to make an additional principal payment on an annual basis beginning after fiscal year 2018, if the Company's First Lien Leverage Ratio is greater than 2.0. Any additional annual payments or prepayments would reduce future required scheduled payments. Any remaining outstanding balances under the Term Loan Facility are due at the maturity date of September 28, 2024.

Borrowings under the Term Loan Facility are subject to certain affirmative and negative covenants, including limitations on indebtedness, corporate transactions, investments and dispositions, and share payments.

Senior Notes

The \$375,000 of Senior Notes issued, which is included in long-term debt, bear interest at a rate of 5.63% per annum. Interest is payable semiannually in arrears on April 1 and October 1 of each year beginning April 1, 2018. The Senior Notes will mature on October 1, 2025.

Borrowings under the Senior Notes are subject to certain affirmative and negative covenants, including limitations on indebtedness, corporate transactions, investments and dispositions, and share payments.

Convertible Senior Notes due 2020

The Company maintains 1.75% convertible senior notes in the amount of \$249,985 due December 15, 2020. The convertible senior notes bear interest at a rate of 1.75% per annum. Interest is payable semiannually in arrears on June 15 and December 15 of each year. The convertible senior notes are unsecured obligations, are subordinated to the Senior Notes above, and would rank equally to the Company's future unsecured senior indebtedness and are senior in right of payment to any of the Company's future subordinated indebtedness.

Conversion: At any time prior to March 15, 2020, holders may convert their convertible senior notes into cash and, if applicable, into shares of the Company's common stock based on a conversion rate of 103.7613 shares of the Company's common stock per \$1 principal amount of convertible senior notes, subject to adjustment, under the following circumstances: (1) during any calendar quarter beginning after March 31, 2015 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days during the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day of such preceding calendar quarter; (2) during the five business day period after any 10 consecutive trading day period in which the trading price per note for each day of that 10 consecutive trading day period was less than 98% of the product of the last reported sale price of the Company's common stock and the conversion rate on such day; or (3) upon the occurrence of specified corporate transactions described in the indenture governing the notes. As of January 1, 2018, the conversion criteria had been met allowing holders to give notice of conversion in 2017 and the first quarter of 2018.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

On or after March 15, 2020 until the close of business on the third scheduled trading day preceding the maturity date, holders may convert their notes at any time, regardless of the foregoing circumstances. Upon conversion, for each \$1 principal amount of notes, the Company will pay shares of our common stock, cash or a combination of cash and shares of our common stock at its election, if applicable, based on a daily conversion value calculated on a proportionate basis for each day of the 80 trading day observation period. All conversions occurring on the same date or on or after March 15, 2020 shall be settled using the same settlement method. Additionally, in the event of a fundamental change as defined in the indenture governing the notes, or other conversion rate adjustments such as share splits or combinations, other distributions of shares, cash or other assets to stockholders, including self-tender transactions (Other Conversion Rate Adjustments), the conversion rate may be modified to adjust the number of shares per \$1 principal amount of the notes. As of January 1, 2018, none of the criteria for a fundamental change or a conversion rate adjustment had been met.

The maximum number of shares issuable upon conversion, including the effect of a fundamental change and subject to Other Conversion Rate Adjustments, would be 32,423.

Note Repurchase: The Company is not permitted to redeem the convertible senior notes at any time prior to maturity. In the event of a fundamental change or certain default events, as defined in the indenture governing the notes, holders may require the Company to repurchase for cash all or a portion of their convertible senior notes at a price equal to 100% of the principal amount, plus any accrued and unpaid interest.

Convertible Note Hedge and Warrant Transaction: In connection with the issuance of the convertible senior notes due 2020, the Company entered into a convertible note hedge and warrant transaction (Call Spread Transaction), with respect to the Company's common stock. The convertible note hedge consists of the Company's option to purchase up to 25,939 common stock shares at a price of \$9.64 per share. The hedge expires on December 15, 2020 and can only be executed upon the conversion of the above mentioned convertible senior notes due 2020. Additionally, the Company sold warrants to purchase 25,940 shares of its common stock at a price of \$14.26 per share. The warrants expire ratably from March 2021 through January 2022. The 2020 Call Spread Transaction has no effect on the terms of the convertible senior notes due 2020 and reduces potential dilution by effectively increasing the conversion price of the convertible senior notes due 2020 to \$14.26 per share of the Company's common stock.

As of January 1, 2018 and January 2, 2017, the following summarizes the equity components of the convertible senior notes included in additional paid-in capital:

	As of January 1, 2018			As of January 2, 2017		
	Embedded conversion option — Convertible Senior Notes	Embedded conversion option — Convertible Senior Notes Issuance Costs	Total	Embedded conversion option — Convertible Senior Notes	Embedded conversion option — Convertible Senior Notes Issuance Costs	Total

Asset-Based Lending Agreements

The Company maintains a \$200,000 U.S. ABL, and a \$150,000 Asia Asset-Based Lending Credit Agreement (Asia ABL) (collectively the ABL Revolving Loans).

The U.S. ABL consists of three tranches comprised of a revolving credit facility for up to \$200,000, a letter of credit facility for up to \$50,000, and swingline loans for up to \$30,000, provided that at no time may amounts outstanding under the tranches exceed in aggregate \$200,000 or the applicable borrowing base, which is a percentage of the principal amount of Eligible Accounts, as defined in the U.S. ABL agreement. Borrowings under the U.S. ABL bear interest at either a floating rate of LIBOR plus a margin of 150 basis points or JP Morgan Chase Bank's prime rate plus a margin of 50 basis points, at the Company's option. At January 1, 2018, the interest rate on the outstanding borrowings under the U.S. ABL was 3.06%. The applicable margin can vary based on the remaining availability of the facility, from 125 to 175 basis points for LIBOR-based loans and from 25 to 75 basis points for JP Morgan Chase Bank's prime rate-based loans. Other than availability and an event of default, there are no other provisions for the interest margin to increase. The U.S. ABL will mature on May 31, 2020. Loans made under the U.S. ABL are secured first by all of the Company's domestic cash, receivables and certain inventories as well as by a second position against a significant amount of the domestic assets of the Company and a pledge of 65% of voting stock of the Company's first tier foreign subsidiaries and are structurally senior to the Company's Senior Notes and Convertible Senior Notes. See Senior Notes and Convertible Senior Notes above. Concurrent with the issuance of the Term Loan Facility and Senior Notes, the Company paid down \$63,000 of the outstanding balance of its U.S. ABL. At January 1, 2018, \$17,000 of the U.S. ABL was outstanding and classified as long-term debt, which is consistent with its maturity date.

The Asia ABL consists of two tranches comprised of a revolving credit facility for up to \$150,000 and a letter of credit facility for up to \$100,000, provided that at no time may amounts outstanding under both tranches exceed in aggregate \$150,000 or the applicable borrowing base, which is a percentage of the principal amount of Eligible Accounts, as defined in the Asia ABL agreement. Borrowings under the Asia ABL bear interest at a

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

floating rate of LIBOR plus 140 basis points. At January 1, 2018, the interest rate on the outstanding borrowings under the Asia ABL was 2.96%. There is no provision, other than an event of default, for the interest margin to increase. The Asia ABL will mature on May 22, 2020. Loans made under the Asia ABL are secured by a portion of the Company's Asia Pacific cash and receivables and are structurally senior to the Company's domestic obligations, including the Senior Notes and Convertible Senior Notes. See Senior Notes and Convertible Senior Notes above. At January 1, 2018, \$30,000 of the Asia ABL was outstanding and classified as long-term debt, which is consistent with its maturity date.

The Company has up to \$50,000 and \$100,000 Letters of Credit Facilities under the U.S. ABL and the Asia ABL, respectively. As of January 1, 2018, letters of credit in the amount of \$7,612 were outstanding under the U.S. ABL and \$43,085 were outstanding under the Asia ABL with various expiration dates through March 2019. Available borrowing capacity under the U.S. ABL and the Asia ABL was \$175,388 and \$76,915, respectively, which considers letters of credit outstanding at January 1, 2018.

The Company is required to pay a commitment fee of 0.25% to 0.375% per annum on any unused portion of the U.S. ABL and the Asia ABL. The Company incurred total commitment fees related to unused borrowing availability of \$783, \$709, and \$763 for the years ended January 1, 2018, January 2, 2017, and December 28, 2015, respectively. Under the occurrence of certain events, the ABL Revolving Loans are subject to various financial and operational covenants, including maintaining minimum fixed charge coverage ratios.

Other Credit Facility

Additionally, the Company is party to a revolving loan credit facility (Chinese Revolver) with a lender in China. Under this arrangement, the lender has made available to the Company approximately \$32,200 in unsecured borrowing with all terms of the borrowing to be negotiated at the time the Chinese Revolver is drawn upon. There are no commitment fees on the unused portion of the Chinese Revolver, and this arrangement expires in January 2019. As of January 1, 2018, the Chinese Revolver had not been drawn upon.

Debt Issuance and Debt Discount

As of January 1, 2018 and January 2, 2017, remaining unamortized debt discount and debt issuance costs for the Term Loan Facility, Senior Notes, Convertible Senior Notes and 2016 Term Loan are as follows:

	As of January 1, 2018			As of January 2, 2017		
	Debt Issuance Costs	Debt Discount	Effective Interest Rate	Debt Issuance Costs	Debt Discount	Effective Interest Rate
	(in thousands)					
Term Loan due September 2024	\$ 2,788	\$ 1,691	3.96%	—	—	—
Senior Notes due October 2025	6,782	—	5.92%	—	—	—
Convertible Senior Notes	2,889	28,822	6.48%	\$ 3,747	\$37,392	6.48%
Term Loan due May 2021	—	—	—	977	—	5.29%
	<u>\$ 12,459</u>	<u>\$30,513</u>		<u>\$ 4,724</u>	<u>\$37,392</u>	

The above debt discount and debt issuance costs are recorded as a reduction of the debt and are amortized into interest expense using an effective interest rate over the duration of the debt.

Debt issuance costs for the ABL Revolving Loans of \$2,421 and \$3,423 as of January 1, 2018 and January 2, 2017, respectively, are included in other non-current assets and are amortized to interest expense over the duration of the ABL Revolving Loans using the straight line method of amortization.

At January 1, 2018, the remaining weighted average amortization period for all unamortized debt discount and debt issuance costs was 4 years.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

Loss on Extinguishment of Debt

During the years ended January 1, 2018, January 2, 2017 and December 28, 2015, the Company recognized loss on extinguishment of debt of \$768, \$47,767 and \$802, respectively, primarily associated with the write off of the remaining unamortized debt issuance and debt discount for the 2016 Term Loan, the 2015 Term Loan Credit Agreement, and the terminated 2012 credit agreement, respectively.

(9) Income Taxes

The components of income (loss) before income taxes for the years ended January 1, 2018, January 2, 2017 and December 28, 2015 are:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
United States	\$ (4,178)	\$ (85,323)	\$ (104,068)
Foreign	144,136	152,325	113,044
Income before income taxes	<u>\$139,958</u>	<u>\$ 67,002</u>	<u>\$ 8,976</u>

The Company expects its earnings attributable to foreign subsidiaries will be indefinitely reinvested outside of the U.S., except as noted below and, therefore, no deferred tax liabilities for U.S. income taxes on undistributed earnings are recorded. The undistributed earnings of the foreign subsidiaries amounted to approximately \$836,309 as of January 1, 2018. The determination of the unrecognized deferred tax liability related to these undistributed earnings is not practicable. Foreign earnings from certain subsidiaries may be repatriated to the ultimate parent holding company located in the Cayman Islands, and therefore, a deferred tax liability of approximately \$8,977 for the foreign tax impact has been recorded on the undistributed earnings of these subsidiaries.

The components of income tax provision for the years ended January 1, 2018, January 2, 2017 and December 28, 2015 are:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)

Notes to Consolidated Financial Statements — (Continued)

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The significant components of the net deferred income tax assets as of January 1, 2018 and January 2, 2017 are as follows:

	As of	
	January 1, 2018	January 2, 2017
(In thousands)		
Deferred income tax assets:		
Net operating loss carryforwards	\$ 143,095	\$ 212,553
Reserves and accruals	23,655	32,420
Tax credit carryforwards	27,012	18,148
Stock-based compensation	5,099	4,965

Other deferred income tax liabilities	<u>(828)</u>	<u>(1,955)</u>
Net deferred income tax liabilities	<u>\$ (4,859)</u>	<u>\$ (14,049)</u>
Deferred income tax liabilities, net:		
Current deferred income taxes	\$ —	\$ —
Noncurrent deferred income taxes	<u>(4,859)</u>	<u>(14,049)</u>

As of January 1, 2018, the Company had the following net operating loss (NOL) carryforwards: \$500,542 in the U.S. for federal, \$496,369 in various U.S. states, \$52,348 in China, and \$34,212 in Hong Kong. The U.S. federal NOLs expire in 2018 through 2036, the various U.S. states' NOLs expire in 2018 through 2036, the China NOLs expire in 2018 through 2022, and the Hong Kong NOLs carryforward indefinitely. Further, the Company's tax credits were approximately \$32,480 of which \$8,021 carryforward indefinitely.

In connection with the Company's acquisition of Viasystems, there was more than a 50% change in ownership under Section 382 of the Internal Revenue Code of 1986, as amended, and regulations issued there under. As a consequence, the utilization of the acquired Viasystems U.S. NOLs is limited to approximately \$9,826 per year. In addition, the Company recognized certain gains built in at the time of the ownership change, which increase the limitation by approximately \$47,463 for each of the first 5 years after the acquisition. Any unused limitation in a year can be carried over to succeeding years.

A valuation allowance is provided when it is more likely than not that all or some portion of the deferred income tax assets will not be realized. Based on historical performance and future expectations, the Company has

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

a full valuation allowance on its net U.S. deferred tax assets. Certain subsidiaries within China continue to have NOL carryforwards in various tax jurisdictions that the Company has determined are not more likely than not to be utilized. As a result, a full valuation allowance has been recorded for these subsidiaries at January 1, 2018. For the remaining net deferred income tax asset, management has determined that it is more likely than not that the results of future operations will generate sufficient taxable income to realize the net deferred tax asset.

The following summarizes the activity in the Company's valuation allowance for the years ended January 1, 2018, January 2, 2017 and December 28, 2015:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Balance at beginning of year	\$221,951	\$234,192	\$ 38,839
(Reduction) additions related to acquisition	—	(18,234)	177,699
Additions charged to expense	4,515	5,993	39,149
Reduction charged to expense — Tax Act	(59,228)	—	—
Reduction related to sale of foreign subsidiary	—	—	(21,495)
Balance at end of year	<u>\$167,238</u>	<u>\$221,951</u>	<u>\$ 234,192</u>

Certain entities within China qualified for the high and new technology enterprise (HNTE) status enabling those entities to enjoy certain benefits, which were effective for the years ended January 1, 2018, January 2, 2017 and December 28, 2015. The HNTE status as well as enhanced research and development (R&D) deductions decreased Chinese taxes. HNTE and R&D benefit and effect on earnings per share are as follows:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands, except per share amounts)		
HNTE and R&D benefits	\$ 11,935	\$ 7,666	\$ 7,600
Basic shares	<u>101,580</u>	<u>100,099</u>	<u>92,675</u>
Diluted shares	<u>132,476</u>	<u>101,482</u>	<u>92,675</u>
Increases earnings (decreases losses) per share:			
Basic	<u>\$ 0.12</u>	<u>\$ 0.08</u>	<u>\$ (0.08)</u>
Diluted	<u>\$ 0.09</u>	<u>\$ 0.08</u>	<u>\$ (0.08)</u>

HNTE status expires at various dates through 2018, but the Company expects to continue to file for renewal of such HNTE status for the foreseeable future.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

A reconciliation of the beginning and ending amount of unrecognized tax benefits, exclusive of accrued interest and penalties, is as follows:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Beginning balance	\$ 39,727	\$ 15,404	\$ 2,441
Additions related to acquisition	—	22,182	11,293
Additions based on tax positions related to the current year	1,965	5,389	3,349
Additions for tax positions of prior years	1,661	1,545	14
Reductions for tax positions of prior years	(3,846)	(2,286)	(1,371)
Lapse of statute of limitations	(666)	(2,507)	(322)
Ending balance	<u>\$ 38,841</u>	<u>\$ 39,727</u>	<u>\$ 15,404</u>

As of January 1, 2018 and January 2, 2017, the Company recorded unrecognized tax benefits of \$29,033 and \$28,037, respectively, as well as interest and penalties of \$12,679 and \$10,754, respectively, to other long-term liabilities. The Company has also recorded unrecognized tax benefits of \$9,808 and \$11,689 against certain deferred tax assets as of January 1, 2018 and January 2, 2017, respectively. The amount of unrecognized tax benefits that would, if recognized, reduce the Company's effective income tax rate in any future periods is \$41,712 including interest and penalties. The Company expects its unrecognized tax benefits to decrease by \$774 along with related interest of \$1,288 over the next 12 months due to expiring statutes.

As of January 1, 2018, the Company is subject to (i) U.S. federal income tax examination and / or NOL adjustment for tax years from 1999 to 2017, (ii) state and local income tax examination for tax years 1999 to 2017, and (iii) foreign income tax examinations generally for tax years from 2007 to 2017.

(10) Accumulated Other Comprehensive Income

The following provides a summary of the components of accumulated other comprehensive income (loss), net of tax as of January 1, 2018, January 2, 2017 and December 28, 2015:

	Foreign Currency Translation	Gains (Losses) on Cash Flow Hedges	Total
		(In thousands)	
Ending balance at December 28, 2015	\$ 2,895	\$ (1,272)	\$ 1,623
Other comprehensive loss before reclassifications	(46,044)	(83)	(46,127)
Amounts reclassified from accumulated other comprehensive income	—	175	175
Net year to date period other comprehensive income (loss)	(46,044)	92	(45,952)
Ending balance at January 2, 2017	(43,149)	(1,180)	(44,329)
Other comprehensive gain before reclassifications	47,294	276	47,570
Amounts reclassified from accumulated other comprehensive income	—	162	162
Net year to date period other comprehensive income	47,294	438	47,732
Ending balance at January 1, 2018	<u>\$ 4,145</u>	<u>\$ (742)</u>	<u>\$ 3,403</u>

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The following provides a summary of reclassifications out of accumulated other comprehensive income, net of tax for the years ended January 1, 2018, January 2, 2017 and December 28, 2015:

Details about Accumulated Other Comprehensive Income Components	Statement of Operations Location	Amount Reclassified from Accumulated Other Comprehensive Income For the Year Ended		
		January 1, 2018	January 2, 2017	December 28, 2015
(In thousands)				
Loss on foreign currency forwards cash flow hedges	Depreciation expense, net of tax	\$ 162	\$ 175	\$ 172
Gain on foreign currency translation	Gain on sale of assets, net of tax	\$ —	\$ —	\$ (1,786)

(11) Significant Customers and Concentration of Credit Risk

In the normal course of business, the Company extends credit to its customers. Most customers to which the Company extends credit are located outside the United States. The Company performs ongoing credit evaluations of customers, does not require collateral, and considers the credit risk profile of the entity from which the receivable is due in further evaluating collection risk.

The Company's customers include both OEMs and EMS companies. The Company's OEM customers often direct a significant portion of their purchases through EMS companies. While the Company's customers include both OEM and EMS providers, the Company measures customer concentration based on OEM companies, as they are the ultimate end customers.

For the years ended January 1, 2018, January 2, 2017 and December 28, 2015, one customer accounted for approximately 20%, 15% and 20%, respectively, of the Company's net sales. There were no other customers that accounted for 10% or more of net sales for the years ended January 1, 2018, January 2, 2017 and December 28, 2015.

(12) Fair Value Measures

The Company measures at fair value its financial and non-financial assets by using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, essentially an exit price, based on the highest and best use of the asset or liability.

The carrying amount and estimated fair value of the Company's financial instruments as of January 1, 2018 and January 2, 2017 were as follows:

	January 1, 2018		January 2, 2017	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
(In thousands)				
Term Loan due September 2024	\$344,646	\$346,943	—	—
Term Loan due May 2021	—	—	\$699,023	\$708,750
Senior Notes due October 2025	368,218	384,769	—	—
Convertible Senior Notes	218,274	429,199	208,861	380,875
ABL Revolving Loans	47,000	47,000	110,000	110,000
Capital Lease	1,919	1,919	1,798	1,798

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The fair value of the long-term debt was estimated based on quoted market prices or discounting the debt over its life using current market rates for similar debt as of January 1, 2018 and January 2, 2017, which are considered Level 2 inputs.

The fair value of the convertible senior notes was estimated based on quoted market prices of the securities on an active exchange, which are considered Level 2 inputs.

As of January 1, 2018 and January 2, 2017, the Company's other financial instruments also included cash and cash equivalents, accounts receivable, accounts payable and equipment payables. Due to short-term maturities, the carrying amount of these instruments approximates fair value. Our cash and cash equivalents at January 1, 2018 consisted of \$115,128 held in the U.S., with the remaining \$294,198 held by foreign subsidiaries.

The majority of the Company's non-financial assets and liabilities, which include goodwill, intangible assets, inventories, and property, plant and equipment, are not required to be carried at fair value on a recurring basis. However, if certain triggering events occur (or are tested at least annually in the case of goodwill) such that a non-financial instrument is required to be evaluated for impairment, based upon a comparison of the non-financial instrument's fair value to its carrying value, an impairment is recorded to reduce the carrying value to the fair value, if the carrying value exceeds the fair value.

For the year ended January 2, 2017, the following assets were measured at fair value on a nonrecurring basis using the type of inputs shown:

	Fair Value Measurements Using:				Total Losses for the year Ended January 2, 2017
	January 2, 2017	Level 1 Inputs	Level 2 Inputs (In thousands)	Level 3 Inputs	
Long-lived assets held and use	\$ 2,254	\$ —	\$ —	\$ 2,254	\$ 1,953
Assets held for sale	—	—	—	—	1,393
					<u>\$ 3,346</u>

There was no impairment of long-lived assets recognized in the year ended January 1, 2018 or December 28, 2015.

The Company has capitalized software costs in accordance with U.S. GAAP. During the year ended January 2, 2017, the Company determined that certain capitalized costs no longer had benefit primarily as a result of the Viasystems acquisition. Because the primary determination of fair value was based on management's assumptions and estimates of capitalized costs to dispose, the resulting fair value is considered a Level 3 input.

(13) Commitments and Contingencies

Operating Leases

The Company leases some of its manufacturing and assembly plants, a sales office and equipment under noncancellable operating leases that expire at various dates through 2050. Certain real property leases contain renewal provisions at the Company's option. Most of the leases require the Company to pay for certain other costs such as property taxes and maintenance. Certain leases also contain rent escalation clauses (step rents) that require additional rental amounts in the later years of the term. Rent expense for leases with step rents is recognized on a straight-line basis over the minimum lease term.

TTM TECHNOLOGIES, INC.
Notes to Consolidated Financial Statements — (Continued)

The following is a schedule of future minimum lease payments as of January 1, 2018:

	<u>Operating Leases</u> <u>(In thousands)</u>
2018	\$ 18,604
2019	5,565
2020	3,581
2021	2,700
2022	1,473
Thereafter	6,187
Total minimum lease payments	<u>\$ 38,110</u>

Total rent expense for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, was approximately \$16,665, \$10,329 and \$7,362, respectively.

Legal Matters

The Company is subject to various legal matters, which it considers normal for its business activities. While the Company currently believes that the amount of any reasonably possible loss for known matters would not be material to the Company's financial condition, the outcome of these actions is inherently difficult to predict. In the event of an adverse outcome, the ultimate potential loss could have a material adverse effect on the Company's financial condition or results of operations in a particular period. The Company has accrued amounts for its loss contingencies which are probable and estimable as of January 1, 2018 and January 2, 2017. However, these amounts are not material to the consolidated financial statements of the Company.

Environmental Matters

The process to manufacture PCBs requires adherence to city, county, state, federal, and foreign environmental regulations regarding the storage, use, handling and disposal of chemicals, solid wastes and other hazardous materials, as well as compliance with air quality standards and chemical use reporting. The Company believes that its facilities in the United States and Canada comply in all material respects with applicable environmental laws and regulations. In China, governmental authorities have adopted new rules and regulations governing environmental issues. An update to the Chinese environmental waste water law was issued in late 2012, allowing for an interim period in which plants subject to such law may install equipment that meets the new regulatory regime. Some of the Company's plants in China are not yet in full compliance with the newly adopted environmental regulations. The Company has developed plans in response to these new regulations and is in the process of implementing these plans. The Company has established and enacted an investment plan related to the efforts to come into full compliance with the new regulations. The 2018 capital expenditure costs expected for these plans are included in the Company's capital expenditure projections.

(14) Stock-Based Compensation

Incentive Compensation Plan

The Company maintains a 2014 Incentive Compensation Plan (the Plan), which allowed for the issuance of up to 5,288 shares. In May 2016, the Plan was amended to increase the amount allowed for issuance by 5,000 shares, revising the maximum allowed for issuance to 10,288 through its expiration date of February 2024.

The Plan provides for the grant of incentive stock options and nonqualified stock options to the Company's key employees, non-employee directors and consultants. Other types of awards such as performance-based restricted stock units (PRUs), restricted stock units (RSUs), and stock appreciation rights are also permitted. The

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

exercise price for options and awards is determined by the compensation committee of the board of directors and, for options intended to qualify as incentive stock options, may not be less than the fair market value as determined by the closing stock price at the date of the grant. Each option and award shall vest and expire as determined by the compensation committee of the board of directors, with options, PRUs and RSUs generally vesting over three years for employees and one year for non-employee directors. Options, PRUs and RSUs do not have voting rights. Options expire no later than ten years from the grant date. All grants provide for accelerated vesting if there is a change in control, as defined in the Plan. Upon the exercise of outstanding stock options or vesting of RSUs and PRUs, the Company's practice is to issue new registered shares that are reserved for issuance under the Plan.

As of January 1, 2018, 930 PRUs, 2,918 RSUs and 80 stock options were outstanding under the Plan. Included in the 930 PRUs outstanding as of January 1, 2018 are 521 vested but not yet released. Included in the 2,918 RSUs outstanding as of January 1, 2018 are 505 vested but not yet released RSUs associated with non-employee directors. These RSUs vest over one year with release of the underlying shares of common stock deferred until retirement from the board of directors, (or until one year after retirement in the case of certain prior grants).

Performance-based Restricted Stock Units

The Company maintains a long-term incentive program for executives that provides for the issuance of PRUs, representing hypothetical shares of the Company's common stock that may be issued. Under the PRU program, a target number of PRUs is awarded at the beginning of each three-year performance period. The number of shares of common stock released at the end of the performance period may range from zero to 2.4 times the target number depending on performance during the period. The performance metrics of the PRU program are based on (a) annual financial targets, which are based on revenue and EBITDA (earnings before interest, tax, depreciation, and amortization expense), each equally weighted, and (b) an overall modifier based on the Company's total stockholder return (TSR) relative to a group of peer companies selected by the Company's compensation committee, over the three-year performance period.

Under the PRU program, financial goals are set at the beginning of each fiscal year and performance is reviewed at the end of that year. The percentage to be applied to each participant's target award ranges from zero to 160% based upon the extent to which the annual financial performance goals are achieved. If specific performance threshold levels for the annual financial goals are met, the amount earned for that element will be applied to one-third of the participants' PRU award to determine the number of units earned.

At the end of the three-year performance period, the total units earned, if any, are adjusted by applying a modifier, ranging from zero to 150% based on the Company's TSR based on stock price changes relative to a group of peer companies selected by the Company's compensation committee for the same three-year period.

The TSR modifier is intended to ensure that there are limited or no payouts under the PRU program if the Company's stock performance is significantly below the median TSR of a group of peer companies selected by the Company's compensation committee over the three-year performance period. Where the annual financial goals have been met and where there has been strong relative TSR performance over the three-year performance period, the PRU program may provide substantial rewards to participants with a maximum payout of 2.4 times the initial PRU award. However, even if all of the annual financial metric goals are achieved in each of the three years, there will be no payouts if the Company's stock performance is below that of the 10th percentile for PRUs granted in 2017 and 2016, and 20th percentile for PRUs granted prior to 2016, of the group of peer companies selected by the Company's compensation committee, as appropriate.

Recipients of PRU awards generally must remain employed by the Company on a continuous basis through the end of the three-year performance period in order to receive any amount of the PRUs covered by that award. In events such as death, disability or retirement, the recipient may be entitled to pro-rata amounts of PRUs as

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

defined in the Plan. Target shares subject to PRU awards do not have voting rights of common stock until earned and issued following the end of the three-year performance period.

The Company records stock-based compensation expense for PRU awards granted based on management's periodic assessment of the annual financial performance goals to be achieved. As of January 1, 2018, management determined that vesting of the PRU awards was probable. PRU activity for the year ended January 1, 2018 was as follows:

	<u>Shares</u> (In thousands)	<u>Weighted Average Fair Value</u>
Outstanding shares at January 2, 2017	406	\$ 8.31
Granted	363	22.90
Vested	(521)	13.52
Change in units due to annual performance achievement	161	12.79
Outstanding shares at January 1, 2018	<u>409</u>	<u>\$ 16.39</u>

The fair value of PRUs granted is calculated using a Monte Carlo simulation model, as the TSR modifier contains a market condition. For the years ended January 1, 2018, January 2, 2017 and December 28, 2015, the following assumptions were used in determining the fair value:

	<u>For the Year Ended</u>		
	<u>January 1, 2018(1)</u>	<u>January 2, 2017(2)</u>	<u>December 28, 2015(3)</u>
Weighted-average fair value	\$ 22.90	\$ 6.46	\$ 7.22
Risk-free interest rate	1.20%	0.8%	0.5%
Dividend yield	—	—	—
Expected volatility	43%	40%	37%
Expected term in months	21	24	22

- (1) Reflects the weighted-averages for the third year of the three-year performance period applicable to PRUs granted in 2015, the second year of the three-year performance period applicable to PRUs granted in 2016 and the first year of the three-year performance period applicable to PRUs granted in 2017.
- (2) Reflects the weighted-averages for the third year of the three-year performance period applicable to PRUs granted in 2014, the second year of the three-year performance period applicable to PRUs granted in 2015 and the first year of the three-year performance period applicable to PRUs granted in 2016.
- (3) Reflects the weighted-averages for the third year of the three-year performance period applicable to PRUs granted in 2013, the second year of the three-year performance period applicable to PRUs granted in 2014 and the first year of the three-year performance period applicable to PRUs granted in 2015.

The expected term of the PRUs reflects the performance period for the PRUs granted. Expected volatility is calculated using the Company's historical stock price. The risk-free interest rate for the expected term of PRUs is based on the U.S Treasury yield curve in effect at the time of grant.

TTM TECHNOLOGIES, INC.
Notes to Consolidated Financial Statements — (Continued)

Restricted Stock Units

RSU activity for the year ended January 1, 2018 was as follows:

	Shares (In thousands)	Weighted Average Grant-Date Fair Value
Non-vested RSUs outstanding at January 2, 2017	2,708	\$ 7.48
Granted	1,029	15.85
Vested	(1,235)	7.65
Forfeited	(89)	9.92
Non-vested RSUs outstanding at January 1, 2018	<u>2,413</u>	<u>\$ 10.88</u>
Vested and expected to vest at January 1, 2018	<u>2,918</u>	<u>\$ 10.57</u>

The fair value of the Company's RSUs is determined based upon the closing common stock price on the grant date. The weighted average fair value per unit of RSUs granted was \$15.85, \$6.78 and \$9.15 for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively. The total fair value of RSUs vested for the years ended January 1, 2018, January 2, 2017 and December 28, 2015 was \$9,446, \$7,834 and \$6,396, respectively.

Stock Options

During the year ended January 2, 2017, the Company granted 20 stock options to a newly appointed member of the board which were estimated to have a fair value per share of \$6.78. The fair value calculation is based on stock options granted during the period using the Black-Scholes option-pricing model on the date of grant. For the year ended January 2, 2017 the fair value was determined using 1.7% as the risk-free interest rate, 51% as the expected volatility, 8.5 years as the expected term and no dividend yield. No stock options were granted by the Company for the years ended January 1, 2018 or December 28, 2015.

The Company determines the expected term of its stock option awards by periodic review of its historical stock option exercise experience. This calculation considers pre-vesting forfeitures and uses assumed future exercise patterns to account for option holders' expected exercise and post-vesting termination behavior for outstanding stock options over their remaining contractual terms. Expected volatility is calculated by weighting the Company's historical stock price to calculate expected volatility over the expected term of each grant. The risk-free interest rate for the expected term of each option granted is based on the U.S. Treasury yield curve in effect at the time of grant with a period that approximates the expected term of the options.

Option activity under the Plan for the year ended January 1, 2018 was as follows:

	Options (In thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value (In thousands)
Outstanding at January 2, 2017	87	\$ 10.99	5.0	\$ 228
Exercised	(7)	11.16		
Outstanding at January 1, 2018	<u>80</u>	<u>\$ 10.98</u>	<u>4.2</u>	<u>\$ 375</u>
Vested and expected to vest at January 1, 2018	<u>80</u>	<u>\$ 10.98</u>	<u>4.2</u>	<u>\$ 375</u>
Exercisable at January 1, 2018	<u>65</u>	<u>\$ 10.78</u>	<u>3.1</u>	<u>\$ 318</u>

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The aggregate intrinsic values in the table above represent the total pretax intrinsic value (the difference between Company's closing stock price on the last trading day of the 2017 fiscal year and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on January 1, 2018. This amount changes based on the fair market value of the Company's stock. The total intrinsic value of options exercised for the years ended January 1, 2018, January 2, 2017 and December 28, 2015 was \$27, \$127 and \$131, respectively. The total fair value of the options vested for the year ended January 1, 2018 was \$34. There were no options vested for the years ended January 2, 2017 and December 28, 2015.

Stock-based Compensation Expense and Unrecognized Compensation Costs

For the years ended January 1, 2018, January 2, 2017 and December 28, 2015, the amounts recognized in the consolidated financial statements with respect to the stock-based compensation plan are as follows:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Cost of goods sold	\$ 2,252	\$ 1,630	\$ 1,117
Selling and marketing	1,458	1,054	1,135
General and administrative	14,580	8,406	7,409
Stock-based compensation expense recognized	<u>\$ 18,290</u>	<u>\$ 11,090</u>	<u>\$ 9,661</u>

The Company may become entitled to a deduction in its tax returns upon the future exercise of incentive stock options under certain circumstances. For the years ended January 1, 2018, January 2, 2017 and December 28, 2015, the Company did not record an income tax benefit as a result of a full valuation allowance on its deferred tax assets.

The following is a summary of total unrecognized compensation costs as of January 1, 2018:

	Unrecognized Stock-Based Compensation Cost (In thousands)	Remaining Weighted Average Recognition Period (In years)
RSU awards	\$ 16,112	1.3
PRU awards	3,726	1.4
Stock options	95	1.9
	<u>\$ 19,933</u>	

(15) Employee Benefit and Deferred Compensation Plans

As of January 1, 2018, the Company has four separate retirement benefit plans: two in North America and two in China. In North America, the Company has savings plans (the Savings Plans) in which eligible full-time employees can participate and contribute a percentage of compensation subject to the maximum allowed by the tax agencies. The Savings Plans provides for a partial match by the employer. In China, the Company contributes to either separate trust-administered funds or various government-sponsored pension plans on a mandatory basis. For all retirement plans, the Company has no further payment obligation once the required contributions have been made. The Company recorded contributions to retirement benefit plans of \$42,461, \$36,172 and \$35,427 during the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The Company also maintains a deferred compensation plan (the Compensation Plan). The Compensation Plan is an unfunded, nonqualified deferred compensation plan and is limited to selected employees, including our named executive officers and our directors. The Compensation Plan allows participants to defer up to 100% of their annual bonus and between 5% and 100% of their annual director fees. Amounts deferred under the Compensation Plan will be credited to accounts maintained by the Company for each participant and will be credited or debited with the participant's proportionate share of any gains or losses attributable to the performance of investment options selected by the participant.

(16) Preferred Stock

The board of directors has the authority, without action by stockholders, to designate and issue preferred stock in one or more series. The board of directors may also designate the rights, preferences and privileges of each series of preferred stock, any or all of which may be superior to the rights of the common stock. As of January 1, 2018, no shares of preferred stock were outstanding.

(17) Distribution of profits

As stipulated by the relevant laws and regulations of China applicable to the Company's subsidiaries in China, each of such subsidiaries is required to make appropriations from its net income as determined in accordance with accounting principles and the relevant financial regulations of China (PRC GAAP) to a non-distributable reserve, also referred to as statutory surplus reserve. The appropriations to the statutory surplus reserve are required to be made at not less than 10% of the profit after tax as determined under PRC GAAP and are required until the balance reaches 50% of its registered capital. The statutory surplus reserve is used to offset future or past losses. These Chinese subsidiaries may, upon a resolution passed by their respective shareholders, convert the statutory surplus reserve into capital.

There were appropriations of approximately \$5,659, \$6,037 and \$4,576 to the statutory surplus reserve of the Company's Chinese subsidiaries for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively.

(18) Segment Information

The reportable segments reported below are the Company's segments for which separate financial information is available and upon which operating results are evaluated by the chief operating decision maker to assess performance and to allocate resources. The Company has two reportable segments: PCB and E-M Solutions. The PCB reportable segment is comprised of multiple operating segments. Factors considered to determine whether operating segments can be aggregated into reportable segments included similarity regarding economic characteristics, products, production processes, type or classes of customers, distribution methods, and regulatory environments.

The Company, including the chief operating decision maker, evaluates segment performance based on reportable segment income, which is operating income before amortization of intangibles. Interest expense and interest income are not presented by segment since they are not included in the measure of segment profitability reviewed by the chief operating decision maker. All inter-segment transactions have been eliminated.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The Company accounts for inter-segment sales and transfers consistent with the Company's revenue recognition policy. The inter-segment sales for the year ended January 1, 2018 are sales primarily from the PCB to the E-M Solutions reportable segment.

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Net Sales:			
PCB	\$2,461,575	\$2,346,554	\$1,944,041
E-M Solutions	210,086	198,483	158,655
Total sales	2,671,661	2,545,037	2,102,696
Inter-segment sales	(13,069)	(11,678)	(7,208)
Total net sales	<u>\$2,658,592</u>	<u>\$2,533,359</u>	<u>\$2,095,488</u>
Reportable Segment Income (Loss):

Corporate	44,001	5,873	1,523
Total capital expenditures	<u>\$210,591</u>	<u>\$ 83,397</u>	<u>\$ 77,565</u>

TTM TECHNOLOGIES, INC.
Notes to Consolidated Financial Statements — (Continued)

	As of		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Segment Assets:			
PCB	\$ 1,991,049	\$ 1,791,829	\$ 1,943,577
E-M Solutions	143,344	127,826	143,779
Corporate	647,489	580,421	552,777
Total assets	<u>\$ 2,781,882</u>	<u>\$ 2,500,076</u>	<u>\$ 2,640,133</u>

The Corporate category includes operating expenses that are not included in the segment operating performance measures. Corporate consists primarily of corporate governance functions such as finance, accounting, information technology, facilities and human resources personnel, as well as global sales and marketing personnel and acquisition and integration costs associated with the acquisitions. Bank fees and legal, accounting, and other professional service costs associated with acquisitions of \$2,266, \$1,688 and \$34,448 for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively, are included in Corporate.

During the year ended January 2, 2017, the Company recorded impairment charges of \$1,393 and \$1,953 for the impairment of long-lived assets related to its PCB reportable segment and Corporate, respectively. There were no impairment charges for the years ended January 1, 2018 and December 28, 2015.

The Company markets and sells its products in approximately 65 countries. Other than in the United States and China, the Company does not conduct business in any country in which its net sales in that country exceed 10% of the Company's total net sales. Net sales and long-lived assets are as follows:

	2017		2016		2015	
	Net Sales	Long-Lived Assets	Net Sales	Long-Lived Assets	Net Sales	Long-Lived Assets
	(In thousands)					
United States	\$ 850,511	\$ 642,256	\$ 1,119,086	\$ 661,058	\$ 960,146	\$ 654,579
China	957,296	866,126	646,844	781,678	547,999	923,219
Other	850,785	23,984	767,429	23,124	587,343	23,133
Total	<u>\$ 2,658,592</u>	<u>\$ 1,532,366</u>	<u>\$ 2,533,359</u>	<u>\$ 1,465,860</u>	<u>\$ 2,095,488</u>	<u>\$ 1,600,931</u>

Net sales are attributed to countries by country invoiced.

TTM TECHNOLOGIES, INC.
Notes to Consolidated Financial Statements — (Continued)

(19) Earnings Per Share

The following is a reconciliation of the numerator and denominator used to calculate basic earnings (loss) per share and diluted earnings (loss) per share for the years ended January 1, 2018, January 2, 2017 and December 28, 2015:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands, except per share amounts)		
Basic earnings (loss):			
Basic earnings (loss)	\$124,214	\$ 34,861	\$ (25,882)
Diluted earnings (loss):			
Net income (loss) attributable to TTM Technologies, Inc. stockholders	\$124,214	\$ 34,861	\$ (25,882)
Interest expense from convertible senior notes, net of tax	13,803	—	—
Diluted earnings (loss)	\$138,017	\$ 34,861	\$ (25,882)
Basic shares	101,580	100,099	92,675
Dilutive effect of performance-based restricted stock units, restricted stock units and stock options	2,157	1,383	—
Dilutive effect of outstanding warrants	2,799	—	—
Dilutive effect of assumed conversion of convertible senior notes outstanding	25,940	—	—
Diluted shares	132,476	101,482	92,675
Earnings (loss) per share attributable to TTM Technologies, Inc. stockholders:			
Basic	\$ 1.22	\$ 0.35	\$ (0.28)
Diluted	\$ 1.04	\$ 0.34	\$ (0.28)

For the years ended January 1, 2018 and January 2, 2017, PRUs, RSUs and stock options to purchase 255 and 892 shares of common stock, respectively, were not considered in calculating diluted earnings per share because the options' exercise prices or the total expected proceeds under the treasury stock method for performance-based stock units, restricted stock units or stock options was greater than the average market price of common shares during the applicable year and, therefore, the effect would be anti-dilutive.

For the year ended December 28, 2015, potential shares of common stock, consisting of stock options to purchase approximately 420 shares of common stock at exercise prices ranging from \$5.78 to \$16.82 per share, 2,294 RSUs, and 572 PRUs were not included in the computation of diluted earnings per share because the Company incurred a net loss from operations and, as a result, the impact would be anti-dilutive.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

The below is a summary of amounts convertible to common stock related to convertible senior notes and related warrants:

	For the Year Ended		
	January 1, 2018	January 2, 2017	December 28, 2015
	(In thousands)		
Common stock related to convertible senior notes	<u>25,939</u>	<u>25,940</u>	<u>25,940</u>
Warrants to purchase common stock	<u>25,940</u>	<u>25,940</u>	<u>26,408</u>

For the years ended January 2, 2017 and December 28, 2015, the effect of shares of common stock related to the Company's convertible senior notes were not included in the computation of dilutive earnings per share as the impact would be anti-dilutive.

Outstanding warrants for the years ended January 2, 2017 and December 28, 2015, to purchase common stock were not included in the computation of dilutive earnings per share because the strike price of the warrants to purchase the Company's common stock were greater than the average market price of common shares during the applicable year, and therefore, the effect would be anti-dilutive.

(20) Related Party Transactions

In the normal course of business, the Company's foreign subsidiaries purchase laminate and prepreg from related parties in which a significant shareholder of the Company holds an equity interest. The Company purchased laminate and prepreg from these related parties in the amount of \$51,985, \$55,649 and \$63,605 for the years ended January 1, 2018, January 2, 2017 and December 28, 2015, respectively.

The Company also sells and purchases PCBs to a related party which is a wholly owned subsidiary of an entity in which a significant shareholder of the Company holds an equity interest. Sales to this related party for the years ended January 1, 2018, January 2, 2017 and December 28, 2015 were \$78, \$991 and \$4,709, respectively. Purchases of PCBs, including various services relating to PCB manufacturing, from this related party for the year ended December 28, 2015 were \$1,948. There were no purchases from this related party for the years ended January 1, 2018 and January 2, 2017.

As of January 1, 2018 and January 2, 2017, the Company's consolidated balance sheets included \$14,452 and \$15,836, respectively, in accounts payable due to related parties for purchases of laminate and prepreg and such balances are included as a component of accounts payable on the consolidated balance sheets. Additionally, the Company's consolidated balance sheets included \$33 and \$192, respectively, in accounts receivable due from a related party for sales of PCBs, as mentioned above, and such balances are included as a component of accounts receivable, net on the consolidated balance sheets.

(21) Noncontrolling Interest Holdings

During the fourth quarter of 2017, the Company acquired Desay Industrial's 5% noncontrolling equity interest in the manufacturing facility in Huiyang, China otherwise owned by the Company for 56,400 Chinese RMB or \$8,568. The Company recorded an increase to additional paid in capital for the difference between the purchase price and the carrying value of the noncontrolling interest of \$223.

TTM TECHNOLOGIES, INC.

Notes to Consolidated Financial Statements — (Continued)

(22) Subsequent Event

On February 21, 2018, the Company completed the allocation of \$600,000 in commitments from lenders in the syndication for the Incremental Facility. This allocated Incremental Facility supersedes the original \$700,000 commitment received at the time the Company entered into the definitive purchase agreement with Anaren Holdings, LLC. The Incremental Facility is expected to be issued at a discount at 99.75% and have a floating rate of LIBOR plus a margin of 2.5%. The closing of the Incremental Facility is expected to occur concurrently with the completion of the pending acquisition of Anaren.

CERTIFICATION

I, Thomas T. Edman, certify that:

1. I have reviewed this annual report on Form 10-K of TTM Technologies, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report on Form 10-K of TTM Technologies, Inc. (the “Company”) for the year ended January 1, 2018, as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, Thomas T. Edman, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a) or 78o(d)); and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
